### **Suicide prevention**

A material analysis of the sign which deepens Marx's critique of political economy for spectacular times. What if the problems of modern society don't come from production, but rather consumption and the system of cultural signs? In this classic work from the defining intellectual of the postmodern, Jean Baudrillard, *For a Critique of the Political Economy of the Sign* takes Marx's critique of political economy

and its analysis of the commodity form as the starting point for an analysis of signs and their meaning in modern society. Influenced by Lefebvre's critique of everyday life, Barthes's semiology, and Situationism, Baudrillard analyses how objects are encoded within the system of signs and meanings that constitute contemporary media and consumer societies. Combining semiological studies and sociology of the consumer society, *For a Critique of the Political Economy of the Sign* contains Baudrillard's most extensive engagement with Marxism and shows him at a critical juncture for the development of his thought.

### **The Consular Service of the United States**

Excerpt from The Consular Service of the United States: Its History and Activities Up to the middle of the last century the chief functions of consular services in Christian nations were the protection of citizens living or traveling abroad, and the superintendence of the maritime interests of the home countries. Within the last fifty years a development has taken place which has completely altered the comparative importance of the duties to be performed. Commercial nations have more and more encouraged their trade interests to look to the consuls for active aid in protecting and extending foreign commerce. The office of the consul has consequently assumed more of a public character than it formerly possessed, the national interests have come to occupy a larger share of official

attention, and, with the development of greater public security, the protection of fellow-countrymen has become a less frequent, if not a less important duty. The object of the present monograph is to sketch the history of the consular service of the United States and to point out especially the development of its relations to trade. It also aims to indicate the service actually rendered at the present time, the limits of the aid which consuls can lend to commerce, and the defects in our present consular organization. A study of the systems in use in the chief European commercial nations is also included to show what has been accomplished there in making the consuls a commercial body and the means adopted for that purpose. For courtesies extended during the preparation of the monograph, I am especially indebted to the officials of the State Department at Washington, and to the directors of the Library of the Reichstag, Berlin. ## **The Air Pilot's Manual**

"The book throws much new light on the final, critical years of the 'Mission Era' of northern Florida. . . . [It] fills in a most interesting and important aspect of this story; namely, the difficult life led by the Franciscans, who established their simple, crude outposts among a most inhospitable people. The whole picture of the missionary's life--his simple mission buildings and the paucity and crudeness of his material blessings--is brought out by these studies. How different a picture than the one so many of us have of the Spanish missionary following in the wake of conquering armies. . . . An important contribution to the history of the Spanish period in America!"--American Antiquity

"An historical-archaeological case study of two Spanish missions and of the area now comprising Leon and Jefferson counties. The authors reaffirm the fact that missions in the region were destroyed in the early 1700s and that they were not largely revived thereafter; and they properly conclude, it seems, that their documents and excavations furnish information on the missions during their heyday."--Florida Historical Quarterly

In the early 17th century, 150 years before Spanish missions were established in California, a chain of missions reached westward from St. Augustine across northern Florida. Today nothing exists of those Florida Franciscan outposts. Our knowledge of them comes only from archival research and information gleaned from archaeological excavations. Florida's missions came to a fiery end in the first few years of the 18th century, victims of devastating raids by Carolinian militia and their Indian

allies. The Apalachee and other mission Indians were slain, some by being burned at the stake or flayed alive. Others were taken back to Charleston as slaves and still others fled. Here They Once Stood, first published in 1951 and a classic example of collaborative research, presents the first-hand accounts describing the horrific fate of the missions. It also offers archaeological reports further documenting the missions and the lives of the native peoples who lived and died as Christians under Spanish rule. Mark F. Boyd, a well-known malariologist, was historian for the Florida Park Service and, from 1946 to 1949, president of the Florida Historical Society. Hale G. Smith, also an employee of the Florida Park Service, was chairman of the Department of Anthropology at Florida State University. John W. Griffin, the author of pathbreaking writing on the early years of historical archaeology in the Southeast, was the first professional archaeologist employed in the state of Florida, in 1946. In 1993 he received a posthumous Award of Merit from the Society for Historical Archaeology.

True religion confronts earth with heaven and brings eternity to bear upon time. The messenger of Christ, though he speaks from God, must also, as the Quakers used to say, "speak to the condition" of his hearers; otherwise he will speak a language known only to himself. His message must be not only timeless but timely. He must speak to his own generation. The message of this book does not grow out of these times but it is appropriate to them. It is called forth by a condition which has existed in the Church for some years and is steadily growing worse. I refer to the loss of the concept of majesty from the popular religious mind. The Church has surrendered her once lofty concept of God and has substituted for it one so low, so ignoble, as to be utterly unworthy of thinking, worshipping men. This she has done not deliberately, but little by little and without her knowledge; and her very unawareness only makes her situation all the more tragic.

Poetry. Latino/Latina Studies. LGBT Studies. "Like Whitman, Quesada is a poet of motion—journeying to the center of the US, where the traditions and innovations of first-generation Americans traverse the meditative starbursts of hills; ford rivers; cross prairies; and seek out 'the alpenglow of tomorrow and tomorrow.' From Costa Rica to Los Angeles and across the continent, Quesada's poems chronicle one family's history: from the courtship of his parents to their separation, from his childhood struggles to awakening desire from his mother's lottery winnings to his own personal losses, Ruben Quesada carries us toward 'that seam in space' where dream and experience intersect. This isn't the story of what it means to come to this country. It's the story of what it means to belong here"—D. A. Powell.

## **The Gymnastic Progression**

In a provocative analysis written during the unfolding drama of 1992, Baudrillard draws on his concepts of simulation and the hyperreal to argue that the Gulf War did not take place but was a carefully scripted

media event -- a "virtual" war. Patton's introduction argues that Baudrillard, more than any other critic of the Gulf War, correctly identified the stakes involved in the gestation of the New World Order.

Jean Baudrillard's last book was about America. His new one is about cats, Foucault, Alfa Romeas, leukemia, Catholicism, the Berlin Wall, mattresses, Laurent Fabius, Jean-Paul II, roses, Antarctica, Lech Walesa, mud wrestling, Zinoviev, porn films, snow, feminism, Rio, Jacques Lacan, Stevie Wonder, Palermo, DNA and terrorism. "Cool Memories is the other side of America, the disillusioned side, presented in the form of a diary, though not in the classical sense. I'm trying to grasp a world in all its silences and its brutality. Can you grasp a world when you're no longer tied to it by some kind of ideological enthusiasm, or by traditional passions? Can things "tell" themselves through stories and fragments? These are some of the questions posed in a book which may seem melancholic. But then I think almost every diary is melancholic. Melancholy is in the very state of things."
