The PMI-PBA® Exam Practice Test and Study Guide attempts to address all your questions and concerns by providing two of the most sought-after study aids: memory maps and practice questions. The systematic use of memory maps helps aid in the efficient recall of information and can boost confidence during the exam. Well-crafted practice questions are fantastic study aids that can be used to track your progress as you learn new concepts, introduce you to the complex sentence structure that is likely to appear on the exam, and concentrate your studies by domain, essentially preparing you to pass the very challenging PMI-PBA® Exam in the allotted four hours. In addition to study hints and exam topics, this book provides references to tools and techniques that should be incorporated into your work immediately. For each of the five domains outlined in the PMI Professional in Business Analysis (PMI-PBA)® Examination Content Outline 2013 (the ECO), twenty practice questions test your knowledge. Also included is a challenging 200-question practice exam, which is representative of the actual exam. To enhance your studies, a timed, online simulated exam is also provided. At the end of the simulated exam, you can see your score per the number of questions you

The ideal graduation gift for anyone about to enter the workforce, a witty, practical guide to 200 difficult professional conversations—featuring all-new advice from the creator of the popular website Ask a Manager and New York’s work-advice columnist. There’s a reason Alison Green has been called “the Dear Abby of the work world.” Ten years as a workplace-advice columnist have taught her that people avoid awkward conversations in the office because they simply don’t know what to say. Thankfully, Green does—and in this incredibly helpful book, she tackles the tough discussions you may need to have during your career. You’ll learn what to say when

- coworkers push their work on you—then take credit for it
- you accidentally trash-talk someone in an email then hit “reply all”
- you’re being micromanaged—or not being managed at all
- you catch a colleague in a lie
- your boss seems unhappy with your work
- your cubemate’s loud speakerphone is making you homicidal
- you got drunk at the holiday party

The Boston Institute of Finance Stockbroker Course

Chances are you haven't been making the best investing decisions. Why? BECAUSE THAT'S HOW WALL STREET WANTS IT Wall Street is very good at one thing: convincing you to act against your own interests. And there's no one out there better equipped with the knowledge and moxie to explain how it all works than Josh Brown. A man The New York Times referred to as "the Merchant of Snark" and Barron's called "pot-stirring and provocative," Brown worked for 10 years in the industry, a time during which he learned some hard truths about how clients are routinely treated—and how their money is sent on a one-way trip to Wall Street's coffers. Backstage Wall Street reveals the inner workings of the world's biggest money machine and explains how a relatively small confederation of brilliant, sometimes ill-intentioned people fuel it, operate it, and repair it when necessary—none of which is for the good of the average investor. Offering a look

that only a long-term insider could provide (and that only a “reformed” insider would want to provide), Brown describes: THE PEOPLE—Why retail brokers always profit—even if you don’t THE PRODUCTS—How funds, ETFs, and other products are invented as failsafe profit generators—for the inventors alone THE PITCH—The marketing schemes designed for one thing and one thing only: to separate you from your money It’s that bad . . . but there’s a light at the end of the tunnel. Brown gives you the knowledge you need to make the right decisions at the right time. Backstage Wall Street is about seeing reality for what it is and adjusting your actions accordingly. It’s about learning who and what to steer clear of at all times. And it’s about setting the stage for a bright financial future—your own way.

Series 7 Textbook and Final Exam Book

Ned Ryerson. That's who a lot of people picture when they think of insurance agents. Don't remember Ned? Sure you do. He was the "cheesy" insurance agent from the Bill Murray classic Groundhog Day. In Ned, we see examples of what can go so horribly awry with the insurance sales process - someone who gets people to sign on the dotted line because it's the only way they can escape him, someone

who is far more of a salesman than a trusted advisor, and of course, someone who is living commission-to-commission, putting his own survival above his clients' needs. The reason all these things make Ned our "anti-mascot" is that if you fail to grasp the danger of these things, you'll undoubtedly place major obstacles between you and your career goals. Starting of course, with your quest to pass the licensing exam. Thus, the goal of this book is twofold. First and foremost, I want to help you pass the exam, and do so by a wide margin. I don't want it to be even close. I want your state's insurance commissioner to be so blown away by your score that he takes your exam home and hangs it up on his refrigerator. But second, I want this book to become the basis for your career. I want it to help shape the way you approach insurance sales so that you not only help protect others against loss, but protect yourself (and your hard-earned license) as well. Even more, I want it to protect you against an average career. I want this book to help insure your financial success. Interested? If you are, then you're in for some exciting lessons about insurance theory, products, and sales. I'll share with you both the practical and conceptual knowledge you need to get to where you want to go.

Class-tested and coherent, this textbook teaches classical and web information retrieval, including web search and the related areas of text classification and text clustering from basic concepts. It gives an up-to-date treatment of all aspects of the design and implementation of systems for gathering, indexing, and searching documents; methods for evaluating systems; and an introduction to the use of machine learning methods on text collections. All the important ideas are explained using examples and figures, making it perfect for introductory courses in information retrieval for advanced undergraduates and graduate students in computer science. Based on feedback from extensive classroom experience, the book has been carefully structured in order to make teaching more natural and effective. Slides and additional exercises (with solutions for lecturers) are also available through the book's supporting website to help course instructors prepare their lectures.
