Mei Li

This definitive anthology casts Sinophone studies as the study of Sinitic-language cultures born of colonial and postcolonial influences. Essays by such authors as Rey Chow, Ha Jin, Leo Ou-fan Lee, Ien Ang, Wei-ming Tu, and David Wang address debates concerning the nature of Chineseness while introducing readers to essential readings in Tibetan, Malaysian, Taiwanese, French, Caribbean, and American Sinophone literatures. By placing Sinophone cultures at the crossroads of multiple empires, this anthology richly demonstrates the transformative power of multiculturalism and multilingualism, and by examining the place-based cultural and social practices of Sinitic-language communities in their historical contexts beyond "China proper," it effectively refutes the diasporic framework. It is an invaluable companion for courses in Asian, postcolonial, empire, and ethnic studies, as well as world and comparative literature.

Advanced Problems in Mathematics

The Business of Luxury

Zhu Rongji on the Record

Hello Kitty Crochet is all about cute: the whimsical world of Hello Kitty and her Sanrio friends meets the Japanese art of amigurumi, or crocheted dolls. With easy-to-make patterns for adorable characters and accessories, Hello Kitty Crochet allows you to make all your favorites, new and old, from Badtz-Maru and My Melody to Pekkles, Purin, and Little Twin Stars. Whether you're a seasoned crocheter or have never picked up a hook, you'll find helpful tips and how-tos for creating kawaii crafts. It's the perfect way for crafters and cuteness lovers alike to

celebrate the 40th anniversary of Japan's most famous kitty.

Europe and Iran

This book will give you the method, patterns and information on the yarns required to create your own gorgeous fox, bird, doll, dog, sheep, bunny and many more! Many of the patterns come with quirky little extras such as flower crowns, dresses, and other accessories which can be used to personalize your creations. Suitable for absolute beginners and more experienced crocheters with step-by-step instructions and high quality photographs to help you create your own cute crocheted collection.

Hello Kitty Crochet

Despite China's effort to maintain peace with its neighbors, its military and economic growth poses an undeniable threat. Regional states must account for a more powerful potential adversary in China, and China has become more ambitious in its efforts to control its surroundings. Historical baggage has only aggravated the situation as China believes it is reclaiming its rightful place after a time of weakness and mistreatment, and other Asia-Pacific countries remember all too well their encounter with Chinese conflict and domination. Through a careful consideration of historical factors and raw data, Denny Roy examines the benefits and consequences of a more politically, economically, and militarily potent China. Since China's intended sphere of influence encroaches on the autonomy of regional states, its attempts to increase its own security have weakened the security of its neighbors. Nevertheless, there is little incentive for Beijing to change a status quo that is mostly good for China, and the PRC thrives through its participation in the global economy and multilateral institutions. Even so, Beijing remains extremely sensitive to challenges to the Chinese Communist Party's legitimacy and believes it is entitled to exercise influence on its periphery. On these issues, nationalism trumps any reluctance to upset the international system. Diplomatic disputes regarding the islands in the South China Sea, as well as controversial relations with North Korea, continue to undermine Chinese promises of positive behavior. Roy's study reveals the dynamics defining this volatile region, in which governments pursue China as an economic partner yet fear Beijing's power to set the rules of engagement.

Essays on the Sociology of Perception

This revised second edition covers the pharmacologic principles underlying the

individualization of patient therapy and contemporary drug development, focusing on the fundamentals that underlie the clinical use and contemporary development of pharmaceuticals. Authors drawn from academia, the pharmaceutical industry and government agencies cover the spectrum of material, including pharmacokinetic practice questions, covered by the basic science section of the certifying examination offered by the American Board of Clinical Pharmacology. This unique reference is recommended by the Board as a study text and includes modules on drug discovery and development to assist students as well as practicing pharmacologists. Unique breadth of coverage ranging from drug discovery and development to individualization and quality assessment of drug therapy Unusual cohesive of presentation that stems from author participation in an ongoing popular NIH course Instructive linkage of pharmacokinetic theory and applications with provision of sample problems for self-study Wide-ranging perspective of authors drawn from the ranks of Federal agencies, academia and the pharmaceutical industry Expanded coverage of pharmacogenetics Expanded coverage of drug transporters and their role in interactions Inclusion of new material on enzyme induction mechanisms in chapters on drug metabolism and drug interactions A new chapter on drug discovery that focuses on oncologic agents Inclusion of therapeutic antibodies in chapter on biotechnology products

