PCMag.com is a leading authority on technology, delivering Labs-based, independent reviews of the latest products and services. Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology.

Landscape Photography

Discover the most fascinating and in-depth meanings behind the symbols used by the Masons, occultists, witches, New Agers, Satanists, and others. This book uncovers the hidden meanings behind the symbols that we see around us every day. In this well-documented book you will see hundreds of illustrations along with their explanations. You will find many organizational logos, hand signals, tarot cards, zodiac signs, talismans, amulets, and humanist symbols, as well as the meaning of the peace symbol, hexagram, pentagram, yin/yang, circle, all-seeing eye, caduceus, oroborus, ankh, triskele, and the triangle. Also revealed in this book are numerous Masonic and Eastern Star symbols such as the clasped hands, point within a circle, broken column, gavel, obelisk, pomegranate, and the cornucopia. Jeremiah 10:2-3 warns: "Learn not the way of the heathen, and be not dismayed at the signs of heaven; for the customs of the people are vain."

A how-to guide for capturing stunning photographs in nature Photographing nature poses unique challenges and demands that you have special skills and a working knowledge of how to work in—and with—nature. This Photo Workshop is a must-have how-to guide for shooting nature images in nearly any situation you might encounter. You'll learn which equipment is right in different settings and why it

should be used, how to get an amazing photo of a fast-moving animal, and how to handle a myriad of tricky weather scenarios. This book covers composition, exposure, fill-flash, special creative techniques, and more. Plus, assignments at the end of each chapter sharpen your skills to for taking unique, artistic nature photographs. Shows you what equipment to use in different settings and why to use it Offers essential advice for photographing a fast-moving animal and dealing with weather obstacles Provides a clear understanding of the basic fundamentals of photography Addresses composition, exposure, fill-flash, creative techniques, and more Shares Photoshop tips for sharpening and improving photos you've already taken Packed with inspirational color photos throughout, this workshop guide encourages you to improve your technique for taking nature photographs.

Photomovement

Portraying the varied and cunning ways flowers lure their pollinators at the appropriate time, *Pollination Power* combines art with science. By using new photographic techniques, hidden patterns in the flowers are revealed to the human eye. Featuring both temperate and tropical flora, and some popular garden flowers as well as endangered species, *Pollination Power* will appeal to everyone with a passion for plants, whether they are botanists, gardeners, or naturalists, and the psychedelic UV images will also appeal to art lovers. "*Pollination Power*" is a visual tribute to the birds and the bees, and the essential evolutionary dance of pollination. The health of ecological systems around the world and their economic wellbeing too, when it comes to agricultural crops. depends fundamentally on the relationship of plants to their pollinators. This book brings readers face to face with beetles, flies, hoverflies, and bee flies, wasps, and hornets to moths and butterflies as well as geckos, birds, and mammals as they approach their floral target. Deploying state of the art photographic techniques, and with the gardens of Kew as her inspiration, she decodes the science of pollination, often unseen to the hidden eye. Featuring both temperate and tropical flora, and some popular garden flowers as well as endangered species, "*Pollination Power* "will appeal to everyone with a passion for plants-- botanists, gardeners, and naturalists alike."

PC Mag

Comprehensive, in-depth coverage from leading experts in the field A historic building is a fragile resource that requires the finest care. Maintenance and rehabilitation of walls and facades call for a thorough understanding of the forces that cause deterioration, knowledge of the properties of building materials, up-to-date inspection tools and methods, and a solid command of renovation and repair techniques. In this complete reference manual, recognized experts provide state-of-the-art information and methodologies for the inspection, maintenance, and restoration of historic buildings of virtually every period, style, and material. Each chapter opens with a general discussion of the facade material and the ways in which structural and decorative elements are vulnerable to an array of environmental forces. After a detailed investigation of tools and techniques for inspection, the text explores planning issues for the restoration or replacement of facade components. Special features include: * Separate chapters on each major type of building material--stone masonry, brick masonry, terra-cotta masonry, cast stone, mortar, concrete, cast iron, sheet metal, and wood * An entire chapter on

caulks and sealants * 35 original line drawings and 43 black and white photos that help visualize technical information * Selected success stories from preservation projects across the United States For architects, building contractors, and owners of historic buildings, *Historic Building Facades* clarifies procedures, helps identify sources of deterioration, and offers solutions to even the most difficult maintenance and rehabilitation problems. It is also an excellent reference for building preservationists, architectural historians, and students of building design and preservation.

