Going Through It

The story of three generations in twentieth-century China that blends the intimacy of memoir and the panoramic sweep of eyewitness history—a bestselling classic in thirty languages with more than ten million copies sold around the world, now with a new introduction from the author. An engrossing record of Mao's impact on China, an unusual window on the female experience in the modern world, and an inspiring tale of courage and love, Jung Chang describes the extraordinary lives and experiences of her family members: her grandmother, a warlord's concubine; her mother's struggles as a young idealistic Communist; and her parents' experience as members of the Communist elite and their ordeal during the Cultural Revolution. Chang was a Red Guard briefly at the age of fourteen, then worked as a peasant, a "barefoot doctor," a steelworker, and an electrician. As the story of each generation unfolds, Chang captures in gripping, moving—and ultimately uplifting—detail the cycles of violent drama visited on her own family and millions of others caught in the whirlwind of history.

Unknown Fate

Chinese porcelain of the period 1820 through 1920 has, to date, been the province of a minority of academic authors and a few adventurous dealers and collectors. This misunderstood but fascinating field of study is now brought within the reach of the average collector. Written with the interests of novice collectors and dealers in mind, superbly illustrated in colour throughout, each of the introductory chapters conclude with suggestions for further reading, and thus provide a fast but solid grounding for the primary focus of the book: dating of later Chinese porcelains. This book discusses marks, reign marks, footrims, glazes, bubbles, flaws and imperfections, and other indications of a date of manufacture, including the contentious subjects of hollow line and the reversed S; illustrating in close-up images many of the features used by the author to substantiate his assertions. Unashamedly provocative, Allen concludes with chapters on those subjects most earlier writers treated as taboo, including Modern Fakes and their Detection, Buying Trips in Asia, and Recommendations for Investment.

The World of Extreme Happiness

An unprecedented, intimate account of the lives of modern Chinese women, told by the women themselves -- true stories of the political and personal upheavals they have endured in their chaotic and repressive society For eight groundbreaking years, Xinran hosted a radio program in China during which she invited women to call in and talk about themselves. Broadcast every evening, Words on the Night Breeze became famous throughout the country for its unflinching portrayal of what it meant to be a woman in modern China. Centuries of obedience to their fathers, husbands and sons, followed by years of fear under Communism, had made women terrified of talking openly about their feelings. Xinran won their trust and, through her compassion and ability to listen, became the first woman to hear their true stories. This unforgettable book is the story of how Xinran negotiated the minefield of restrictions imposed on Chinese journalists to reach out to women across the country. Through the vivid intimacy of her writing, these women confide in the reader, sharing their deepest secrets. Whether they are the privileged wives of party leaders or peasants in a forgotten corner of the countryside, they tell of

almost inconceivable suffering: forced marriages, sexual abuse, separation of parents from their children, extreme poverty. But they also talk about love -- about how, despite cruelty, despite politics, the urge to nurture and cherish remains. Their stories changed Xinran's understanding of China forever. Her book will reveal the lives of Chinese women to the West as never before.

Chinese Ways of Seeing and Open-Air Painting

Following her internationally bestselling book *The Good Women of China*, Xinran has written one of the most powerful accounts of the lives of Chinese women. Her searing stories of mothers who have been driven to abandon their daughters or give them up for adoption is a masterful and significant work of literary reportage and oral history. Xinran has gained entrance to the most pained, secret chambers in the hearts of Chinese mothers—students, successful businesswomen, midwives, peasants—who have given up their daughters. Whether as a consequence of the single-child policy, destructive age-old traditions, or hideous economic necessity, these women had to give up their daughters for adoption; others even had to watch as their baby daughters were taken away at birth and drowned. Xinran beautifully portrays the “extra-birth guerrillas” who travel the roads and the railways, evading the system, trying to hold on to more than one baby; naïve young girl students who have made life-wrecking mistakes; the “pebble mother” on the banks of the Yangtze River still looking into the depths for her stolen daughter; peasant women rejected by their families because they can't produce a male heir; and Little Snow, the orphaned baby fostered by Xinran but confiscated by the state. For parents of adopted Chinese children and for the children themselves, this is an indispensable, powerful, and intensely moving book. *Message from an Unknown Chinese Mother* is powered by love and by heartbreak and will stay with readers long after they have turned the final page.