Pei Mei's Chinese Cook Book

Luxury has been fascinating humanity for millennia and it seems that it will continue to do so in the future. As we can see in developed countries with populations living in relative affluence, luxury takes different forms, becoming less materialistic when people already own a house, two cars and a boat, but now crave wellness treatments and more recreational time. However, luxury will always have a material aspect as embodied by beautiful products made from exclusive materials by skilled artisans with an eye for detail. One way or another, luxury is big business and an important economic factor all over the world, especially in Switzerland, a country with few natural resources to speak of but a wealth of knowledge when it comes to services (e.g. hotel management) and the manufacture of exclusive products such as watches, textiles, and of course chocolate - to name just a few. Indeed, a significant proportion of Swiss GDP comes from the production of luxury goods which are exported all over the world. In this publication we examine the phenomenon of luxury, its roots, and its economic impact both globally and in Switzerland. You will learn more about global luxury markets, well-known and niche market players, as well as major trends shaping the definition of luxury and the management and marketing of luxury brands in the future.

Affordable Excellence

This volume explores the challenges and possibilities of research into the European dimensions of popular print culture. Popular print culture has traditionally been studied with a national focus. Recent research has revealed, however, that popular print culture has many European dimensions and shared features. A group of specialists in the field has started to explore the possibilities and challenges of research on a wide, European scale. This volume contains the first overview and analysis of the different approaches, methodologies and sources that will stimulate

and facilitate future comparative research. This volume first addresses the benefits of a media-driven approach, focussing on processes of content recycling, interactions between text and image, processes of production and consumption. A second perspective illuminates the distribution and markets for popular print, discussing audiences, prices and collections. A third dimension refers to the transnational dimensions of genres, stories, and narratives. A last perspective unravels the communicative strategies and dynamics behind European bestsellers. This book is a source of inspiration for everyone who is interested in research into transnational cultural exchange and in the fascinating history of popular print culture in Europe.

Bradstreet's

This book constitutes the refereed proceedings of the 28th International Supercomputing Conference, ISC 2013, held in Leipzig, Germany, in June 2013. The 35 revised full papers presented together were carefully reviewed and selected from 89 submissions. The papers cover the following topics: scalable applications with 50K+ cores; performance improvements in algorithms; accelerators; performance analysis and optimization; library development; administration and management of supercomputers; energy efficiency; parallel I/O; grid and cloud.

Supercomputing

First published in 1982, this is one of Mary Douglas' favourite books. It is based on her meetings with friends in which they attempt to apply the grip/group analysis from Natural Symbols. The essays have been important texts for preparing grid/group exercises ever since. She is still trying to improve the argument of Natural Symbols and is always hoping to find better applications to illustrate the power of the two dimensions used for accurate comparison.

Cutest Crochet Creations

The 4th International Conference on Electronic, Communications and Networks (CECNet2014) inherits the fruitfulness of the past three conferences and lays a foundation for the forthcoming next year in Shanghai. CECNet2014 was hosted by Hubei University of Science and Technology, China, with the main objective of providing a comprehensive global forum

Moody's Municipal & Government News Reports

Faith, War, and Violence analyzes the age-old links between religion and violence perpetrated in the name of God, and the role religion performs in politically infusing the state with romantic spiritualism. The volume examines instances of this phenomenon from ancient Rome to the modern day; it finds that religion-inspired violence is not restricted to Abrahamic faiths or to one geographic region. The fact that symbolically charged religious violence has destructive consequences is not lost on contributors to Faith, War, and Violence. Among the subjects tackled are: the ideological and religious foundations that inspired the founders of Al-Qaeda and its role in the Arab Spring; the long history of religious conflict in Ireland

known as the Troubles; Sikh extremism; and the evolution of the Christian approach to war. As the contributors demonstrate, in Western societies, the unity of religious fervor and warmongering stretches from Constantine's incorporation of Christian symbols into Roman army flags to slogans like Gott mit uns (God is with us), which appeared on the belt buckles of German soldiers in World War I. In recent years, George W. Bush declared the war on terror a "crusade," and his speechwriter, David Frum, coined the religiously inspired term "Axis of Evil," to describe Iraq and other countries opposing the United States.