CW and Doppler Radar

A guide to landscape photography using a DSLR camera covers such topics as light, composition, perspective, lenses, black-and-white images, and HDR.

Noddy Magic Picture Painting Book

Most people have prayed for something or someone in earnest, seeking God's will, only to be left confused by God's response. Sometimes we ask, "Why would a good God allow bad things to happen to good people?" In *Amazed and Confused*, Heather Zempel tackles this question head-on by exploring the book of Habakkuk. When the prophet Habakkuk prayed that God would bring change to the backsliding nation of Israel, this issue came to the forefront. Habakkuk begged God for revival and that He would turn the hearts of faithless people back to Him. God's answer to Habakkuk was, "Take a look at the nations and watch what happens! You will be shocked and amazed" (1:5, The Voice). The vision God gave Habakkuk was one of warfare and exile. How do you respond when God answers your prayers in a way that seems out of line with his character and promises? *Amazed and Confused* proceeds systematically through the book of Habakkuk, exploring the prophet's prayer, God's response, and the prophet's journey from confusion to worship. This interactive Bible study is the perfect choice for those who are hurting and confused about God's responses to their prayers. Features include: Helpful guidance on a question without an easy answer Practical tools for studying the Minor Prophets Easy-to-understand, accessible language

Stags, Hens and Bunnies

Today is Monday, so this must be Zurich." For those who travel a lot, the world becomes a steel-and-concrete construct of interchangeable flight crews, hotel rooms, and check-in counters. In this jet-setting life, the most important thing is that the power adapter fits. For Jet Lag, award-winning photographer Chien-Chi Chang (*1961 in Taiwan) has created succinct black-and-white images of globalized disconnect. In these photographs, reality is less a touchstone than a distraction: the crucial space is "between." Planes and beds and flickering screens provide the only continuity, and there is little human warmth except the body heat of the passenger in the next seat and the sounds coming through the wall from the adjacent room. Chien-Chi Chang has been a member of Magnum Photos since 2001. His several series about alienation—in mental states, in marriage, in nationality—have been exhibited throughout the world, creating a sensation in 2001 and 2009 at the Venice Biennale.

Braxton Bragg

Photographer Dominic Greyer has spent the last twenty years roaming the British landscape in search of the country's most unusual placenames. He has an eye for quirky, rude and downright ridiculous name signs, and has photographed them all. But this is not merely a book of silly placenames - Dominic's exquisite, atmospheric photography, featuring the landscapes in which the signs sit, makes the images really special, and this book into a beautiful gift package. Placenames include the famous Twice Brewed (Northumberland), Fryup (North Yorkshire), Long Length (Kent) and Camptown (Borders). There will be a few rude street names too (Lady Gardens, Great Gays, Bell End and Giant's Ring, for example). The author runs a successful gift business featuring his photography on mugs, coasters, placemats, fridge magnets anything you'd want to see a photograph of a funny signpost on, really. This book makes the perfect gift for anyone who loves the quirky side of the country.

Howling at the Moon

A prophetic memoir by the activist who "articulated the intellectual foundations" (The New Yorker) of the civil rights and women's rights movements. First published posthumously in 1987, Pauli Murray's *Song in a Weary Throat* was critically lauded, winning the Robert F. Kennedy Book Award and the Lillian Smith Book Award among other distinctions. Yet Murray's name and extraordinary influence receded from view in the intervening years; now they are once again entering the public discourse. At last, with the republication of this "beautifully crafted" memoir, *Song in a Weary Throat* takes its rightful place among the great civil rights autobiographies of the twentieth century. In a voice that is energetic, wry, and direct, Murray tells of a childhood dramatically altered by the sudden loss of her

