### Boat Owners Manual

This masterful social and economic history of rural Zaire examines the complex and lasting effects of forced cotton cultivation in central Africa from 1917 to 1960. Osumaka Likaka recreates daily life inside the colonial cotton regime. He shows that, to ensure widespread cotton production and to overcome continued peasant resistance, the colonial state and the cotton companies found it necessary to augment their use of threats and force with efforts to win the cooperation of the peasant farmers, through structural reforms, economic incentives, and propaganda exploiting African popular culture. As local plots of food crops grown by individual households gave way to commercial fields of cotton, a whole host of social, economic, and environmental changes followed. Likaka reveals how food shortages and competition for labor were endemic, forests were cleared, social stratification increased, married women lost their traditional control of agricultural production, and communities became impoverished while local chiefs enlarged their power and prosperity. Likaka documents how the cotton regime promoted its cause through agricultural exhibits, cotton festivals, films, and plays, as well as by raising producer prices and decreasing tax rates. He also shows how the peasant laborers in turn resisted regimented agricultural production by migrating, fleeing the farms for the bush, or sabotaging plantings by surreptitiously boiling cotton seeds. Small farmers who had received appallingly low prices from the cotton companies resisted by stealing back their cotton by night from the warehouses, to resell it in the morning. Likaka draws on interviews with more than fifty

informants in Zaire and Belgium and reviews an impressive array of archival materials, from court records to comic books. In uncovering the tumultuous economic and social consequences of the cotton regime and by emphasizing its effects on social institutions, Likaka enriches historical understanding of African agriculture and development.

Since well before his epic 1974 walk between the Twin Towers of the World Trade Center, Philippe Petit had become an artist who answered first and foremost to the demands of his craft - not only on the high wire, but also as a magician, street juggler, visual artist, builder and writer. A born rebel, he is self taught, cultivating the attitudes, resources and techniques to tackle even seemingly impossible feats. His outlaw sensibility spawned a unique approach to the creative process, an approach he shares with the reader, revealing unconventional ways of creating art.

The stages of the creative process--from "unlearning" to beginning again--seen through examples from the practice of artists, architects, poets, and others. Although each instance of creativity is singular and specific, Kyna Leski tells us, the creative process is universal. Artists, architects, poets, inventors, scientists, and others all navigate the same stages of the process in order to discover something that does not yet exist. All of us must work our way through the empty page, the blank screen, writer's block, confusion, chaos, and doubt. In this book, Leski draws from her observations and experiences as a teacher, student, maker, writer, and architect to describe the workings of the creative process. Leski sees the creative process as being like a storm; it slowly begins to gather and take form until it overtakes us--if we are willing to let it. It is dynamic, continually in motion; it starts, stops, rages and abates, ebbs and flows. In illustrations that accompany each chapter, she maps the arc of the creative process by tracing the path of water droplets traveling the stages of a storm. Leski describes unlearning, ridding ourselves of preconceptions; only when we realize what we don't know can we pose the problem that we need to solve. We gather evidence--with notebook jottings, research, the collection of objects--propelling the process. We perceive and conceive; we look ahead without knowing where we are going; we make connections. We pause, retreat, and stop, only to start again. To illustrate these stages of the process, Leski draws on examples of creative practice that range from Paul Klee to Steve Jobs, from the discovery of continental drift to the design of Antoni Gaudí's Sagrada Familia. Creativity, Leski tells us, is a path with no beginning or end; it is ongoing. This revelatory view of the creative process will be an essential guide for anyone engaged in creative discovery. "Mr. Petit is the perfect teacher" in this fascinating, educational volume on knot-tying—an art and science that has held civilization together (The Wall Street Journal). Philippe Petit is known for his astounding feat of daring when, on August 7, 1974, he stepped out on a wire illegally rigged between the World Trade Center's twin towers in New York City. But beyond his balance, courage, and showmanship, there was one thing Petit had to be absolutely certain of—his knots. Without the confidence that his knots would hold, he never would have left the ground. In fact, while most of us don't think about them beyond tying our shoelaces, the humble knot is crucial in countless contexts, from sailing to sports to industrial safety to art, agriculture, and more. In this truly unique book, Petit offers a guide to tying over sixty of his essential knots, with practical sketches illustrating his methods and clear tying instructions. Filled with photos in which special knots were used during spectacular high-wire walks, quirky knot trivia, personal anecdotes, helpful tips, magic tricks, and special tying challenges, *Why Knot?* will entertain and educate readers of all ages. "In reading Philippe's book we are cogently reminded that without the ability to secure a rope, or tether a goat, or make fast the sheets of a galley, much of the civilization that we take for granted would disappear as easily as a slipknot in the hands of a Vegas conjuror." —Sting, musician and activist "His descriptions are clear, he deploys humor frequently and he makes his points with anecdotes that are colorful and

memorable. Explaining the purpose and creation of knots and thanks to those flawless drawings Mr. Petit earns perfect marks.” —The Wall Street Journal

What's in a name? As Osumaka Likaka argues in this illuminating study, the names that Congolese villagers gave to European colonizers reveal much about how Africans experienced and reacted to colonialism. The arrival of explorers, missionaries, administrators, and company agents allowed Africans to observe Westerners' physical appearances, behavior, and cultural practices at close range—often resulting in subtle yet trenchant critiques. By naming Europeans, Africans turned a universal practice into a local mnemonic system, recording and preserving the village's understanding of colonialism in the form of pithy verbal expressions that were easy to remember and transmit across localities, regions, and generations. Methodologically innovative, *Naming Colonialism* advances a new approach that shows how a cultural process—the naming of Europeans—can provide a point of entry into economic and social histories. Drawing on archival documents and oral interviews, Likaka encounters and analyzes a welter of coded fragments. The vivid epithets Congolese gave to rubber company agents—"the home burner," "Leopard," "Beat, beat," "The hippopotamus-hide whip"—clearly conveyed the violence that underpinned colonial extractive economies. Other names were subtler, hinting at derogatory meaning by way of riddles, metaphors, or symbols to which the Europeans were oblivious. Africans thus emerge from this study as autonomous actors whose capacity to observe, categorize, and evaluate reverses our usual optic, providing a critical window on Central African colonialism in its local and regional dimensions.

We revisit Lipset's law, which posits a positive and significant relationship between income and democracy. Using dynamic and heterogeneous panel data estimation techniques, we find a significant and negative relationship between income and democracy: higher/lower incomes per capita hinder/trigger democratization. Decomposing overall income per capita into its resource and non-resource components, we find that the coefficient on the latter is positive and significant while that on the former is significant but negative, indicating that the role of resource income is central to the result.

The history of the Moroccan troops in the Spanish Civil War (1936–1939) is the story of an encounter between two culturally and ethnically different people, and the attempts by both sides, Moroccan and Spanish, to take control of this contact. This book shows to what extent colonials could participate in negotiating limits and taboos rather than being only on the receiving end of them. The examination of this encounter, in its military, religious, as well as sexual aspects, sheds new light on colonial relations, and on how unique or typical the Spanish colonial case is in comparison to other European ones.