Principles of Clinical Pharmacology

China's explosive transformation from a planned economy to a more market-oriented one over the past three decades owes much to the charismatic reformer Zhu Rongji. As China's premier from 1998 to 2003, Zhu displayed a pragmatism and strong work ethic that have been key forces in China's drive to greater modernization and global stature. During this time, Zhu embarked on a plan to reduce the size of government and reform the heavily indebted banking system and state-owned enterprises as well as to overhaul the housing and health care systems. His sweeping efforts ranged from lobbying for the establishment of stock exchanges to revitalizing agriculture through the introduction of a modern grain market. The ramifications of these reforms are still being felt throughout China and the globe, and *The Road to Reform* provides a real-time look at these plans as they were being formulated during the 1990s to the early 2000s. The second of a two-volume collection containing more than 100 speeches and personal papers by Zhu, this volume is a revealing and insightful look at Zhu's thinking and will lead to greater understanding of one of the world's two largest economic powers.

Electronics, Communications and Networks IV

This collection of research papers explores the impact of the Arab uprisings on the politics and political economy of foreign aid provision in the MENA region. Contributions focus on the foreign assistance policies and strategies of key donors (United States, Europe, Gulf countries and Turkey), and on the relationship between donors and recipients of foreign aid in a select set of MENA cases (Tunisia, Egypt, Palestine and to a lesser extent Morocco). Despite widespread rhetoric among lead donors pledging to support the transformational potential of the Arab uprisings, the contributions find a more complex pattern in foreign aid provision since 2011. Among Arab donors, who have played a significant role as providers of aid to states most affected by mass protests, trends in foreign assistance reflect the competing priorities of donors, and their willingness to politicize aid provision in pursuit of their strategic interests. Among Western donors, authors find a high degree of continuity. Chapters that focus on Western donors seek to account for continuity on the part of Western governments and the EU at a moment of profound transformational potential. Two factors, bureaucratization and securitization, capture most of the explanations provided, which take into account a variety of local dimensions as well. Contributions also discuss the changing assistance environment, namely the globalization of foreign assistance, the complex bureaucratic arrangements presiding over the delivery of European and US aid, and the role of regional and international non-democracies in the provision of foreign assistance. This book was published as a special issue of

Mediterranean Politics.

Paper Butterfly

Double Awesome Chinese Food

Peripheral Neuropathies compiles lectures presented at the Symposium on Peripheral Neuropathies held in Milan, Italy on June 26-28, 1978. This book covers the basic problems in peripheral nerve pathology; axonal transport; neuropathies in chronic renal failure; peripheral neuropathies in diabetes; compression neuropathies; and metabolic, genetic, and inflammatory neuropathies. This text also discusses topics such as filamentous inclusions in Schwann cell nuclei; autonomic dysfunction and myokymia in gold neuropathy; study of the effect of gangliosides on experimental carbon disulfide neuropathy; and peripheral nerve changes in Refsum's disease before and after treatment. This compilation is a useful source of information for students and researchers conducting investigative work on peripheral neuropathy.

Faith, War, and Violence

Brimming with verve and dramatic incident, Singapore: A Biography offers fresh insights into the life story of this island city-state through the personal experiences of the workers, adventurers, rulers and revolutionaries who have shaped its history over the last seven centuries. The authors, drawing on research undertaken in collaboration with the National Museum of Singapore, have woven together ancient chronicles, eyewitness accounts, oral histories and even modern radio and television broadcasts to create a vivid and compelling narrative that brings the past back to life. Grounded in scholarship yet fired by the imagination, this book reveals the Singapore story to have been as rich, diverse and multilayered as the city-state is prosperous, ordered and successful today.