The End of the Chinese Dream

Glossy television images of happy, industrious, and increasingly prosperous workers show a bright view of life in twenty-first-century China. But behind the officially approved story is a different reality. Preparing this book Gerard Lemos asked hundreds of Chinese men and women living in Chongqing, an industrial mega-city, about their wishes and fears. The lives they describe expose the myth of China's harmonious society. Hundreds of millions of everyday people in China are beleaguered by immense social and health problems as well as personal, family, and financial anxieties--while they watch their communities and traditions being destroyed. Lemos investigates a China beyond the foreigners' beaten track. This is a revealing account of the thoughts and feelings of Chinese people regarding all facets of their lives, from education to health care, unemployment to old age, politics to wealth. Taken together, the stories of these men and women bring to light a broken society, one whose people are frustrated, angry, sad, and often fearful about the circumstances of their lives. The author considers the implications of these findings and analyzes how China's community and social problems threaten the ambitious nation's hopes for a prosperous and cohesive future. Lemos explains why protests will continue and a divided and self-serving leadership will not make people's dreams come true.

First published in 1937. The Book of Songs is a collection of ancient Chinese songs, dating from 800 to 600 B.C. Until this was published in 1937 it had not been translated into English since the middle of nineteenth century, when sinology was still in its infancy. For the first time the original meaning of 290 out of the 305 songs is given, use being made of the advances in the study of old Chinese. The result is not merely a clear picture of early Chinese life, but also the restoration to its proper place in world literature of one of the finest collection of traditional songs.

old traditions or hideous economic necessity, these women had to give up their daughters for adoption, others were forced to abandon them - on city streets, outside hospitals, orphanages or on station platforms - and others even had to watch their baby daughters being taken away at birth, and drowned. Personal, immediate, full of sorrow but also full of hope, this books sends a heart-rending message to Chinese girls who have been adopted to show them how things really were for their mothers, and to tell them they were loved and will never be forgotten.

The Journey to the West

"Summer of Change" staged in New Mexico during the hot summer months of 1973 is filled with complex conflicts on many levels including bullying, abandonment, greed and environmental concerns. MatiLou is eleven, the brightest one in her class and an only child. She's wished for a sister and on the hottest day, PerryAnn, who is fourteen, appears on Grandma Waters' cactus farm next door. PerryAnn's grandmother sells the minerals rights under the farm and begins drinking heavily, while in the midst of grieving the loss of her only son, PerryAnn's father. The threat of external change to the beloved cactus farm looms throughout the story because three men in steel toe boots have come to stake a well right in front of Grandma Waters' house. In the midst of it all, the girls make a trek to the highest hill at the park without telling anyone they're going. Their reasons for hiking to the hill are at odds and both girls have life threatening experiences as a result the trip. Although some experiences in "Summer of Change" are based in reality, the novella is fiction and the characters are created and not meant to describe actual people.

Boating, Fishing and Hunting in Newfoundland and Labrador, Canada 1965 - 66

This book presents studies on Chinese intellectuals in Southeast Asia and how they understand China and Chineseness in the 21st century. It posits, through analyses of works and oral histories of a number of Chinese scholars in the region, that the dominant but distinctive approaches adopted by them are those that are rooted in humanism and pragmatism. In doing so, the book explores the significant population, local conditions and strategy of survival among the Southeast Asian Chinese as factors that influence their views and perspectives. Studies presented in the book simultaneously implicate subjectivity, where authors and their readers position themselves among ethnic, national, and civilizational identities. It highlights that while national-level identity necessarily involves dangerous self-interrogation and, at times, politics that is often suppressive and confrontational, intellectual writings on China that stick to the ethnic and civilizational levels provide more sensible exits. With that, the book then goes on to make the argument that in Southeast Asian Chinese studies, the humanities usually prevail over the social sciences at these two alternative levels. Lastly, the book also shows how the humanities can be instrumental to Southeast Asian Chinese scholars' choice of identity strategy which makes pragmatism an important theme. The book will be of interest to students and researchers involved in Southeast Asian and Chinese studies.

