A Level Mathematics for OCR A Student Book 1 (AS/Year 1)

Targeted at OCR GCSE specification 1937, this text provides the information needed by students for papers 1 and 2. It helps to improve their grades by helping them understand what the key issues are and showing them how to use their knowledge.

OCR A-level Economics Student Guide 3: Microeconomics 2

Exam Board: OCR Level: AS/A-level Subject: Economics
First Teaching: September 2015 First Exam: Summer 2016
Reinforce students' understanding throughout the course. Clear topic summaries with sample questions and answers will help to improve exam technique to achieve higher grades. Written by experienced teacher Sam Dobin, this Student Guide will help you to:

- Identify key content with a concise summary of topics examined in the 2015 OCR A level Economics specification
- Measure understanding with exam tips and knowledge-check questions, with answers at the end of the guide
- Develop independent learning skills with content that can be used for further study and research
- Improve exam technique with sample graded answers to exam-style questions

OCR Economics Student Guide 2: Macroeconomics 1

Data Management

Easing the transition from GCSE to AS level, this textbook meets the 2004 Edexcel specifications and provides numerous worked examples and solutions to aid understanding of key concepts.

Microform & Imaging Review

Explore, create, evaluate: help your students to develop an understanding of the iterative design process and to be critical and innovative designers, while developing the knowledge and skills they need for the 2017 OCR GCSE D&T specification. Confidently navigate both the core and in-depth principles of design and technology, including less familiar materials and system components, to ensure your students have the knowledge and understanding they need.

- Builds a toolkit of knowledge, understanding and design development skills for the chosen materials or systems, with dedicated chapters covering each of the main categories of materials
- Develops mathematical and scientific skills with practice questions that apply this learning in context
- Supports the Non-Exam Assessment with guidance on how to approach the Iterative Design Challenge, which includes imaginative and creative examples of student projects to inspire and engage
- Helps students to prepare for the written assessment with

practice questions covering both the 'core' and 'in-depth' content

Revise Gcse Design and Technology

Books in Print, 2004-2005

A Collection of Technical Papers

New 2017 Cambridge A Level Maths and Further Maths resources to help students with learning and revision. Written for the OCR AS/A Level Mathematics specifications for first teaching from 2017, this print Student Book covers the content for AS and the first year of A Level. It balances accessible exposition with a wealth of worked examples, exercises and opportunities to test and consolidate learning, providing a clear and structured pathway for progressing through the course. It is underpinned by a strong pedagogical approach, with an emphasis on skills development and the synoptic nature of the course. Includes answers to aid independent study.

Guide to OCR for Arabic Scripts

"With an emphasis on consumer electronics, the contributing authors to Multimedia Technology for Applications present the very latest advances in signal processing, communications and networking, computer databases, and circuits and systems as they relate to multimedia technology and

applications. Topics covered include: multimedia systems; standards, and trends; submicro electronic enabling technologies; digital library servers; networking; multimedia signal processing and applications"--Publisher's description.

Multimedia Technology for Applications

Macworld

Enhance your students' practical skills and develop their key content knowledge with this proven formula for effective, structured revision. Target success in OCR's Cambridge National Certificate in Information Technologies with this revision guide that brings together exam-style questions, revision tasks and practical tips to help students to review, strengthen and test their knowledge. With My Revision Notes, every student can:

- Enjoy an interactive approach to revision, with clear topic summaries that consolidate knowledge and related activities that put the content into context.
- Plan and manage a successful revision programme using the topic-by-topic planner.
- Build, practice and enhance exam skills by progressing through revision tasks and Test Yourself activities.
- Improve exam technique through exam-style questions and sample answers with commentary from an expert author and teacher.

A Volume of Technical Papers Presented at AIAA/ASME 8th Structures, Structural Dynamics, & Materials Conference, Palm

Springs, California, March 29-31, 1967

Exam Board: MEI Level: A-level Subject: Mathematics
First Teaching: September 2018 First Exam: June 2019 An OCR endorsed textbook. Encourage every student to develop a deeper understanding of mathematical concepts and their applications with textbooks that draw on the well-known MEI (Mathematics in Education and Industry) series, updated and tailored to the 2017 OCR (MEI) specification and developed by subject experts and MEI. - Develop problem-solving, proof and modelling skills with plenty of questions and well-structured exercises that build skills and mathematical techniques. - Build connections between topics, using real-world contexts to help develop mathematical modelling skills, thus providing a fuller and more coherent understanding of mathematical concepts. - Prepare students for assessment with practice questions written by subject experts. - Ensure coverage of the new statistics requirements with five dedicated statistics chapters and questions around the use of large data sets. - Supports the use of technology with a variety of questions based around the use of spreadsheets, graphing software and graphing calculators. - Provide clear paths of progression that combine pure and applied maths into a coherent whole. - Reinforce Year 1 content with short review chapters - Year 2 only.