spirited, hard-working parents. Orphaned at age four, she was sent from Baltimore to segregated Durham, North Carolina, to live with her unflappable Aunt Pauline, who, while strict, was liberal-minded in accepting the tomboy Pauli as “my little boy-girl.” In fact, throughout her life, Murray would struggle with feelings of sexual “in-betweenness”—she tried unsuccessfully to get her doctors to give her testosterone—that today we would recognize as a transgendered identity. We then follow Murray north at the age of seventeen to New York City’s Hunter College, to her embrace of Gandhi’s Satyagraha—nonviolent resistance—and south again, where she experienced Jim Crow firsthand. An early Freedom Rider, she was arrested in 1940, fifteen years before Rosa Parks’ disobedience, for sitting in the whites-only section of a Virginia bus. Murray’s activism led to relationships with Thurgood Marshall and Eleanor Roosevelt—who respectfully referred to Murray as a “firebrand”—and propelled her to a Howard University law degree and a lifelong fight against “Jane Crow” sexism. We also read Betty Friedan’s enthusiastic response to Murray’s call for an NAACP for Women—the origins of NOW. Murray sets these thrilling high-water marks against the backdrop of uncertain finances, chronic fatigue, and tragic losses both private and public, as Patricia Bell-Scott’s engaging introduction brings to life. Now, more than thirty years after her death in 1985, Murray—poet, memoirist, lawyer, activist, and Episcopal priest—gains long-deserved recognition through a rediscovered memoir that serves as a “powerful witness” (Brittney Cooper) to a pivotal era in the American twentieth century.

Footwear Impression Evidence

Presenting the thoroughly revised, fully illustrated edition of *The Nikon Compendium*, updated by the technical editor of *Nikon Owner* magazine to include all the new Nikon cameras, lenses, and accessories. This is what Nikon enthusiasts have eagerly awaited: the most complete Nikon reference book ever. At almost double the length of the original, the guide describes virtually every Nikon camera ever produced, right up to the wide variety of popular digital models. It aids identification, offers user-friendly tips, explains what system fits with which camera, and discusses what limitations occur when equipment from one generation is married to items from another. Professional and amateur photographers, as well as enthusiasts, collectors, and retailers will want this on their bookshelves.

Solution Manual

The Manchester Physics Series General Editors: D. J. Sandiford; F. Mandl; A. C. Phillips Department of Physics and Astronomy, University of Manchester Properties of Matter B. H. Flowers and E. Mendoza Optics Second Edition F. G. Smith and J. H. Thomson Statistical Physics Second Edition E. Mandl Electromagnetism Second Edition I. S. Grant and W. R. Phillips Statistics R. J. Barlow Solid State Physics Second Edition J. R. Hook and H. E. Hall Quantum Mechanics F. Mandl Particle Physics Second Edition B. R. Martin and G. Shaw The Physics of Stars Second Edition A. C. Phillips Computing for Scientists R. J. Barlow and A. R. Barnett

Statistical Physics, Second Edition develops a unified treatment of statistical mechanics and thermodynamics, which emphasises the statistical nature of the laws of thermodynamics and the atomic nature of matter. Prominence is given to the Gibbs distribution, leading to a simple treatment of quantum statistics and of chemical reactions. Undergraduate students of physics and related sciences will find this a stimulating account of the basic physics and its applications. Only an elementary knowledge of kinetic theory and atomic physics, as well as the rudiments of quantum theory, are presupposed for an understanding of this book. Statistical Physics, Second Edition features: A fully integrated treatment of thermodynamics and statistical mechanics. A flow diagram allowing topics to be studied in different orders or omitted altogether. Optional "starred" and highlighted sections containing more advanced and specialised material for the more ambitious reader. Sets of problems at the end of each chapter to help student understanding. Hints for solving the problems are given in an Appendix.

Historic Building Faiž1/2ades

If you need help with tracking your monthly expenses or in keeping your budget in order, this two column ledger will make it easier for you since it is a simple tool to keep accurate bookkeeping records and it will surely help you work more efficiently, smarter and better at the office, home or school. This is the perfect ledger for you whether you run your own business, a farm, a corporate professional, head of a busy household, a business traveler or a busy student. Get yourself a copy now while supplies last!

