The Parliamentary Debates (Hansard).

Journal of the House of Representatives of the United States

The UNCITRAL Model Law after Twenty-Five Years: Global Perspectives on International Commercial Arbitration is a celebration of the Model Law's significant contribution to international arbitration law. It assesses and evaluates the Model Law's impact on the development of a universal arbitration law for a complex and mobile transnational community of lawyers, judges and arbitrators. Written from the perspective of counsel, arbitrators, legislators and judges, this collection is bold in its coverage of Model Law practice. It considers questions of legislative implementation; pre-award issues such as the review of arbitral jurisdiction and the production of evidence; post-award issues such as judicial review of arbitral awards; interpretation and harmonization methods; and questions of future reform. This is one of the only books on the market that considers the application of the UNCITRAL Model Law in both great depth and breadth, and from multiple perspectives. It provides critical assessments and evaluations of the impact that

the Model Law has had after 25 years in various aspects of the arbitral process. The issues covered pertain to both substantive and procedural elements; theoretical and practical; historical and evolutionary. The UNCITRAL Model Law after Twenty-Five Years: Global Perspectives on International Commercial Arbitration adopts a comparative approach and covers practice in nearly all Model Law countries and many others. As a seminal critique of the progress that the Model Law has made to date, this collection of articles will be of great benefit to judges, arbitrators, lawyers, academics and anyone interested in the future of international commercial arbitration.

Erving Goffman and Modern Sociology

Selected by the Modern Library as one of the 100 best nonfiction books of all time
• WINNER OF THE PULITZER PRIZE • WINNER OF THE NATIONAL BOOK AWARD
Although Theodore Rex fully recounts TR's years in the White House (1901-1909), The Rise of Theodore Roosevelt begins with a brilliant Prologue describing the President at the apex of his international prestige. That was on New Year's Day, 1907, when TR, who had just won the Nobel Peace Prize, threw open the doors of the White House to the American people and shook 8,150 hands, more than any man before him. Morris re-creates the reception with such authentic detail that the reader gets almost as vivid an impression of TR as those who attended. One visitor remarked afterward, "You go to the White House, you shake hands with Roosevelt

and hear him talk—and then you go home to wring the personality out of your clothes.” The rest of this book tells the story of TR’s irresistible rise to power. (He himself compared his trajectory to that of a rocket.) It is, in effect, the biography of seven men—a naturalist, a writer, a lover, a hunter, a ranchman, a soldier, and a politician—who merged at age forty-two to become the youngest President in our history. Rarely has any public figure exercised such a charismatic hold on the popular imagination. Edith Wharton likened TR’s vitality to radium. H. G. Wells said that he was “a very symbol of the creative will in man.” Walter Lippmann characterized him simply as our only “lovable” chief executive. During the years 1858–1901, Theodore Roosevelt, the son of a wealthy Yankee father and a plantation-bred southern belle, transformed himself from a frail, asthmatic boy into a full-blooded man. Fresh out of Harvard, he simultaneously published a distinguished work of naval history and became the fist-swinging leader of a Republican insurgency in the New York State Assembly. He had a youthful romance as lyrical—and tragic—as any in Victorian fiction. He chased thieves across the Badlands of North Dakota with a copy of Anna Karenina in one hand and a Winchester rifle in the other. Married to his childhood sweetheart in 1886, he became the country squire of Sagamore Hill on Long Island, a flamboyant civil service reformer in Washington, D.C., and a night-stalking police commissioner in New York City. As assistant secretary of the navy under President McKinley, he almost single-handedly brought about the Spanish-American War. After leading “Roosevelt’s Rough Riders” in the famous charge up San Juan Hill, Cuba, he

returned home a military hero, and was rewarded with the governorship of New York. In what he called his “spare hours” he fathered six children and wrote fourteen books. By 1901, the man Senator Mark Hanna called “that damned cowboy” was vice president of the United States. Seven months later, an assassin’s bullet gave TR the national leadership he had always craved. His is a story so prodigal in its variety, so surprising in its turns of fate, that previous biographers have treated it as a series of haphazard episodes. This book, the only full study of TR’s pre-presidential years, shows that he was an inevitable chief executive, and recognized as such in his early teens. His apparently random adventures were precipitated and linked by various aspects of his character, not least an overwhelming will. “It was as if he were subconsciously aware that he was a man of many selves,” the author writes, “and set about developing each one in turn, knowing that one day he would be President of all the people.”

