First published in 1973, Gravitation is a landmark graduate-level textbook that presents Einstein's general theory of

relativity and offers a rigorous, full-year course on the physics of gravitation. Upon publication, Science called it “a pedagogic masterpiece,” and it has since become a classic, considered essential reading for every serious student and researcher in the field of relativity. This authoritative text has shaped the research of generations of physicists and astronomers, and the book continues to influence the way experts think about the subject. With an emphasis on geometric interpretation, this masterful and comprehensive book introduces the theory of relativity; describes physical applications, from stars to black holes and gravitational waves; and portrays the field’s frontiers. The book also offers a unique, alternating, two-track pathway through the subject. Material focusing on basic physical ideas is designated as Track 1 and formulates an appropriate one-semester graduate-level course. The remaining Track 2 material provides a wealth of advanced topics instructors can draw on for a two-semester course, with Track 1 sections serving as prerequisites. This must-have reference for students and scholars of relativity includes a new preface by David Kaiser, reflecting on the history of the book’s publication and reception, and a new introduction by Charles Misner and Kip Thorne, discussing exciting developments in the field since the book’s original publication. The book teaches students to: Grasp the laws of physics in flat and curved spacetime Predict orders of magnitude Calculate using the principal tools of modern geometry Understand Einstein's geometric framework for physics Explore applications, including neutron stars, Schwarzschild and Kerr black holes, gravitational collapse, gravitational waves, cosmology, and so much more

Set in Aligarh in the early 1960s, after the dust of Partition has ostensibly settled, Topi Shukla is an intriguing story of two friends-one Hindu and the other Muslim. Through the characters of people like Topi and Iffan, the novel looks at the lives of ordinary people trying to survive in a society that insists on a brutal conformity of behaviour. It is about individuals whose spirits are paralysed because they cannot conform, and about history's inability to teach mankind any worthwhile lessons. Language plays an important part in this narrative, operating almost as a character in its own right. Topi, as a Hindi bull in the Urdu china shop, invokes the historical stand-off between the two languages. The novel also explores the culture and psyche of Uttar Pradesh with its very Muslim Aligarh, its very Hindu Benares, and their exotic confluence in Lucknow. Although it is set in the India of the 1960s, the communal tensions and issues portrayed in the novel make it just as relevant to the troubled times we face today. This fascinating novel will be of tremendous interest to the general reader, as well as to students of literature in translation, partition fiction, and social history. The novel's engagement with intertextuality and metafiction will add to its interest for readers keen on literary theory.