Pollination Power

Popular Photography

Landscape photography is one of the most popular genres for amateur photographers. Mastering the genre, however, takes time: time to perfect exposure, color, composition, and--perhaps above all else--the ability to see and record the landscape in a way that will make your photographs stand above the rest. This guide delves into the world of 16 leading lights, each with their own unique take on how, where, and why the landscape should be recorded. Through probing interviews and beautifully reproduced images, the reader is given an insight into the artist's working practices, from equipment to techniques. Glorious color photographs sit beside atmospheric monochrome, the latest digital techniques rub shoulders with traditional film-based imaging, and conventional landscape mores are countered by experimental artworks, guaranteeing something to inspire every reader.

Chien-Chi Chang: Jet Lag

This volume emphasizes the involvement of all facets of biology in the analysis of environmentally controlled movement responses. This includes biophysics, biochemistry, molecular biology and as an integral part of any approach to a closer understanding, physiology. The initial euphoria about molecular biology as the final

solution for any problem has dwindled and the field agrees now that only the combined efforts of all facets of biology will at some day answer the question posed more than hundred years ago: "How can plants see?". One conclusion can be drawn from the current knowledge as summarized in this volume. The answer will most likely not be the same for all systems.

The British Journal of Photography

As a leading Confederate general, Braxton Bragg (1817-1876) earned a reputation for incompetence, for wantonly shooting his own soldiers, and for losing battles. This public image established him not only as a scapegoat for the South's military failures but also as the chief whipping boy of the Confederacy. The strongly negative opinions of Bragg's contemporaries have continued to color assessments of the general's military career and character by generations of historians. Rather than take these assessments at face value, Earl J. Hess's biography offers a much more balanced account of Bragg, the man and the officer. While Hess analyzes Bragg's many campaigns and battles, he also emphasizes how his contemporaries viewed his successes and failures and how these reactions affected Bragg both personally and professionally. The testimony and opinions of other members of the Confederate army--including Bragg's superiors, his fellow generals, and his subordinates--reveal how the general became a symbol for the larger military failures that undid the Confederacy. By connecting the general's personal life to his military career, Hess positions Bragg as a figure saddled with unwarranted infamy and humanizes him as a flawed yet misunderstood figure in Civil War history.

Piping Systems Manual

The essays in this volume explore the borderland between ecology and the arts. Nature is here read by a number of contributors as 'cultural', by others as an 'independent domain', or even as a powerful process of exchange 'between the human and the other-than-human'. The four parts of the volume reflect these different understandings of nature and performance. Informed by psychoanalysis and cultural materialism, contributors to the first part, 'Spectacle: Landscape and Subjectivity', look at ways in which particular social and scientific experiments, theatre and film productions and photography either reinforce or contest our ideas about nature and human-human or human-animal relations and identities. The second part, 'World: Hermeneutic Language and Social Ecology', investigates political protest, social practice art, acoustic ecology, dance theatre, family therapy and ritual in terms of social philosophy. Contributors to the third part, 'Environment: Immersiveness and Interactivity', explore architecture and sculpture, site-specific and mediatised dance and paratheatre through radical theories of urban and virtual space and time, or else phenomenological philosophy. The final part, 'Void: Death, Life and the Sublime', indicates the possibilities in dance, architecture and animal behaviour of a shift to an existential ontology in which nature has 'the capacity to perform itself'.

Nature Photography Photo Workshop

Reviewed and recognized as the most authoritative source in the field, this book

describes the methods used worldwide to recover and identify footwear impressions from the scene of a crime. In this new edition, everything, including the original twelve chapters, bibliography, appendix, etc., has been clarified, updated and expanded. This edition includes updated and new information on recovery procedures and materials such as lifting, photography and casting; chemical enhancement; updated information about footwear manufacturing; footwear sizing; and known impression techniques and materials. WHAT'S NEW IN THE SECOND EDITION: Besides updating and expanding the twelve original chapters, Footwear Impression Evidence: Detection, Recovery and Examination, Second Edition adds three new chapters: one chapter on barefoot evidence, which concerns impressions made by the naked or sock-clad foot or those which remain in abandoned or discarded footwear; another new chapter on several cases in which the footwear impression evidence was of primary importance in bringing about a conviction or confession; and finally, a new chapter on the footwear impression evidence in the O.J. Simpson criminal and civil cases.

