Hailed as “one of the best writers in the business” by Susan Elizabeth Phillips, multi-award-winning author Maggie Osborne delivers hilarious and heartrending tales of resilient women full of grit, pride, and dignity who shine through hard times. Now meet the most irresistible and independent heroine of them all, a woman called Low Down, who never had anything good happen to her until the day she asked for the one thing that only a man could give her. . . . As scruffy and rootless as the other prospectors searching for gold in the Rockies, Low Down wanted nothing in return for nursing a raggedy bunch through the pox. But when pressed to reveal her heart's wish, she admits, "I want a baby." Not a husband, not a forced marriage to the proud man who drew the scratched marble and became honor bound to marry her. To be sure, Max McCord was easy on the eyes, but he loved another woman and dreamed of a different life. Yet they agreed to a temporary marriage that could end only in disaster. But can this strange twist of fate lead to the silver lining that both have been searching for?

A year later, the old crew reaches out to Sun Wolf for his help. A string of rotten luck has befallen their latest campaign, and they have begun to suspect a curse. Their arrows break; their food rots; their tunnels cave in. They have heard rumors of Sun Wolf's magical abilities, and beg for his help. But when he goes after whatever is targeting his men, he finds himself up against the deadliest force he has ever encountered. The Promise of Jenny Jones

Eyes of Silver, Eyes of Gold is a story of romance and family conflicts set in Colorado in 1885. Cord Bennett, the son of his father's second marriage to a Cheyenne woman, is more than an embarrassment to his well-to-do family of ranchers and lawyers - they are ashamed and afraid of their black sheep. When Anne and Cord are found alone together, her father's fury leads to violence. Cord's family accepts that the fault is his. Can Anne and Cord use the freedom of being condemned for sins they didn't commit to make a life together? Or will their disapproving, interfering families tear them apart?

Naked Edge

The royal family is the original Coronation Street – a long-running soap opera with the occasional real coronation thrown in. Its members have become celebrities, like upmarket versions of film stars and footballers. But they have also become a byword for arrogance, entitlement, hypocrisy and indifference to the gigantic amount of public money wasted by them. The monarchy itself is an important part of our constitution with considerable influence on the kind of nation we are. Yet you will struggle to find much in the way of proper journalism that examines the monarchy in the way that their position and influence merit. Instead, we are fed a constant diet of sickeningly obsequious coverage which reports their activities with breathless and uncritical awe. In this book, former government minister Norman Baker argues that the British public deserves better than this puerile diet. And What Do You Do? is a hard-hitting analysis of the royal family, exposing its extravagant use of public money and the highly dubious behaviour of some among its ranks, whilst being critical of the knee-jerk sycophancy shown by the press and politicians. Baker also considers the wider role the royals play in society, including the link with House of Lords reform, and the constitutional position of the monarch, which is important given Prince Charles's present and intended approach. What makes this book so unusual is that Baker is himself a member of the Privy Council, the body that officially advises the monarch. By turns irreverent and uncompromising, And What Do You Do? asks important questions about the future of the world's most famous royal family.

A Stranger's Wife

This is one of the best books that I have read in a long time. It made me laugh, cry, and the way love won out in the end was wonderful. -- Beverly Willeford, Bev's Books (Highlands, TX) Joe Roark's three daughters have just learned that the only way they will inherit their father's ranch is to drive a herd of 1,200 longhorns to Dodge City, Kansas and sell them there. If they fail, his wife Lola inherits everything. Terrified, but knowing they will be penniless without their inheritance, the girls decide to drive the cattle. What follows is an unparalleled adventure filled with the raw wildness of nature, the force of sheer determination, and an unexpected love that will change one sister's life

The Dark Hand of Magic

Long Piddleton had always been wary of newcomers. But the quiet town was stunned when the first stranger was found dead, upended in a butt of ale in the cellar of the Men with a Load of Mischief. Then the second body appeared, swinging in place of the mechanical man above the door of the Jack and Hammer. Suddenly Long Piddleton had good reason to be wary of everyone! Its cozy pubs and inns with their polished pewter and blazing hearths had become scenes of the most bizarre crimes. Who were the victims? And who was the murderer? A stranger? A maniac? Or the disarmingly friendly man next door?