United Nations Documents Index

International arbitration has become the preferred dispute resolution mechanism in cross-border disputes. In the course of time, ad hoc arbitration, where the parties have to create their own rules and procedures, has increasingly been replaced by institutional arbitration where a specialised institution with a permanent organisation provides assistance and a set of practice-proven rules. The services and rules provided by the various institutions of arbitration differ. In order to

inform the potential parties and their counsels about the differences and to make the choice between the different arbitration regimes easier, and to offer guidance through the various provisions, this book provides a comprehensive article-by-article commentary of rules of arbitration of 14 important arbitration institutions: AAA (American Arbitration Association) CIEDAC (China International Economic and Trade Arbitration) DIAC (Dubai International Arbitration Centre) DIS (German Institution of Arbitration) ICC (International Court of Arbitration) ICSID (International Centre for Settlement of Investment Disputes) KLRCA (Kuala Lumpur Regional Centre for Arbitration) LCIA (The London Court of International Arbitration) MKAS (Moscow International Commercial Arbitration Court) SCC (Stockholm Chamber of Commerce Arbitration) SIAC (Singapore International Arbitration Centre) Swiss Rules UNCITRAL Rules Vienna Rules

The Interpretation and Uniformity of the UNCITRAL Model Law on International Commercial Arbitration

This is a Government reply to the Joint HLP/HCP paper on counter-terrorism policy and human rights (HLP 157/HCP 394 06/07 ISBN 9780104011317). The Government accepts a number of the Committee's recommendations, including: that the issue of sufficient Parliamentary oversight of the 28 day pre-charge detention period, will now form part of the Government's consultation process on

the Counter Terrorism Bill and there will be consideration of whether there is a need for an independent body to review the operation of pre-charge detention, as well as a review of the availability of statistics and information on this matter; the Government agrees that the upper limit to the period of pre-charge detention should be set by Parliament; the Government does not accept the Committee's argument that transferring suspects out of police custody to prison is undesirable, but that prison provides the detainee access to facilities beyond that available at a police station; the Government is reviewing with the police the issue of making video-recording interviews with terrorism suspects compulsory under the Terrorism Act 2000; the Government does not accept the Committee's recommendations on the level of medical record keeping, and believes the current system is sufficient. The reply covers other areas, including: intercept as evidence; pre-charge questioning and other alternatives to pre-charge detention and special advocates.

The Pearson CSAT Manual 2012

"An enthralling story . . . A work of history that reads like a novel." — Christian Science Monitor "As Hochschild's brilliant book demonstrates, the great Congo scandal prefigured our own times . . . This book must be read and reread." — Los Angeles Times Book Review In the late nineteenth century, as the European powers were carving up Africa, King Leopold II of Belgium carried out a brutal plundering of the territory surrounding the Congo River. Ultimately slashing the area's population by ten million, he still managed to shrewdly cultivate his reputation as a great humanitarian. A tale far richer than any novelist could invent, King Leopold's Ghost is the horrifying account of a megalomaniac of monstrous proportions. It is also the deeply moving portrait of those who defied Leopold: African rebel leaders who fought against hopeless odds and a brave handful of missionaries, travelers, and young idealists who went to Africa for work or adventure but unexpectedly found themselves witnesses to a holocaust and participants in the twentieth century's first great human rights movement. A National Book Critics Circle Award Finalist A New York Times Notable Book

Parliamentary Debates (Hansard).

The work of Erving Goffman has had an enormous impact throughout the social sciences. Yet his writings have not received the detailed scrutiny which they deserve. This new book is the first comprehensive and accessible account of Erving Goffman's contributions, ranging in its scope from his very earliest work right up to

the projects upon which he was engaged at the time of his death. Goffman's writings, Manning argues, are much more systematic and conceptually powerful than is ordinarily acknowledged. The book thus offers a defence of Goffman's writings as well as providing an introduction for those who have no prior acquaintance with Goffman's ideas.

Construction Arbitration in Central and Eastern Europe

CSAT: civil services aptitude test

The 2017 edition of our popular title, General Studies Paper II is an all-inclusive guide for candidates preparing for the Civil Services examinations. Divided into seven section, it extensively covers topics such as Aptitude Building, Reading Comprehension, Interpersonal Skills, Communication Skills, Decision Making and Problem Solving, Logical Reasoning and Analytical Ability, General Mental Aptitude and Numerical Aptitude.