Engaging China

"The Joy Luck Club is one of my favorite books. From the moment I first started reading it, I knew it was going to be incredible. For me, it was one of those once-in-a-lifetime reading experiences that you cherish forever. It inspired me as a writer and still remains hugely inspirational." —Kevin Kwan, author of Crazy Rich Asians
Amy Tan's beloved, New York Times bestselling tale of mothers and daughters
Four mothers, four daughters, four families whose histories shift with the four winds depending on who's "saying" the stories. In 1949 four Chinese women, recent immigrants to San Francisco, begin meeting to eat dim sum, play mahjong, and talk. United in shared unspeakable loss and hope, they call themselves the Joy Luck Club. Rather than sink into tragedy, they choose to gather to raise their spirits and money. "To despair was to wish back for something already lost. Or to prolong what was already unbearable." Forty years later the stories and history continue. With wit and sensitivity, Amy Tan examines the sometimes painful, often tender, and always deep connection between mothers and daughters. As each woman reveals her secrets, trying to unravel the truth about her life, the strings become

more tangled, more entwined. Mothers boast or despair over daughters, and daughters roll their eyes even as they feel the inextricable tightening of their matriarchal ties. Tan is an astute storyteller, enticing readers to immerse themselves into these lives of complexity and mystery.

Bibliografie Van Die Oranje-Vrystaat Tot 31 Mei 1910

What is the self? Is it the impregnable cogito of Descartes or the shattered self of Nietzsche? Or has it become serendipitously constituted from pieces of fairy tales and novels, childhood comics and soap operas - a multitude of forces culled from fashion, modern myth, culture and recreation? Or must we still convince ourselves, like Rousseau, that the self can never be tainted; that it is, above all else, irrefragible? Paul Ricoeur proposed that the self is formed within the narratives we tell of ourselves, that it is itself a form of narrative. But is this enough? Could a self cohere in a multitude of potential narratives or find unity among its stories? In this book, Declan Sheerin challenges the theory that the self is narrative alone or that concordance reigns over discordance in the self. Drawing upon the works of Gilles Deleuze, he proposes that deep to the sense of a unified, represented self is a more fundamental self of difference, a self that is more than merely coherent narrative.

The Struggle for Influence in the Middle East

This new and expanded edition is intended to help candidates prepare for entrance examinations in mathematics and scientific subjects, including STEP (Sixth Term Examination Paper). STEP is an examination used by Cambridge Colleges for conditional offers in mathematics. They are also used by some other UK universities and many mathematics departments recommend that their applicants practice on the past papers even if they do not take the examination. Advanced Problems in Mathematics bridges the gap between school and university mathematics, and prepares students for an undergraduate mathematics course. The questions analysed in this book are all based on past STEP questions and each question is followed by a comment and a full solution. The comments direct the reader's attention to key points and put the question in its true mathematical context. The solutions point students to the methodology required to address advanced mathematical problems critically and independently. This book is a must read for any student wishing to apply to scientific subjects at university level and for anyone interested in advanced mathematics. This work was published by Saint Philip Street Press pursuant to a Creative Commons license permitting commercial use. All rights not granted by the work's license are retained by the author or authors.

Herbicides

The Commissioners of Patents' Journal

A Brookings Institution Press and the National University of Singapore Press publication This is the story of the Singapore healthcare system: how it works, how

it is financed, its history, where it is going, and what lessons it may hold for national health systems around the world. Singapore ranks sixth in the world in healthcare outcomes, yet spends proportionally less on healthcare than any other high-income country. This is the first book to set out a comprehensive system-level description of healthcare in Singapore, with a view to understanding what can be learned from its unique system design and development path. The lessons from Singapore will be of interest to those currently planning the future of healthcare in emerging economies, as well as those engaged in the urgent debates on healthcare in the wealthier countries faced with serious long-term challenges in healthcare financing. Policymakers, legislators, public health officials responsible for healthcare systems planning, finance and operations, as well as those working on healthcare issues in universities and think tanks should understand how the Singapore system works to achieve affordable excellence.

Return of the Dragon

Wildly inventive Chinese-American home cooking from the siblings behind Boston's acclaimed Mei Mei restaurant. Too intimidated to cook Chinese food at home but crave those punchy flavors? Not anymore. Put down that takeout kung pao chicken and get in the kitchen! Full of irresistible recipes that marry traditional Asian ingredients with comforting American classics and seasonal ingredients, Double Awesome Chinese Food delivers the goods. The three fun-loving Chinese-American siblings behind the acclaimed restaurant Mei Mei take the fear factor out of cooking this complex cuisine, infusing it with creativity, playfulness, and ease. Take the Double Awesome: flaky scallion pancakes stuffed with two oozy eggs, sharp cheddar, and garlicky pesto; could there be anything better? Ridiculously delicious and unexpected dishes like Cranberry Sweet and Sour Stir-fried Pork and Red Curry Frito Pie will become new staples for your cooking lineup. Throw a hands-on dumpling-making party and let your friends decide whether to serve them chewy and pan-seared or crackly and deep-fried. Packed with pro-cooking tips, sauces to amp up any meal, sustainable sourcing advice, and over 100 delicious recipes, this book is your ticket to making the Chinese food of your dreams any night of the week.

