### Macroeconomics

Now updated to include new chapters dedicated to the Global Economic Crisis. The most exciting new text in a generation, Chad Jones's Macroeconomics will change the way intermediate macroeconomics courses are taught. It is the first and only undergraduate text to present the Romer model of Endogenous Technological Change, which is integral to the way economists study growth theory today. Other texts stop at the Solow model, an approach first formulated in the 1950s. Jones presents the Romer model at an appropriate level for undergraduates. The text is written in an engaging, conversational style that makes students feel as though they are sitting in on one of Professor Jones's lectures. When introducing new material, he presents it in a careful, patient manner and follows the discussion with case studies and worked examples. Each chapter includes two complete worked examples that walk students step-by-step through the material covered in that chapter. In addition, this is the first text in the intermediate macroeconomics market to be fully integrated with an online homework management system. The easy-to-use SmartWork homework management system offers extensive answer feedback as students work through a problem. [Click here to find out more](#)

## **Instructors Manual**

The Sayre & Morris texts have been written for first-year economic principles courses offered in colleges and universities. In writing this text, the authors have attempted to stay focused on four guiding principles: 1. Achieve a well-written text by writing as clearly as possible, to avoid unnecessary jargon, to speak directly to the student, and avoid unnecessary abstraction and repetition. 2. Provide a focused emphasis on Student Learning. Students learn economics by doing economics. Review questions and self-test questions are positioned throughout each chapter to achieve this end along with a comprehensive and integrated student Study Guide. 3. Avoid an encyclopedic text by focusing on important material. The authors have refined the coverage in many chapters with a view to increasing readability and student performance. Review exercises, found at the end of chapter sections, have been rewritten to focus on the core objectives. In addition, the integrated Study Guide has been reorganized into three major sections

## **Microeconomics, Second Canadian Edition**

Written specifically for MBA students, this Second Edition of *MANAGING IN A GLOBAL ECONOMY: DEMYSTIFYING INTERNATIONAL MACROECONOMICS* presents macroeconomics in the context of models for decision-making and offers a strategic business focus. With business applications, concrete business examples, and an approach to macroeconomic theory via markets, Marthinsen demonstrates how macroeconomics can help leaders make better business decisions. The book helps students grasp practical big picture concepts, nurtures an understanding of what causes macroeconomic variables to change, and relates these changes to issues confronting managers. Marthinsen integrates the three major macroeconomic sectors (the real goods market, real loanable funds market, and foreign exchange market) in a user-friendly way. Liberating readers from dry, overly complex macroeconomic models, Marthinsen uses theory only as a means to an end for practical understanding and includes a minimum of math. Real world business examples show how economic shocks, such as monetary and fiscal policies or shifts in international capital flows, affect management decisions. Keeping readers visually engaged with strategic use of figures, tables, charts, and illustrative exhibits, *MANAGING IN A GLOBAL ECONOMY* emphasizes the interaction among markets and equips MBAs with a macroeconomic perspective that will last (and be used) for years.
