Voyages in World History, Volume 1

Chemistry

Authored by nationally recognized scholar and behavioral consultant Dr. John W. Maag, this book focuses primarily on students' observable behaviors and the environmental factors that affect their expression. As Maag points out, behavior management is probably one of the most misunderstood concepts in education. Written in a very accessible style, this book demystifies stereotypical beliefs and misconceptions regarding the use of reinforcement, punishment, and self-control. Maag offers clear, but detailed descriptions of proven intervention techniques, supplemented by a range of step-by-step guidelines, sample forms, charts, graphs, and illustrations that assist teachers in implementing the techniques. Although the techniques described in the book are based on a sound theoretical and empirical foundation, the

author limits the use of technical jargon and infuses real-life examples and case studies that clarify and illuminate the presentation. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Business Strategy for the Political Arena

Business Law: Text and Cases

In her study of medieval Chinese lay practices and beliefs, Valerie Hansen argues that social and economic developments underlay religious changes in

the Southern Song. Unfamiliar with the contents of Buddhist and Daoist texts, the common people hired the practitioner or prayed to the god they thought could cure the ill or bring rain. As the economy rapidly developed, the gods, like the people who worshiped them, diversified: their realm of influence expanded as some gods began to deal on the national grain market and others advised their followers on business transactions. In order to trace this evolution, the author draws information from temple inscriptions, literary notes, the administrative law code, and local histories. By contrasting differing rates of religious change in the lowland and highland regions of the lower Yangzi valley, Hansen suggests that the commercial and social developments were far less uniform than previously thought. In 1100, nearly all people in South China worshiped gods who had been local residents prior to their deaths. The increasing mobility of cultivators in the lowland, rice-growing regions resulted in the adoption of gods from other places. Cults in the isolated mountain areas showed considerably less change. Originally published in 1990. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions.
