"Life can be tough sometimes for Eden Moore. Still shy and awkward at twenty-four, she hoped she would grow out of some of the traits that always defined her. Like not knowing what to say to attractive men. Or not being the reincarnation of an ancient being. But despite her wishes, Eden's destiny has been set in motion thousands of years before her existence. A demon her previous-self defeated millennia ago is now back on Earth and regaining strength. In order to keep her world from being annihilated out of existence, she is going to have to dig deep for her powers and unite with Prophet, a dangerously-handsome Ancient with whom her past and future are forever linked. Challenges abound and the battles rage on, and only Eden can keep the world firmly on its axis.."--

Secondary education of students with learning and behavioral disabilities is an issue of great importance. Unlike elementary schools, secondary schools require substantially more independent functioning, assume the effective use of student planning and study skills, and often lack the classes in basic skills needed by some learners. Further, new developments in state high-stakes testing have increased the demands on content knowledge, and have decreased the availability of vocationally oriented programs. In this volume, several topics of relevance to secondary schools are considered by leading scholars, in reviews of recent

research and new investigations with original data. Included in the volume are reviews of recent research on the efficacy of self-management techniques; the utility and efficacy of homework assignments; treatments for secondary students with autism; interventions on content-area learning, including English, science, math, and social studies; the effects of teacher licensure on teaching competence; dynamic assessment of working memory; and uses of technology in secondary education programs for students with learning and behavioral disabilities. In addition, original research is presented in areas of problem solving in algebra; effectiveness of co-teaching in secondary classrooms; and the interaction of depression and self-regulation. This book is intended for interested professionals and practitioners; researchers in learning and behavioral disabilities; and graduate students in psychology, education, and special education, particularly those concerned with the issues of learning and behavior problems in secondary schools.
