There is an increase in specialisation within general surgery and now even within its sub specialties. Colorectal surgery is probably the largest of the subspecialties of general surgery, and one of the areas where trainees and consultant general

/colorectal surgeons are least confident is in their understanding of the anatomy, physiological pathology and management of the anal canal and pelvis. Currently available there are books on the market centred around the general management of colorectal disease, but the time is now right for a definitive text on the anal canal and pelvis specifically.

Within its cruel and jagged shadow, magnolias wilted in their window boxes and synthetic Gold Top became doorstep cheese' Something sinister is happening east of Ealing. The prophecies of The Book of Revelation are being fulfilled. Regardless of time period, some things hold true: kindness is timeless. Invasion of privacy; divorce; relationship issues; encounters between people from different places and cultures; new technologies developed at dizzying speeds . . . the hectic pace of life in the late nineteenth century could make the mind reel. Wait a minute—the nineteenth century? Many of the issues people faced in the 1880s and '90s surprisingly remain problems in today's modern world, so why not take a peek at some Victorian advice about negotiating life's dizzying twists and turns?

Gathered from period magazines and Hill's Manual of Social and Business Forms, a book on social conduct originally published in 1891, this volume provides timeless guidance for a myriad of situations, including: The husband's duty: Give your wife every advantage that it is possible to bestow. Suggestions about shopping: Purchasers should, as far as possible, patronize the merchants of their own town. (Buy local!) Suggestions for travel: Having paid for one ticket, you are entitled to only one seat. It shows selfishness to deposit a large amount of baggage in the surrounding seats and occupy three or four. Unclassified laws of etiquette: Never leave home with unkind words. This advice is accompanied by watercolors and illustrations throughout. Though these are tips originate from nineteenth-century ideas, you'll find that they certainly do still apply.

Suzuki SV650 and SV650S

In this ambitious new history of the antiapartheid struggle, Jon Soske places India and the Indian diaspora at the center of the African National Congress's

development of an inclusive philosophy of nationalism. In so doing, Soske combines intellectual, political, religious, urban, and gender history to tell a story that is global in reach while remaining grounded in the everyday materiality of life under apartheid. Even as Indian independence provided black South African intellectuals with new models of conceptualizing sovereignty, debates over the place of the Indian diaspora in Africa (the “also-colonized other”) forced a reconsideration of the nation’s internal and external boundaries. In response to the traumas of Partition and the 1949 Durban Riots, a group of thinkers in the ANC, centered in the Indian Ocean city of Durban and led by ANC president and Nobel Peace Prize winner Albert Luthuli, developed a new philosophy of nationhood that affirmed South Africa’s simultaneously heterogeneous and fundamentally African character. *Internal Frontiers* is a major contribution to postcolonial and Indian Ocean studies and charts new ways of writing about African nationalism.

Hydraulic research is developing beyond traditional civil engineering, since the number of natural hazards increased in recent years, and so did the extent and scope of structural safety assessment and environmental research. Hydraulic Engineering II contains 44 technical papers from the 2nd SREE Conference on Hydraulic Engineering (CHE 2013, Hong Kong, 2-3 November 2013, including the Third SREE Workshop on Environment and Safety Engineering, WESE 2013), discusses recent advances and issues, and identifies challenges associated with engineering applications in hydraulic engineering. The contributions showcase recent developments in the areas of hydraulic engineering and environmental engineering, and other related fields. The sections on hydraulic engineering mainly focus on river engineering and sediment transport, flood hazards and innovative control measures, rainfall modelling, dam safety, slope stability, environmental hydraulics and hydrology, while the contributions related to environmental issues
