Using Paired Text to Meet the Common Core

Science Education in Canada

Guides to Curriculum Building, the Junior High School Level

This is a must-have book if you're going to tackle the challenging concepts of force and motion in your classroom. --

Dissertation Abstracts International

State Indicators of Science and Mathematics Education

Teaching students to make connections across related texts promotes engagement and improves reading comprehension and content learning. This practical guide explains how to select and teach a wide range of picture books as paired text--two books related by topic, theme, or genre--in grades K-8. The author provides mini-lessons across the content areas, along with hundreds of recommendations for paired text, each linked to specific Common Core standards for reading literature and informational texts. In a large-size format for easy photocopying, the book includes 22 reproducible graphic organizers and other useful tools. Purchasers also get access to a Web page where they can download and print the reproducible materials.

NCEA Bulletin

State Indicators of Science and Mathematics Education, 1997

This report on science and mathematics indicators is intended to assist state, national, and local policymakers and educators in making informed decisions. This report focuses on science and mathematics indicators at state and national levels. The indicators are intended for use by policymakers and educators to assess progress in improving mathematics and science education in the schools. The 1997

report presents new state indicators from the 1995-96 school year and examines trends by state from 1990 to 1996 on indicators of student achievement, content and instruction, and context and conditions for teaching. Indicators were selected through consultation with state education leaders, science and mathematics educators, representatives of national professional organizations, and education researchers. (Contains 61 references, 32 tables, and 14 figures.) (ASK)

Physical Sciences, Grade 10

Study & Master Physical Sciences Grade 10 has been especially developed by an experienced author team for the Curriculum and Assessment Policy Statement (CAPS). This new and easy-to-use course helps learners to master essential content and skills in Physical Sciences. The innovative Teacher's File includes: * guidance on the teaching of each lesson for the year * answers to all activities in the Learner's Book * assessment guidelines * photocopiable templates and resources for the teacher

Circular Series A.

This book offers a meso-level description of demographics, science education, and science teacher education. Representing all 13 Canadian jurisdictions, the book provides local insights that serve as the basis for exploring the Canadian system as a whole and function as a common starting point from which to identify causal

relationships that may be associated with Canada's successes. The book highlights commonalities, consistencies, and distinctions across the provinces and territories in a thematic analysis of the 13 jurisdiction-specific chapters. Although the analysis indicates a network of policy and practice issues warranting further consideration, the diverse nature of Canadian science education makes simple identification of causal relationships elusive. Canada has a reputation for strong science achievement. However, there is currently limited literature on science education in Canada at the general level or in specific areas such as Canadian science curriculum or science teacher education. This book fills that gap by presenting a thorough description of science education at the provincial/territorial level, as well as a more holistic description of pressing issues for Canadian science education.

Science Education Worldwide

With a focus on physical science, a guide to using leveled texts to differentiate instruction in science offers fifteen different topics with high-interest text written at four different reading levels, accompanied by matching visuals and comprehension questions.

Report of the Proceedings and Addresses

Each Science Games Galore! eBook features 10 ready-to-use games and 10 reproducible activity pages designed to reinforce essential science skills. The titles focus on a variety of standards-based science concepts and include the following: Interactive, hands-on, full-color card stock cards and answer keys Games and reproducibles designed for varying ability levels that allow students to play independently while the teacher works with small groups Reproducibles that are perfect for review practice, extension activities, assessment tools, or homework assignments Suggestions for preparing the game materials Explicit instructions for implementing the games and tips for trouble-free game play Additional ways to use the game pieces A blank game template reproducible students and teachers can use to create their own games