The Fundamental Role of Teletraffic in the Evolution of Telecommunications Networks

Herbicide use is a common component of many weed management strategies in both agricultural and non-crop settings. However, herbicide use practices and recommendations are continuously updated and revised to provide control of ever-changing weed compositions and to preserve efficacy of current weed control options. *Herbicides - Current Research and Case Studies in Use* provides information about current trends in herbicide use and weed control in different land and aquatic settings as well as case studies in particular weed control situations.

Catalog of Government Publications in the Research Libraries

Volume 1 (A and B) of the Yearbook of International Organizations covers

international organizations throughout the world, comprising their aims, activities and events

Survey of Economic and Social Developments in the Arab Region 2015-2016

Deleuze and Ricoeur

Yearbook of International Organizations 2013-2014

For more than four decades, engagement has been the bedrock of Canada's policy toward China, as Ottawa has attempted to assist China's entry into the international system and advance a commercial agenda. More than just high policy, engagement has also been a recurrent narrative that sees changing China as a moral enterprise as important as trade and diplomacy. As global China's economic and diplomatic reach has expanded, policy makers in Ottawa have not fashioned an effective response. They are failing to produce a compelling strategy that addresses the power shift underway and growing public anxiety about China at home. *Engaging China* is a concise account of the evolution and state of the Canadian approach to China, its achievements, disappointments, and current dilemmas. Written by Paul Evans, professor at the Institute of Asian Research at the University of British Columbia and former head of the Asia Pacific Foundation of Canada, the volume inaugurates the UTP Insights series – books that take on the issues crucial to understanding our world and Canada's place within it. Evans's assessment of the evolution of Canada's China policy speaks to the intellectual history of the idea of "engagement," and assesses its internal contradictions and possibilities. He provides the elements of a comprehensive and strategic approach to China's central role in the most important power shift in the global order since World War II.

Mergent International Manual

Trends can be noted for the past five years, and with this in mind, the 2015-16 Survey will utilize recent data in order to take stock of the impact of instability and conflict, and address the foregone growth and output and destructive effects of this period.

Peripheral Neuropathies

The Economist

After spending an eventful day at the fair held on New Year's Eve, Mei Li arrives home just in time to greet the Kitchen God.

Sinophone Studies

The EU's approach to Iran has emerged as one of the few successes of European foreign policy. Still, its role in international negotiations from 2003, as much as its broader approach to Iran, are generally poorly appreciated by policy-makers in Europe, the United States, and around the world. This book aims to explain the specifics of the EU's approach to Iran, taking into account both the complexity of European foreign policy, in particular within transatlantic relations, and Iran's (aspired) place in the international order. It informs the reader about the special negotiation format that included a number of world powers as well as multilateral bodies such as the International Atomic Energy Agency (IAEA) and the UN Security Council. Furthermore, it provides an outlook on European post-nuclear deal strategies and offers conclusions on the effectiveness of Europe's multilateral approach to foreign policy. By looking at the EU's diplomatic activities towards Iran over more than a decade, the book focuses on Europe's actorness in international politics. This text will be of key interest to scholars, students and practitioners involved or interested in the European Union, Iran, U.S. foreign policy as well as Foreign and Security policy, including sanctions policy, and more broadly to European Politics, Middle East studies and international relations.

