After the earth was created, the first creatures to inhabit it were magical. From the tiny Fairies with their unique magical abilities to the mighty Dragons that soared through the sky. They were all looked after by a race of creatures called Celtlandians. The Celtlandians were charged with guiding the magical creatures and insuring that each race thrived and that the planet remained peaceful. That was until the Great Creator decided to introduce a new race of creatures to the planet. This race was to be called Humans. The Celtlandians were told by the Great Creator not to interfere with the progress of the Humans. Things remained peaceful for a time. Then the Humans started to multiply rapidly. They also became aggressive toward the magical creatures killing many of them. The magical creatures were peaceful and their numbers started to dwindle. The Celtlandians were powerless. They had great magical abilities and could destroy the Human plague but were told by their creator not to interfere. As the magical creatures' numbers got smaller, the Humans still multiplied as they ravaged the land. When it seemed like the Great Creator had abandoned them the Celtlandians decided to take matters into their own hands. They took as many of the young magical creatures as they could and set out across the ocean. They looked to find a land where the Humans had never inhabited. They had to insure the safety of the

small numbers of creatures that they brought with them. They found a large island that they would call their new home. This realm would be called Vahlaron. The Celtlandians cast a charm over the island so that it could not be seen by any outside creatures. Vahlaron remained peaceful and safe for many generations until one day a man and his wife accidentally crashed on the shores of this enchanted land. The Celtlandians knew that this would eventually happen and now they had a decision to make. What would they do with the Humans? Would they allow them to stay knowing that others may follow? Would they go against the Great Creator's wishes and destroy them and any others that may arrive? They would do whatever it took to insure that magic survived. Vahlaron was a land created for magical creatures. This was their new home and they would not allow the Humans to ruin it. They would not do to Vahlaron what they had done to the rest of the planet.

Now a New York Times bestseller! There is a Threat Lurking Online with the Power to Destroy Your Finances, Steal Your Personal Data, and Endanger Your Life. In *Spam Nation*, investigative journalist and cybersecurity expert Brian Krebs unmask the criminal masterminds driving some of the biggest spam and hacker operations targeting Americans and their bank accounts. Tracing the rise, fall, and alarming resurrection of the digital mafia behind the two largest spam pharmacies- and countless viruses, phishing, and spyware attacks-he delivers the first definitive narrative of the global spam problem and its threat to consumers everywhere. Blending cutting-edge research, investigative reporting, and firsthand interviews, this terrifying true story reveals how we unwittingly invite these digital thieves into our lives every day. From unassuming computer programmers right next door to digital mobsters like "Cosma"-who unleashed a massive malware attack that has stolen thousands of Americans' logins and passwords-Krebs uncovers the shocking lengths to which these people will go to profit from our data and our wallets. Not only are hundreds of thousands of Americans exposing themselves to fraud and dangerously toxic products from rogue online pharmacies, but even those who never open junk messages are at risk. As Krebs notes, spammers can-and do-hack into accounts through these emails, harvest personal information like usernames and passwords, and sell them on the digital black market. The fallout from this global epidemic doesn't just cost consumers and companies billions, it costs lives too. Fast-paced and utterly gripping, *Spam Nation* ultimately proposes concrete solutions for protecting ourselves online and stemming this tidal wave of cybercrime-before it's too late. "Krebs's talent for exposing the weaknesses in online security has earned him respect in the IT business and loathing among cybercriminals His track record of scoopshas helped him become the rare blogger who supports himself on the strength of his reputation for hard-nosed reporting." -Bloomberg Businessweek

Vital Signs

It is an age of hurry and worry. Fortunes are quickly made and freely spent. Nearly all busy, hard-worked Americans have an intuitive sense of the need that exists for at least one period of rest and relaxation during each year, and all—or nearly all—are willing to pay liberally, too liberally in fact, for anything that conduces to rest, recreation and sport. I am sorry to say that we mostly get swindled. To the man of millions it makes little difference. I do not write for him, and can do him little good. But there are hundreds of thousands of practical, useful men, many of them far from being rich; mechanics, artists, writers, merchants, clerks, business men—workers, so to speak—who sorely need and well deserve a season of rest and relaxation at least once a year. To these, and for these, I write. (George Washington Sears, Chapter I)

Had another good night; rose soon after seven, found ourselves within 3 miles of the coast of Ireland with Cantyre on our right. Heard the Captain speak to a vessel going to Liverpool telling them to report us all well. Breakfasted very well but soon returned upon deck as we expected soon to lose sight of land. A pretty stiff gale

about ten which threw the vessel a good deal on one side. Continued in sight of Ireland till past five when the land and we parted for some weeks. About this time I became qualmish and went to the stern to see if I could hasten the catastrophe by putting down my fingers; this did not avail, therefore I descended to open my store of camomile and black currants; no sooner was this accomplished than I became sick three or four times. I then undressed and rolled into my berth and slept 3 or 4 hours. The ship rolled very much and the water I heard splashing by; it seemed sometimes as if actually going over. Two interesting circumstances occurred last night. I dreamed that my father was actually alive and in his better way.

