PHOTOGRAPHY: FROM THEORY TO PRACTICE by Michael Leary. A guide to the science & art of photography. Starting with an explanation of light, how light travels through lenses, & how the lenses of a camera function, & continuing with the science behind film & photograph processing, gives students & general readers a solid foundation to understand the technical aspects of taking & making a great photograph. This understanding allow greater creative expression & takes some of the mystery out of photography. The normally difficult topics of optics, image formation & photochemistry are discussed in simple terms. There are plenty of examples of good & bad photographs to reinforce theory into practice. ISBN

0-89863-124-6 Star Publishing Company, P.O. Box 68, Belmont, CA 94002. Phone (650) 591-3505; fax (650) 591-3898 email: mail@starpublishing.com

## **The British Journal of Photography**

## **Study Guide and Student Solutions Manual**

## **The Hasselblad Manual**

## **The Encyclopedia of Physics**

Acquaints the serious photographer with some of the essential facts and procedures related to creative-professional use of the Polaroid Land process. A supplementary section deals with Polacolor film.

Physics for Scientists and Engineers combines outstanding pedagogy with a clear and direct narrative and applications that draw the reader into the physics. The new edition features an unrivaled suite of media and on-line resources that enhance the understanding of physics. Many new topics have been incorporated such as: the Otto cycle, lens combinations, three-phase alternating current, and many more. New developments and discoveries in physics have been added including the Hubble space telescope, age and inflation of the universe, and distant planets. Modern physics topics are often discussed within the framework of classical physics where appropriate. For scientists and engineers who are interested in learning physics.

### **Journal of Applied Photographic Engineering**

Backed by the resources of Independent Feature Project/West, co-authors Nicole Shay LaLoggia and Eden H. Wurmfeld have written the definitive low-budget production manual. Using examples from the Swingers and Kissing Jessica Stein,

this comprehensive manual offers the independent filmmaker a single volume reference covering every aspect of making a film: script rights and rewrites, financing, breakdown, scheduling and budgeting, pre-production, production, postproduction, and distribution. A resource guide listing useful references and organizations, as well as a glossary, complete this guide. The companion CD-ROM features interviews with important figures in the independent film industry, including Billy Bob Thornton and Ang Lee. Forms that are illuminated in the text are also included on the CD for ease of use. The new edition is updated with thorough coverage of digital and HD-how to decide which to shoot on, what the financial impact is, and the effect on preproduction. There is also a new chapter on distribution and expanded material on postproduction.