The King in Yellow

Digital technologies are spreading rapidly, but digital dividends--the broader benefits of faster growth, more jobs, and better services--are not. If more than 40 percent of adults in East Africa pay their utility bills using a mobile phone, why can't others around the world do the same? If 8 million entrepreneurs in China--one third of them women--can use an e-commerce platform to export goods to 120 countries, why can't entrepreneurs elsewhere achieve the same global reach? And if India can provide unique digital identification to 1 billion people in five years, and thereby reduce corruption by billions of dollars, why can't other countries replicate its success? Indeed, what's holding back countries from realizing the profound and transformational effects that digital technologies are supposed to deliver? Two main reasons. First, nearly 60 percent of the world's population are still offline and can't participate in the digital economy in any meaningful way. Second, and more important, the benefits of digital technologies can be offset by growing risks. Startups can disrupt incumbents, but not when vested interests and regulatory uncertainty obstruct competition and the entry of new firms. Employment opportunities may be greater, but not when the labor market is polarized. The internet can be a platform for universal empowerment, but not when it becomes a tool for state control and elite capture. The World Development Report 2016 shows that while the digital revolution has forged ahead, its 'analog complements'--the regulations that promote entry and competition, the skills that enable workers to access and then leverage the new economy, and the institutions that are accountable to citizens--have not kept pace. And when these analog complements to digital investments are absent, the development impact can be disappointing. What, then, should countries do? They should formulate digital development strategies that are much broader than current information and communication technology (ICT) strategies. They should create a policy and institutional environment for technology that fosters the greatest benefits. In short, they need to build a strong analog foundation to deliver digital dividends to everyone, everywhere.

Brides of Prairie Gold

Toward the end of the year 1920 the Government of the United States had practically completed the programme, adopted during the last months of President Winthrop's administration. The country was apparently tranquil. Everybody knows how the Tariff and Labour questions were settled. The war with Germany, incident on that country's seizure of the Samoan Islands, had left no visible scars upon the republic, and the temporary occupation of Norfolk by the invading army had been forgotten in the joy over repeated naval victories, and the subsequent ridiculous plight of General Von Gartenlaube's forces in the State of New Jersey. The Cuban and Hawaiian investments had paid one hundred per cent and the territory of Samoa was well worth its cost as a coaling station. The country was in a superb state of defence. Every coast city had been well supplied with land fortifications; the army under the parental eye of the General Staff, organized according to the Prussian system, had been increased to 300,000 men, with a territorial reserve of a million; and six magnificent squadrons of cruisers and battle-ships patrolled the six stations of the navigable seas, leaving a steam reserve amply fitted to control home waters. The gentlemen from the West had at last been constrained to acknowledge that a college for the training of diplomats was as necessary as law schools are for the training of barristers; consequently we were no longer represented abroad by incompetent patriots. The nation was prosperous; Chicago, for a moment paralyzed after a second great fire, had risen from its ruins, white and imperial, and more beautiful than the white city which had been built for its plaything in 1893. Everywhere good architecture was replacing bad, and even in New York, a sudden craving for decency had swept away a great portion of the existing horrors. Streets had been widened, properly paved and lighted, trees had been planted, squares laid out, elevated structures demolished and underground roads built to replace them. The new government buildings and barracks were fine bits of architecture, and the long system of stone quays which completely surrounded the island had been turned into parks which proved a god-send to the population. The subsidizing of the state theatre and state opera brought its own reward. The United States National Academy of Design was much like European institutions of the same kind. Nobody envied the Secretary of Fine Arts, either his cabinet position or his portfolio. The Secretary of Forestry and Game Preservation had a much easier time, thanks to the new system of National Mounted Police. We had profited well by the latest treaties with France and England; the exclusion of foreign-born Jews as a measure of self-preservation, the settlement of the new independent negro state of Suanee, the checking of immigration, the new laws concerning naturalization, and the gradual centralization of power in the executive all contributed to national calm and prosperity. When the Government solved the Indian problem and squadrons of Indian cavalry scouts in native costume were substituted for the pitiable organizations tacked on to the tail of skeletonized regiments by a former Secretary of War, the nation drew a long sigh of relief. When, after the colossal Congress of Religions, bigotry and intolerance were laid in their graves and kindness and charity began to draw warring sects together, many thought the millennium had arrived, at least

in the new world which after all is a world by itself.