Mind Power

A systematic historical survey of Chinese thought is followed by an investigation of the historical-metaphysical questions of modern technology, asking how Chinese thought might contribute to a renewed questioning of globalized technics. Heidegger's critique of modern technology and its relation to metaphysics has been widely accepted in the East. Yet the conception that there is only one—originally Greek—type of technics has been an obstacle to any original critical thinking of technology in modern Chinese thought. Yuk Hui argues for the urgency of imagining a specifically Chinese philosophy of technology capable of responding to Heidegger's challenge, while problematizing the affirmation of technics and technologies as anthropologically universal. This investigation of the historical-metaphysical question of technology, drawing on Lyotard, Simondon, and Stiegler, and introducing a history of modern Eastern philosophical thinking largely unknown to Western readers, including philosophers such as Feng Youlan, Mou Zongsan, and Keiji Nishitani, sheds new light on the obscurity of the question of technology in China. Why was technics never thematized in Chinese thought? Why has time never been a real question for Chinese philosophy? How was the traditional concept of Qi transformed in its relation to Dao as China welcomed technological modernity and westernization? In *The Question Concerning Technology in China*, a systematic historical survey of the major concepts of traditional Chinese thinking is followed by a startlingly original investigation of these questions, in order to ask how Chinese thought might today contribute to a renewed, cosmotechnical questioning of globalized technics.

Means to an end

This story follows the personal struggle of Mia Hazlett and her two daughters as they embark on the unknown journey of faith and hope. The most endearing part of this entire story is that it has no end. It's written from the perspective of someone in the midst of life's most pressing circumstances: homelessness, marital separation, unemployment, and absolutely defines faith and hope. There are many reflective books of trials, which utterly chronicle a biographer's victorious testimonial, but not *Going Through It*. Instead this book takes you through the struggle and leaves you hoping, praying, and cheering for this family. It is a must read. "If you have ever been unemployed or gone through a divorce or lost your home or all of the above you will relate to this. This is the most honest account of what it feels like to go through tough times I have ever read. If you happen to be going through it right now it will give you hope to keep pushing forward. It's a quick read that will do your heart good." - Jennifer Texada

"The Mongol conquest of north China between 1211 and 1234 inflicted terrible wartime destruction, wiping out more than one-third of the population and dismantling the existing social order. In the *Wake of the Mongols* recounts the riveting story of how northern Chinese men and women adapted to these trying circumstances and interacted with their alien Mongol conquerors to create a drastically new social order. To construct this story, the book uses a previously

unknown source of inscriptions recorded on stone tablets. Jinping Wang explores a north China where Mongol patrons, Daoist priests, Buddhist monks, and sometimes single women—rather than Confucian gentry—exercised power and shaped events, a portrait that upends the conventional view of imperial Chinese society. Setting the stage by portraying the late Jin and closing by tracing the Mongol period's legacy during the Ming dynasty, she delineates the changing social dynamics over four centuries in the northern province of Shanxi, still a poorly understood region."

Scott Starkey and his wife Jennifer were determined after marrying that their household should never grow beyond the two of them - and however many dogs and cats occupied the premises at the time - when, in 2004, a chance encounter with a television program called "China's Lost Girls" set in motion a series of events that eventually led them to China and a thirteen month old little girl - their precious daughter Hope - in August, 2010. "You've Come a Long Way, Baby: A China Adoption Story" is a poignant, heartfelt, and frequently humorous chronicle of one couple's emotional adoption journey, including the decision to adopt, persistence through years of waiting, an anxiety filled two-week "adventure" in China where they met their little girl for the first time, and the challenges faced along the way. More importantly, it's a unique look at family, and what it really means to make one.

You've Come a Long Way Baby

Teenaged Sally Hemings, mixed-race slave and sister-in-law to widower Thomas Jefferson, captured his heart while serving his daughters in Paris where he was U.S. Minister. It was there a 38-year relationship began. The historical novel, *Sally of Monticello: Founding Mother*, by Jefferson lecturer N.M. Ledgin, portrays a bright, assertive woman. She resolved his “inner conflict,” according to historian Winthrop D. Jordan, by ridding him of “high tension concerning women and Negroes.” Ledgin based the novel's timeline on Jefferson's precise recordkeeping and collection of letters. Controversy over the affair and over recent DNA findings continues to fuel books and articles. Sally decided voluntarily to return with Jefferson from slavery-free France to Virginia. They had several children who went free, and they left a mixed-race legacy now woven into the fabric of the nation. This novel is an illuminating take on history. It is filled with emotion and adventure in the voice of a self-educated, sacrificing woman, whose passionate love and devotion helped guide one of our founding fathers.

The Tao Te Ching is fundamental to the Taoist school of Chinese philosophy and strongly influenced other schools, such as Legalism and Neo-Confucianism. This ancient book is also central in Chinese religion, not only for Taoism but Chinese Buddhism, which when first introduced into China was largely interpreted through the use of Taoist words and concepts. Many Chinese artists, including poets, painters, calligraphers, and even gardeners have used the Tao Te Ching as a source of inspiration. Its influence has also spread widely outside East Asia, aided by hundreds of translations into Western languages.