Vehicle, Mechatronics and Information Technologies

The International Teletraffic Congress (ITC) is a recognized international organization taking part in the work of the International Telecommunications Union. The congress traditionally deals with the development of teletraffic theory and its applications to the design, planning and operation of telecommunication systems, networks and services. The contents of ITC 14 illustrate the important role of teletraffic in the current period of rapid evolution of telecommunication networks. A large number of papers address the teletraffic issues behind developments in broadband communications and ATM technology. The extension of possibilities for user mobility and personal communications together with the generalization of common channel signalling and the provision of new intelligent network services are further extremely significant developments whose teletraffic implications are explored in a number of contributions. ITC 14 also addresses traditional teletraffic subjects, proposing enhancements to traffic engineering practices for existing circuit and packet switched telecommunications networks and making valuable original contributions to the fundamental mathematical tools on which teletraffic theory is based. The contents of these Proceedings accurately reflect the extremely wide scope of the ITC, extending from basic mathematical theory to day-to-day traffic engineering practices, and constitute the state of the art in 1994 of one of the fundamental telecommunications sciences.

Competitive Inteligence 2.0

Collection of selected, peer reviewed papers from the 2013 International Conference on Vehicle & Mechanical Engineering and Information Technology (VMEIT 2013), August 17-18, 2013, Zhengzhou, Henan, China. The 1094 papers are grouped as follows: Chapter 1: Design and Researches in Area of Vehicle and General Mechanical Engineering; Chapter 2: Mechatronics, Automation and Control; Chapter 3: Measurement and Instrumentation, Monitoring and Detection Technologies, Fault Diagnosis; Chapter 4: Computation Methods and Algorithms for Modeling, Simulation and Optimization, Data Mining and Data Processing; Chapter

5: Information Technologies, WEB and Networks Engineering, Information Security, Software Application and Development; Chapter 6: Power and Electric Systems, Electronics and Microelectronics, Embedded and Integrated Systems; Chapter 7: Communication, Signal and Image Processing, Data Acquisition, Identification and Recognition Technologies; Chapter 8: Information Technologies in Urban and Civil Engineering, Medicine and Biotechnology; Chapter 9: Material Science and Manufacturing Technology; Chapter 10: Information Technology in Management Engineering, Logistics, Economics, Finance, Assessment; Chapter 11: Related Themes.

Crossing Borders, Crossing Cultures

Modern-Day Beijing. Mei Wang, 31, lives and works as a private detective in China's capital city. After her resignation from the Ministry for Public Security, Mei saw her status drop swiftly in the eyes of her former colleagues, her TV-star sister, and even her mother. But sharp, intuitive Mei has taken her valuable experience and her insider knowledge of the police and city politics and set herself up as a successful private investigator. Now, with her own car, her own business, even a male receptionist to reflect her well-to-do status, Mei Wang is ensconced in her own little corner of the biggest city in China. When Mei receives a call from the chief executive at Guanghua Record Company, she learns that one of Mr. Peng's top starlets -- the beautiful pop star Kaili -- has been missing for four days. Mei must find the starlet while keeping up the record company's façade that nothing is amiss. Though Kaili is a piece of Mr. Peng's moneymaking machine, Mei learns that she is also a troubled, mysterious young woman whom no one really knows. The discovery of a secret stash of letters in Kaili's apartment sets Mei on an investigation that will take her back to a troubled past that belongs not only to Kaili, but to the entire nation. Meanwhile, in Gansu Province, a work camp laborer named Lin is finally released from eight years of forced labor on the outskirts of civilization. He angrily remembers the betrayal that cost him his youth and his sweetheart, who was torn from his life when he was sent to the work camp. As Mei tries to retrace Kaili's steps, so does Lin retrace his own past and he carries a secret to the case that no one would ever expect. Paper Butterfly, the second mystery featuring private detective Mei Wang, is as beautiful and lyrical as it is eye-opening.

The Commercial and Financial Chronicle

The recent "concept of 2.0", a consequence of "Web 2.0", discusses the emergence of a new style, emancipated from the Web, which finds applications in all areas of social activity: management, innovation, education, organization, territory, etc. This book considers the implications of the changing paradigm for competitive, economic and territorial intelligence applied to innovation, value creation and enhancement of territories. Competitive intelligence is therefore in the "2.0" and its values: perpetual beta, user-generated content, social relations, etc., horizontality, a renewed legitimacy. This book, collecting contributions from international experts, testifies to the heterogeneity and richness of possible approaches. It provides a totally new way of evaluating the impact of 2.0 with concrete examples, while analyzing the theoretical models allowing the reader to develop in other contexts the described cases of success.