Ballistic Materials and Penetration Mechanics deals with ballistically protective materials and penetration mechanics. The book discusses historical and practical considerations of ballistic protection, including metallic armor, as well as ballistic testing methodology, the ability of a protective material to stop or slow down a particular projectile, and the theoretical aspects of penetration mechanics. It also highlights the importance of stress wave analysis in the penetration and spalling phenomena. Organized into 12 chapters, this volume begins with an overview of the history of the armor and the modern helmet. It proceeds with a discussion of variations in ballistic test methods, errors in test methods, and the importance of the hardness and geometry of both the target and the projectile. The next chapters focus on the importance of fibrous armor, materials that are visually transparent and resistant to penetration by high-energy projectiles and fragments, and transparent armor and ceramic composite armor. The reader is also introduced to materials used in the design of metallic armor, the role of stress waves in the penetration problem, and the use of computer simulation to analyze ballistic impact experiments. The book looks at numerical techniques for modeling hypervelocity impact and concludes with a chapter on the penetration mechanics of textile structures. This book is a valuable resource for scientists working at government, industrial, and university laboratories, as well as law enforcement officers and others who want information on materials that provide the best protection against damage from impacts, explosions, and bullets.

Loan sharks may conjure up an image of tough guys in fedoras looking to make a profit off of desperate people in dire financial straits, but in reality, lenders who advance small sums of cash at high interest rates until payday existed long before organized crime entered the trade. Today the businesses that fill this niche in the credit market prefer the name 'payday lenders' rather than loan sharks, but most large cities are still a hotbed of usurious lending, and the landscapes are dotted with their inviting and brightly colored storefronts. Despite their more respectable name, these predatory lenders have endured through regulation, prohibition, and the rise and fall of the mob since the late 1800s. In this intriguing and accessible book, Mayer aptly assesses the consequences of high-interest lending--both for the people who borrow at such steep prices and for society as a whole. He argues that although some consumers gain from borrowing at high rates, payday lending in its modern form consistently traps many of the wage earners who pawn their postdated checks, leaving them worse off than they were before. Because payday lending regulations vary widely throughout the country, Mayer chose to focus his story on Chicago, a city that serves as a fine representative of the legacy of loan sharking. Quick Cash will engage policy analysts, economists, and regional historians, as well as general readers interested in the fascinating story behind these unscrupulous lending operations that feed off America's current tough economic times.

Doctor Jones' Picnic

After sixty years of marriage and five daughters, Lynn "Lovey" White knows that all of us, from time to time, need to use our little white lies. Her granddaughter, Annabelle, on the other hand, is as truthful as they come. She always does the right thing--that is, until she dumps her hedge fund manager fiance and marries a musician she has known for three days. After all, her grandparents, who fell in love at first sight, have shared a lifetime of happiness, even through her grandfather's declining health. But when Annabelle's world starts to collapse around her, she discovers that nothing about her picture-perfect family is as it seems. And Lovey has to decide whether one more lie will make or break the ones she loves . . .

Last of the Far Gods

Organizations have information technology (IT) plans in place, such as contingency and computer security incident response plans, so that they can respond to and manage adverse situations involving IT. These plans should be maintained in a state of readiness, which should include having personnel trained to fulfill their roles and responsibilities within a plan, having plans exercised to validate their content, and having systems and system components tested to ensure their operability in an operational environment specified in a plan. These three types of events can be carried out efficiently and effectively through the development and implementation of a test, training, and exercise (TT&E) program. Organizations should consider having such a program in place because tests, training, and

exercises are so closely related. For example, exercises and tests offer different ways of identifying deficiencies in IT plans, procedures, and training.

Aunt Jane's Nieces in the Red Cross

Throughout my life journey, I have a lot of things to be thankful for. The many blessings that I have received from the God of my understanding has enabled me to put some of my thoughts in writing. This writing allowed me the avenues to create Life and Things. Life and Things comes from the gospels, history, rap, poetry, literature, religion and some things that my memory has forgotten about. It also shows me that through God, all things are possible. I never knew that I would see a Black man as our President- thank you President Obama. I never thought that I would have to fight for sobriety after fighting in the Vietnam War. Sometime to crawl after I learned to walk, sometimes to cry after a spell of laughter. I pray that whoever has the opportunity to read about my life, and to reflect on their lives. It will give us hope, strength and courage to tackle some of our weaknesses in our lives. I can only thank you for reading Life and Things, and pray that I give wisdom to write Life and Things II Thank you, Phillip A. Daye "Daylight" During the course of this day, may God enable me to shine a little light on you!

A Journey to America in 1834

Richard Caswell emerged during the Revolution as a vital leader of the Patriot cause. Though he was a loyal British subject who fought against the backcountry Regulator rebellion, he embraced America's revolutionary fervor. He represented North Carolina at the Continental Congress and bravely commanded troops at the Battle of Moore's Creek Bridge. He supervised the writing of North Carolina's constitution and was elected the Old North State's first governor. After the Revolution, he again served as governor and became a leading spokesman for the ratification of the United States Constitution. Author and historian Joe Mobley chronicles the life of a man devoted to the public service of North Carolina and a new nation.

Shine on You Crazy Diamond

Asheville is a small city nestled in the mountains of western North Carolina. Just outside the city's River Arts District sits a large auction house, owned and run by kind, family man Kane Landon. One day, on his way home from work, something happened to Kane. What would be considered a trivial event to most people, changed him dramatically. It set him on a deadly course, threatening his family and everyone else in the small town. Walk in Kane's shadow as he spirals into a darkness from which he fears he cannot return. Live vicariously through him as the demon that dwells inside of him emerges; a demon that thrives on the pain and suffering of others and leaves the streets of the city stained crimson from the blood of its citizens. Watch with Kane's eyes as his victims shudder in fear when they encounter the imposing man. Feel his pain as he wrestles with the monster inside. Tormented, he tries to make sense of what is happening to him, all the while knowing that death is all he has left to offer the world. Finally, Kane must make the most difficult decision of his life. Will he keep living in two worlds? One world with the family that he would give his life for, and the other as a sadistic serial killer. Or will he completely free the monster inside, allowing the demon to murder at will, giving the beast permission to fill its own private cemetery.