Introduction to the Constitution of India

The Applied Mathematics, Modelling, and Computational Science (AMMCS) conference aims to promote interdisciplinary research and collaboration. The contributions in this volume cover the latest research in mathematical and computational sciences, modeling, and simulation as well as their applications in natural and social sciences, engineering and technology, industry, and finance. The 2013 conference, the second in a series of AMMCS meetings, was held August 26—30 and organized in cooperation with AIMS and SIAM, with support from the Fields Institute in Toronto, and Wilfrid Laurier University. There were many young scientists at AMMCS-2013, both as presenters and as organizers. This proceedings contains refereed papers contributed by the participants of the AMMCS-2013 after the conference. This volume is suitable for researchers and graduate students, mathematicians and engineers, industrialists, and anyone who would like to delve into the interdisciplinary research of applied and computational mathematics and its areas of applications.

Counter-terrorism policy and human rights

Some vols. include supplemental journals of "such proceedings of the sessions, as, during the time they were depending, were ordered to be kept secret, and

respecting which the injunction of secrecy was afterwards taken off by the order of the House".

Vanity Fair

The Guide to Construction Arbitration

Numerous jurisdictions worldwide have augmented their ratification of the New York Convention of 1958 with the UNCITRAL Model Law 1985 (UML), which takes a giant step forward toward global uniformity in legal application and understanding of the arbitration process. This book develops a standard or benchmark for the UML objective of uniformity, using the relevant legislation and case law of Hong Kong, Singapore, and Australia to consider whether a uniform approach to implementation of the UML and its interpretation is being achieved across those jurisdictions. The author's methodological tools are eminently adaptable to other jurisdictions. Given the importance of the ability to set aside an arbitral award, the body of case law on setting aside and the directly related area of enforcement, the emphasis throughout is on Article 34. In addition, the study considers: - the meaning of uniformity in law and in the context of the UML; - the correct approach to interpretation of the UML pre and post Article 2A; - the interpretational

relationship between the UML and the Convention on Contracts for the International Sale of Goods (CISG); - the relationship between the UML and the New York Convention; - the degree of textual uniformity of Article 34 with the three jurisdictions focused on; and - the degree of applied uniformity of Article 34 both in terms of juristic methodology and similarity of results. The author, with more than thirty years of practice in the field of commercial arbitration in Hong Kong, has had access to voluminous cases spanning decades and brings his specialist expertise to the subject. This book considers whether the UML has succeeded in its aim of achieving uniformity. It serves as a guide, both academic and practical, to exploring and adopting the correct approach to the interpretation of the UML as well as to the method of classification of court decisions under the UML. This study is of immeasurable academic and practical value.

Incorporating a wide range of thematic maps, a statistical section and a comprehensive cross-referenced gazetteer, The Oxford School Atlas fulfils all the requirements for GCSE geographical skills and locational knowledge.

The Spectator

In safeguarding national security the Government produces and receives sensitive information. This information must be protected appropriately, as failure to do so may compromise investigations, endanger lives and ultimately lessen its ability to keep the country safe. The increased security and intelligence activity of recent years has led to greater scrutiny including in the civil courts, which have heard a growing numbers of cases challenging Government decisions and actions in the national security sphere. Such cases involve information that under current rules cannot be disclosed in a courtroom. The UK justice system is then either unable to pass judgment and cases collapse or are settled without a judge reaching any conclusions. This green paper aims to respond to the challenges of how sensitive information is treated in the full range of civil proceedings. It looks for solutions that improve the current arrangements while upholding the Government's commitment to the rule of law. It also addresses the need for public reassurance that the national security work is robustly scrutinised, and that the scrutinising bodies are credible and effective. The proposals in this consultation are in three broad areas: enhancing procedural fairness, safeguarding material and reform of

intelligence oversight.

The UNCITRAL Model Law after Twenty-Five Years: Global Perspectives on International Commercial Arbitration

International Commercial Arbitration

Third-Party Funding in International Arbitration

A book for everybody in India and abroad who wants to know anything about the Constitution of India during its first fifty years. Meets the requirements of the various Universities of India for the LL.B., LL.M., B.A. and M.A. (Political Science) and Competitive examinations held by the Union and State Public Service Commissions.

UNCITRAL 2012 Digest of Case Law on the Model Law on International Commercial Arbitration

The book contains a selection of high quality papers, chosen among the best

presentations during the International Conference on Spectral and High-Order Methods (2014), and provides an overview of the depth and breadth of the activities within this important research area. The carefully reviewed selection of papers will provide the reader with a snapshot of the state-of-the-art and help initiate new research directions through the extensive biography.

