Second and Foreign Language Acquisition

This book evaluates the origins of processes of change in language teaching in China, and the factors influencing their success. Examining diverse experiences and drawing on the perspectives of academics from the top institutions in the country, the authors analyse the complex interplay between global and local influences on language policies. Encouraging discussion of the significant education reforms that have taken place in China in recent years, this work will be of interest to students and scholars of language education, English as a Second Language and applied linguistics.

President's Report

Abstracted from Oryx's GRANTS database, identifies over 1,500 sources of funds in the US and Canada not only for schools, but also for libraries, museums, public television, adult basic education programs, and vocational and life-skills training. The sources include nonprofit organizations; foundations; private sources; and federal, state, and local government agencies. The articles describe the program and note restrictions, requirements, applications due date, contact, and sponsor. They are indexed by subject, sponsoring organization, program type, and geographic location. Annotation copyrighted by Book News, Inc., Portland, OR

In this book, Gattegno introduces The Silent Way as a solution to the challenges of teaching and learning foreign languages. He explains how to maximize learning through the use of materials and the selection of subject matter. He argues that students can learn a new language without memorizing vocabulary or repeating after the teacher. Instead, by learning through real-world linguistic situations, students can gain relevant experiences in the new language.

This book identifies the many facets of culture that influence second language learners and teachers. The paperback edition identifies the many facets of culture that influence second language learners and teachers. It addresses the impact of culture on learning to interact, speak, construct meaning, and write in a second language, while staying within the sociocultural paradigms specific to a particular language and its speakers. By providing a comprehensive introduction to research from other disciplines on the interaction between language and culture, this volume offers an important contribution to the field of second language acquisition.

Culture in Second Language Teaching and Learning

In recent years, reported racial disparities in IQ scores have been the subject of raging debates in the behavioral and social sciences and education. What can be made of these test results in the context of current scientific knowledge about human evolution and cognition? Unfortunately, discussion of these issues has tended to generate more heat than light. Now, the distinguished authors of this book offer powerful new illumination. Representing a range of disciplines--psychology, anthropology, biology, economics, history, philosophy, sociology, and statistics--the authors review the concept of race and then the concept of intelligence. Presenting a wide range of findings, they put the experience of the United States--so frequently the only focus of attention--in global perspective. They also show that the human species has no "races" in the biological sense (though cultures have a variety of folk concepts of "race"), that there is no single form of intelligence, and that formal education helps individuals to develop a variety of cognitive abilities. *Race and Intelligence* offers the most comprehensive and definitive response thus far to claims of innate differences in intelligence among races.

Early Childhood Education & Care News

The present volume examines the relationship between second language practice and what is known about the process of second language acquisition, summarising the current state of second language acquisition theory, drawing general conclusions about its application to methods and materials and describing what characteristics effective materials should have. The author concludes that a solution to language teaching lies not so much in expensive equipment, exotic new methods, or sophisticated language analysis, but rather in the full utilisation of the most important resources - native speakers of the language - in real communication.

Using the Web as Corpus is one of the recent challenges for corpus linguistics. This volume presents a current state-of-the-arts discussion of the topic. The articles address practical problems such as suitable linguistic search tools for accessing the www, the question of register variation, or they probe into methods for culling data from the web. The book also offers a wide range of case studies, covering morphology, syntax, lexis, as well as synchronic and diachronic variation in

English. These case studies make use of the two approaches to the WWW in corpus linguistics – web-as-corpus and web-for-corpus-building. The case studies demonstrate that web data can provide useful additional evidence for a broad range of research questions.

The use of technological tools to foster language development has led to advances in language methodologies and changed the approach towards language instruction. The tendency towards developing more autonomous learners has emphasized the need for technological tools that could contribute to this shift in foreign language learning. Computer-assisted language learning and mobile-assisted language learning have greatly collaborated to foster language instruction

out of the classroom environment, offering possibilities for distance learning and expanding in-class time. Recent Tools for Computer- and Mobile-Assisted Foreign Language Learning is a scholarly research book that explores current strategies for foreign language learning through the use of technology and introduces new technological tools and evaluates existing ones that foster language development. Highlighting a wide array of topics such as gamification, mobile technologies, and virtual reality, this book is essential for language educators, educational software developers, IT consultants, K-20 institutions, principals, professionals, academicians, researchers, curriculum designers, and students.

MLA International Bibliography of Books and Articles on the Modern Languages and Literatures

Understanding what constitutes expertise in language learning and teaching is important for theoretical reasons related to psycholinguistic, and applied linguistic, enquiry. It also has many significant applications in practice, particularly in relation to the training and practice of language teachers and improvements in students' strategies of learning. In this volume, methodologies for establishing what constitutes expert practice are discussed and the contributions address the fields of listening, reading, writing, speaking and communication strategies, looking at common characteristics of the 'expert teacher' and the 'expert learner'.