Song in a Weary Throat: Memoir of an American Pilgrimage

Road Wallah

Show biz memoir at its name-dropping, bridge-burning, profane best: the music industry's most outspoken, outrageous, and phenomenally successful executive delivers a rollicking memoir of pop music's heyday. During the 1970s and '80s the music business was dominated by a few major labels and artists such as Michael Jackson, Bruce Springsteen, the Rolling Stones, Bob Dylan, Billy Joel, Paul Simon, Barbra Streisand and James Taylor. They were all under contract to CBS Records, making it the most successful label of the era. And, as the company's president, Walter Yetnikoff was the ruling monarch. He was also the most flamboyant, volatile and controversial personality to emerge from an industry and era defined by sex, drugs and debauchery. Having risen from working-class Brooklyn and the legal

department of CBS, Yetnikoff, who freely admitted to being tone deaf, was an unlikely label head. But he had an uncanny knack for fostering talent and intimidating rivals with his appalling behavior—usually fueled by an explosive combination of cocaine and alcohol. His tantrums, appetite for mind-altering substances and sexual exploits were legendary. In Japan to meet the Sony executives who acquired CBS during his tenure, Walter was assigned a minder who confined him to a hotel room. True to form, Walter raided the minibar, got blasted and, seeing no other means of escape, opened a hotel window and vented his rage by literally howling at the moon. In *Howling at the Moon*, Yetnikoff traces his journey as he climbed the corporate mountain, danced on its summit and crashed and burned. We see how Walter became the father-confessor to Michael Jackson as the King of Pop reconstructed his face and agonized over his image while constructing *Thriller* (and how, after it won seven Grammys, Jackson made the preposterous demand that Walter take producer Quincy Jones's name off the album); we see Walter, in maniacal pursuit of a contract, chase the Rolling Stones around the world and nearly come to blows with Mick Jagger in the process; we get the tale of how Walter and Marvin Gaye—fresh from the success of "Sexual Healing"—share the same woman, and of how Walter bonds with Bob Dylan because of their mutual Jewishness. At the same time we witness Yetnikoff's clashes with Barry Diller, David Geffen, Tommy Mottola, Allen Grubman and a host of others. Seemingly, the more Yetnikoff feeds his cravings for power, sex, liquor and cocaine, the more profitable CBS becomes—from \$485 million to well over \$2 billion—until he finally succumbs, ironically, not to substances, but to a corporate coup. Reflecting on the sinister cycle that left his career in tatters and CBS flush with cash, Yetnikoff emerges with a hunger for redemption and a new reverence for his working-class Brooklyn roots. Ruthlessly candid, uproariously hilarious and compulsively readable, *Howling at the Moon* is a blistering *You'll Never Eat Lunch in this Town* Again of the music industry.

Manual on Test Sieving Methods

Premier Padmini taxis, first introduced to the streets of Mumbai in the 1960s, have now all but disappeared following the introduction of laws to reduce pollution in the city. Locally known as 'Kaali-Peeli', there were once more than 60,000 of these iconic black and yellow cabs struggling through the chaos of Mumbai's streets. Over a four year period Dougie Wallace documented these elaborate Bollywood disco bars on wheels. The crowded streets of Mumbai and the assortment of passengers provide a dynamic and intense backdrop, as do the cabs themselves.

Anamorphic Art

1.1 Standard test sieves that conform to ASTM Specification E 11 (Table 1) are referred to as U.S. Standard Testing Sieves and should always be used in a test sieve-based particle size measurement program. This series of test sieves, based on the principle of a fixed ratio of 4?2:1 between the sieve openings, was first introduced in the United States in 1910 and since has achieved worldwide use. The concept was pioneered by Peter Ritter von Rittinger of Austria in 1867. The number of sieves in the series and the spacing of the openings in the scale have been proved, by over 90 years experience, to be ideal for the separation of particulate materials according to designated size analysis using sieves. Since 1910, many

countries have adopted national sieve standards based on the same fixed ratio as the U.S. Series.