Christian Advocate

While thousands of cross-border disputes are successfully resolved each year through institutional arbitration, there appears to be little understanding of the functions exercised by arbitral institutions and their impact on the proceedings they administer. Much like the user of a computer may operate, with relative success, a machine which he does not fully comprehend, users of institutional arbitration have for many decades resolved their disputes successfully through institutional arbitration without fully understanding the precise nature of the functions of what is a key player in the process. This book rectifies this paradoxical gap. It offers a clear yet nuanced overview of the diverse and complex reality of institutional arbitration, while challenging the assumptions conventionally held as to the role of arbitral institutions. This book is the product of a systematic study of the activities performed by over forty leading international arbitration institutions worldwide in their administration of cases (including the ICC, LCIA, ICDR, SCC, SIAC, HKIAC, JAMS, CIETAC, KLRCA, DIS, DIA, NAI, CEPANI etc.). This book also

examines a wealth of court decisions and bibliographical sources from the leading civil law and common law jurisdictions (e.g., France, England & Wales, the United States, Switzerland, Germany). This book is invaluable to academics and practitioners interested in furthering their theoretical and practical understanding of institutional arbitration and arbitral institutions.

PC/Computing

General Studies Paper II : Civil Services Preliminary Examination 2017

The Oxford School Atlas

The term 'attribution' refers to the means by which it is ascertained whether the State is involved in a dispute governed by international law. The notion of attribution is primarily used to determine if the State is responsible for the wrongful conduct of persons or entities with links to the State. In the context of international investment law, the exponentially growing arbitration jurisprudence arising from international investment agreements (IIAs), especially bilateral

investment treaties (BITs), reflects the extent and risk of attribution determined in investment relationships that often involve State enterprises. This book, the first in-depth study of the uses of attribution in international investment law, provides a deeply informed analysis of the treatment of attribution in applicable legal instruments and investment arbitration jurisprudence worldwide. The analysis responds to such questions as the following: - When is a conduct attributable to the State for the purposes of its responsibility under international investment law? - What legal instruments govern the question of attribution under international investment law? - In what circumstances is the State the proper party to a contract entered into by a State-owned enterprise with an investor protected by an investment treaty? - How can State policymakers minimise their international law responsibility within the existing framework of attribution in international investment law? - How can investors maximise their protection within the existing framework of attribution in international investment law? Also covered are the procedural treatment of attribution by investment tribunals, explication of such broad-brush wordings as 'elements of governmental authority' and 'under the direction or control', and the impact of the rise of State-owned enterprises as investors. Ongoing and future trends in the jurisprudence are also taken into account. A one-stop reference on the question of attribution in international investment law, the analysis extracts identifiable commonalities among instruments and rulings, turning them into useful practice tools. This book will prove invaluable for practitioners advising States or investors in investment

disputes. More generally, this book will be welcomed by arbitrators, in-house counsel for companies doing transnational business and international arbitration centres, as well as by academics in international arbitration.

Communication & Cognition

The Rise of Theodore Roosevelt

The Functions of Arbitral Institutions

King Leopold's Ghost

Construction Arbitration in Central and Eastern Europe Contemporary Issues Edited by: Crina Baltag & Cosmin Vasile The successful execution of a construction project is inextricably linked to the management of risks and the expeditious settlement of any disputes that may arise. In this regard, the wealth of experience gained by Central and Eastern European practitioners in dealing with complex issues arising in construction projects in the region is highly relevant to international arbitration.

Thus, this timely book provides a combination of local expertise and cross-jurisdictional perspectives on topics that most often emerge in construction disputes and which resonate far beyond the specific region covered. The authors, all practitioners with significant expertise in international and domestic construction disputes in Central and Eastern European countries, focus on the following topics: the peculiarities of evidence in construction disputes; the probative value of dispute boards, as well as their enforceability; multi-party issues triggered by the participation of various stakeholders besides employer, contractor and subcontractors; provisional measures; arbitrability of contracts with public authorities; issues of liquidated damages; changes of legislation and costs over passage of time; time bar issues; and resolution of disputes related to construction projects as protected investments. Given the increasing number of disputes and the scarce resources available, this essential guide to contemporary topics in construction disputes, with its cross-border perspective, will prove invaluable to practitioners and to academics in the field of construction law and dispute resolution.

The Engineer

V.3: " provides a detailed discussion of the issues arising from international arbitration awards. It includes chapters covering the form and contents of awards; the correction, interpretation and supplementation of awards; the annulment and

confirmation of awards; the recognition and enforcement of arbitral awards; and issues of preclusion, lis pendens and staredecisis."--Descripción del editor.