Essential AS Biology for OCR

Modern World History for OCR: Core Teacher's Resource Pack

New 2017 Cambridge A Level Maths and Further Maths resources to help students with learning and revision. Written for the OCR A Level Further Mathematics specification for first teaching from 2017, this print Student Book covers the Pure Core content for the second year of A Level. It balances accessible exposition with a wealth of worked examples, exercises and opportunities to test and consolidate learning, providing a clear and structured pathway for progressing through the course. It is underpinned by a strong pedagogical approach, with an emphasis on skills development and the synoptic nature of the course. Includes answers to aid independent study.

Rhinegold Guide to Music Education

OCR GCSE (9-1) Design and Technology

Written by experienced teacher Sam Dobin, this Student Guide for Economics: - Identifies the key content you need to know with a concise summary of topics examined in the AS and A-level specifications - Enables you to measure your understanding with exam tips and knowledge check questions, with answers at the end of the guide - Helps you to improve your exam technique with sample answers to exam-style questions - Develops your independent learning skills with content you can use for further

study and research

OCR Economics Student Guide 1: Microeconomics 1

Decision 1 for OCR

New 2017 Cambridge A Level Maths and Further Maths resources to help students with learning and revision. Written for the AQA AS/A Level Further Mathematics specification for first teaching from 2017, this print Student Book covers the Mechanics content for AS and A Level. It balances accessible exposition with a wealth of worked examples, exercises and opportunities to test and consolidate learning, providing a clear and structured pathway for progressing through the course. It is underpinned by a strong pedagogical approach, with an emphasis on skills development and the synoptic nature of the course. Includes answers to aid independent study. This book has entered an AQA approval process.

OCR A-level Economics Student Guide 4: Macroeconomics 2

OCR Publishing Partner Ensures your students master the core studies and research methods for OCR Psychology with a clear, organised approach; activities, research practicals and practice questions develop the skills required at AS and A Level - Supports you and your students through the new OCR A Level specification, with an author team

experienced in teaching and examining OCR
Psychology - Helps students easily navigate the core studies and associated themes and perspectives with an organised, accessible approach - Ensures your students develop strong research skills, with research practicals and thorough coverage of the content needed for the Research methods paper - Develops the critical thinking, mathematical and problem-solving skills required for the study of Psychology through a wealth of targeted activities - Strengthens students' learning and progression with practice questions and extension activities

MEI A Level Mathematics Year 2

A clear, concise and comprehensive guide to Latin language, grammar and vocabulary for GCSE students.

My Revision Notes: Cambridge National Level 1/2 Certificate in Information Technologies

Written by experienced authors and practising teachers the Essentials student book matches the OCR specifications for AS Biology and Human Biology.

A Level Further Mathematics for OCR A Pure Core Student Book 2 (Year 2)

A Level Further Mathematics for OCR A

Statistics Student Book (AS/A Level)

New 2017 Cambridge A Level Maths and Further Maths resources to help students with learning and revision. Written for the OCR AS/A Level Further Mathematics specification for first teaching from 2017, this print Student Book covers the Statistics content for AS and A Level. It balances accessible exposition with a wealth of worked examples, exercises and opportunities to test and consolidate learning, providing a clear and structured pathway for progressing through the course. It is underpinned by a strong pedagogical approach, with an emphasis on skills development and the synoptic nature of the course. Includes answers to aid independent study.

Digest of Papers

Written by experienced teacher Sam Dobin, this Student Guide for Economics: - Identifies the key content you need to know with a concise summary of topics examined in the AS and A-level specifications - Enables you to measure your understanding with exam tips and knowledge check questions, with answers at the end of the guide - Helps you to improve your exam technique with sample answers to exam-style questions - Develops your independent learning skills with content you can use for further study and research

Core 1 and 2 for OCR

Indexes the Times and its supplements.

