Now a #1 New York Times Bestseller. Human beings have never had it better than we have it now in the West. So why are we on the verge of throwing it all away? In 2016, New York Times bestselling author Ben Shapiro spoke at the University of California-Berkeley. Hundreds of police officers were required to protect his speech. What was so frightening about Shapiro? He came to argue that Western civilization is in the midst of a crisis of purpose and ideas; that we have let grievances replace our sense of community and political expediency limit our individual rights; that we are teaching our kids that their emotions matter more than rational debate; and that the only meaning in life is arbitrary and subjective. As a society, we are forgetting that almost everything great that has ever happened in history happened because of people who believed in both Judeo-Christian values and in the Greek-born power of reason. In *The Right Side of History*, Shapiro sprints through more than 3,500 years, dozens of philosophers, and the thicket of modern politics to show how our freedoms are built upon the twin notions that every human being is made in God's image and that human beings were created with reason capable of exploring God's world. We can thank these values for the birth of science, the dream of progress, human rights, prosperity, peace, and artistic beauty. Jerusalem and Athens built America, ended slavery, defeated the Nazis and the Communists, lifted billions from poverty, and gave billions more spiritual purpose. Jerusalem and Athens built America, ended slavery, defeated the Nazis and the Communists, lifted billions from poverty, and gave billions more spiritual purpose. Yet we are in the process of abandoning Judeo-Christian values and Greek natural law, watching our civilization

collapse into age-old tribalism, individualistic hedonism, and moral subjectivism. We believe we can satisfy ourselves with intersectionality, scientific materialism, progressive politics, authoritarian governance, or nationalistic solidarity. We can't. The West is special, and in *The Right Side of History*, Ben Shapiro bravely explains how we have lost sight of the moral purpose that drives each of us to be better, the sacred duty to work together for the greater good,.

MANAGEMENT, 12E includes several innovative pedagogical features to help students understand their management capabilities and learn what it's like to manage in an organization today. Each of the 19 chapters begins with an opening questionnaire that engages the reader's interest, directly connects to the topic of the chapter, and enables students to see how they respond to situations and challenges that real-life managers typically face. A New Manager Self-Test in each chapter provides students with further insight into how they would function in the real world of management. The Remember This bullet-point summaries at the end of each major chapter section give students a snapshot of the key points and concepts covered in that section. The end-of-chapter questions have been carefully revised to encourage critical thinking and application of chapter concepts, and Small Group Breakout exercises give students the opportunity to apply concepts while building teamwork skills. Ethical dilemmas, all-new end-of-chapter cases, and a fully updated set of On the Job video cases help students sharpen their diagnostic skills for management problem solving. The chapter sequence in MANAGEMENT is organized around the management functions of planning, organizing, leading, and controlling. These four functions effectively encompass management research and the characteristics of the manager's job. Contemporary Strategy Analysis and Cases

Modern Management in Canada : Diversity, Quality, Ethics, and the Global Environment

Organizations have developed a variety of strategies for dealing with the intersection of societal needs, the natural environment, and corresponding business imperatives. At one end of the continuum are organizations that do not acknowledge any responsibility to society and the environment. And on the other end of the continuum are those organizations that view their operations as having a significant impact as well as reliance on society at the economic, social, and ecological levels. This sourcebook presents current knowledge related to what has become known as "corporate social responsibility" (CSR). Ongoing research reveals that a variety of strategies, alliances and partnerships, and approaches are being used around the globe to respond to issues of CSR. The aspirations of many corporations to contribute to a better world is great, but translating that aspiration into reality remains a challenge for organizations the world over.

"'Diversity' is a crucial concept describing the recent shift in minority studies from its focus on social stratification and inequality. In recent times, new theories and concepts that suggest 'positive' meanings are emerging. The focus is on empirically analyzing the mechanisms that produce alienation and discrimination as well as normatively exploring the social conditions that connect minority groups and social diversity to creativity and dynamism. Chapters in this volume delve into the status of women in Japan in relation to marriage and single motherhood, gendered roles and norms in the early modern period, the Japanese American reparation movement, Korean and Muslim ethnic minorities in Japan and the United Kingdom, mutual aid in Okinawa, and the role of NGOs and NPOs in fostering social diversity. This insightful work suggests that in order to broaden our understanding of minorities we should examine the ways in which these groups promote the enrichment of society."--Publisher's description.