The Operation of the Special Immigration Appeals Commission (SIAC) and the Use of Special Advocates

The Parliamentary Debates: Official Report

Drawing upon diverse sources such as history, indology, anthropology and sociology, this book discusses the various aspects of indian society,It also discusses the major trends of change and their impact, illuminating the complex social realities of india.

Witch's Master Grimoire

Since the first edition of this invaluable book in 2012, third-party funding has

become more mainstream in international arbitration practice. However, since even the existence of a third-party funding agreement in a dispute is often kept secret, it can be difficult to glean the specifics of successful funding agreements. This welcome book, now updated, expertly reveals the nuances of third-party funding in international arbitration, examines the phenomenon in key jurisdictions, and provides a reliable resource for users and potential users that may wish to tap into and make use of this distinctive funding tool. Focusing on Australia, the United Kingdom, the United States, Germany, the Netherlands, Canada, and South Africa, the authors analyze and assess the legal regime based upon legislation, judicial opinions, ethics opinions, and practitioner anecdotes describing the state of third-party funding in each jurisdiction. In addition to updating summaries of the law of the various jurisdictions, the second edition includes a new chapter addressing third-party funding in investor-state arbitration. Among the issues raised and examined are the following: · payment of adverse costs; · “Before-the-Event” (BTE) and “After-the-Event” (ATE) insurance; · attorney financing: pro bono representation, contingency representation, conditional fee arrangements; · loans; · ethical doctrines affecting the third-party funding industry; · possible future bundling, securitization, and trading of legal claims; · risk that the funder may put its own interests ahead of the client’s interests; and · whether the existence of a funding agreement must or should be disclosed to the decision maker. The second edition also includes discussion of recent institutional developments as they relate to third-party funding, including the work of the ICCA-Queen Mary Task Force on

Third-Party Funding and how third-party funding is being incorporated into arbitral rules and investment treaties. Aply providing a thorough understanding of what third-party funding entails and what legal parameters exist, this book will be of compelling interest to parties aiming to take advantage of the high values, speed, reduced evidentiary costs, outcome predictability, industry expertise, and high award enforceability characteristic of the third-party funding arrangements available in international arbitration.

Institutional Arbitration

This book provides an introduction to the mathematics needed to model, analyze, and design feedback systems. It is an ideal textbook for undergraduate and graduate students, and is indispensable for researchers seeking a self-contained reference on control theory. Unlike most books on the subject, Feedback Systems develops transfer functions through the exponential response of a system, and is accessible across a range of disciplines that utilize feedback in physical, biological, information, and economic systems. Karl Åström and Richard Murray use techniques from physics, computer science, and operations research to introduce control-oriented modeling. They begin with state space tools for analysis and design, including stability of solutions, Lyapunov functions, reachability, state feedback observability, and estimators. The matrix exponential plays a central role in the analysis of linear control systems, allowing a concise development of many

of the key concepts for this class of models. Åström and Murray then develop and explain tools in the frequency domain, including transfer functions, Nyquist analysis, PID control, frequency domain design, and robustness. They provide exercises at the end of every chapter, and an accompanying electronic solutions manual is available. Feedback Systems is a complete one-volume resource for students and researchers in mathematics, engineering, and the sciences. Covers the mathematics needed to model, analyze, and design feedback systems Serves as an introductory textbook for students and a self-contained resource for researchers Includes exercises at the end of every chapter Features an electronic solutions manual Offers techniques applicable across a range of disciplines

Spectral and High Order Methods for Partial Differential Equations ICOSAHOM 2014

This volume provides a concise overview of the legal principles and practice of international arbitration. It offers an accessible, straightforward introduction to the legal framework for international commercial arbitration, an introduction to international investment arbitration, and descriptions of the contemporary practice and tactics of international arbitration.

Attribution in International Investment Law

This publication contains a presentation of case laws rendered in jurisdictions having enacted the UNCITRAL Model Law on International Commercial Arbitration. In light of the large number of cases collected, the Commission requested a tool specifically designed to present selected information on the interpretation and application of the Model Law in a clear, concise and objective manner. This request originated the UNCITRAL Digest of Case Law on the UNCITRAL Model Law on International Commercial Arbitration. The purpose of the digest is to assist in the dissemination of information on the Model Law and further promote its adoption as well as its uniform interpretation and application. In addition, the digest is meant to help judges, government officials, arbitrators, practitioners and academics use more efficiently the case law relating to the UNCITRAL text.