Coursemate for OCR C GCSE Geography

Disposal of Radioactive Waste in Seabed Sediments

Written by experienced teacher Sam Dobin, this Student Guide for Economics: - Identifies the key content you need to know with a concise summary of topics examined in the A-level specifications - Develops your independent learning skills with content you can use for further study and research - Enables you to measure your understanding with exam tips and knowledge check questions, with answers at the end of the guide - Helps you to improve your exam technique with sample answers to exam-style questions

Collection of Technical Papers on

Music Education Yearbook

Easing the transition from GCSE to AS level, this textbook meets the 2004 Edexcel specifications and provides numerous worked examples and solutions to aid understanding of key concepts.

OCR Psychology for A Level

Essential GCSE Latin

OCR Psychology, Third Edition, is endorsed by OCR for use with the OCR AS Psychology specification. This book prepares students for all elements of the OCR Psychology AS exam. It covers both research methods and core studies, giving the who, what, where, and even the why of each study. It also looks at some of the work that followed the studies. Key features of the book include: 'Psychological Investigations': the first chapter of the book helps students to understand research methods in psychology – useful support for the Psychological Investigations exam and for understanding the core studies themselves. Core Studies: each study is described first 'In a Nutshell', followed by a detailed account of the aims, method, results and conclusions. Guidance is given on how each study can be evaluated and a wealth of extra materials is provided for each study – questions to assess understanding, practical activities, multiple choice and exam-style questions, further reading and video links. Background to each core study is included in the 'Starters' and 'Afters' features: information about related research before and after the study; and biographical details of the researcher(s). Approaches, perspectives, issues and methods are considered in a brand-new chapter to cover the themes of the course and prepare students for the long-answer questions on the Core Studies exam. Exam guidance: each chapter ends with short- and long-answer exam-style questions answered by students with teacher feedback. The book is presented in colourful and well-structured magazine-style spreads to aid the learning process. This 3rd edition has been completely revised, and is now accompanied by a companion website featuring an

extensive range of online resources for both teachers and students, including answers to the questions posed in the book, glossary flash-cards, and multiple-choice test banks.

A Level Further Mathematics for AQA Mechanics Student Book (AS/A Level)

This Guide to OCR for Arabic Scripts is the first book of its kind, specifically devoted to this emerging field. Topics and features: contains contributions from the leading researchers in the field; with a Foreword by Professor Bente Maegaard of the University of Copenhagen; presents a detailed overview of Arabic character recognition technology, covering a range of different aspects of pre-processing and feature extraction; reviews a broad selection of varying approaches, including HMM-based methods and a recognition system based on multidimensional recurrent neural networks; examines the evaluation of Arabic script recognition systems, discussing data collection and annotation, benchmarking strategies, and handwriting recognition competitions; describes numerous applications of Arabic script recognition technology, from historical Arabic manuscripts to online Arabic recognition.

Core 3 and 4 for OCR

The New Wider World Coursemate for OCR C GCSE Geography provides summaries of key content and key ideas to support OCR's 2001 Geography C specification.

Guide to OCR for Indic Scripts

Core Mathematics C3

This is the first comprehensive text on Optical Character Recognition for Indic scripts. It covers many topics and describes OCR systems for eight different scripts—Bangla, Devanagari, Gurmukhi, Gujarti, Kannada, Malayalam, Tamil and Urdu.

Paleocene and Eocene Palynological Literature

New editions of the bestselling Revise GCSE Study Guides with a fresh new look and updated content in line with curriculum changes. Revise GCSE contains everything students need to achieve the GCSE grade they want. Each title has been written by a GCSE examiner to help boost students' learning and focus their revision. Each title provides complete curriculum coverage with clearly marked exam board labels so students can easily adapt the content to fit the course they are studying. Revise GCSE is an ideal course companion throughout a student's GCSE study and acts as the ultimate Study Guide throughout their revision.

The Times Index

Fully endorsed by OCR and revised to match the 2005 specification, this series has been carefully revised by experienced teachers and provides easy to use texts.

Cambridge Advanced Mathematics for OCR encourages achievement by supporting revision and consolidation through review exercises and mock exam papers written by experienced examiners. The books also explore ideas through practical and computer activities.

Core Mathematics 2

Fully endorsed by OCR for use with OCR Mathematics GCE specification

OCR Psychology

Fully endorsed by OCR and revised to match the 2005 specification, this series has been carefully revised by experienced teachers and provides easy to use texts. Cambridge Advanced Mathematics for OCR encourages achievement by supporting revision and consolidation through review exercises and mock exam papers written by experienced examiners. The books also explore ideas through practical and computer activities.
