This book constitutes the refereed proceedings of the 5th European Conference on Software Architecture, ECSA 2011, held in Essen, Germany, in September 2011. The 13 revised full papers presented together with 24 emerging research papers, and 7 research challenge poster papers were carefully reviewed and selected from over 100 submissions. The papers are organized in topical sections on requirements and software architectures; software architecture, components, and compositions; quality attributes and software architectures; software product line architectures; architectural models, patterns and styles; short papers; process and management of architectural decisions; software architecture run-time

aspects; ADLs and metamodels; and services and software architectures.

What increasingly affects all of us, whether professional planners or individuals preparing for a better future, is not the tangibles of life—bottom-line numbers, for instance—but the intangibles: our hopes and fears, our beliefs and dreams. Only stories—scenarios—and our ability to visualize different kinds of futures adequately capture these intangibles. In *The Art of the Long View*, now with the addition of an all-new User's Guide, Peter Schwartz outlines the "scenaric" approach, giving you the tools for developing a strategic vision within your business. Schwartz describes the new techniques, originally developed within Royal/Dutch Shell, based on many of his firsthand scenario exercises with the world's leading institutions and companies, including the White House, EPA, BellSouth, PG&E, and the International Stock Exchange.

IBM's® Practical, Hands-On Guide to Supporting and Administering Lotus Notes and Lotus Domino This is the only book that focuses entirely on the specific technical, desk-side, and infrastructure issues that support professionals and administrators encounter when implementing and running Lotus Notes in production environments. Authored by one of IBM's top Lotus experts, it draws on the firsthand experiences of IBM professionals working in hundreds of client environments. Mark Elliott has created a true "encyclopedia" of proven resolutions to common problems and has streamlined processes for infrastructure support. Elliott systematically addresses support solutions for all recent Lotus Notes and Domino environments. Survival Guide for Lotus Notes and Domino Administrators is organized for rapid access to specific solutions in three key areas: client setup, technical support, and client software management. It brings together best practices for

planning deployments, managing upgrades, addressing issues with mail and calendars, configuring settings based on corporate policies, and optimizing the entire support delivery process. Along the way, Elliott illuminates the administrative and support implications of the latest enhancements to Lotus Notes and Lotus Domino, in areas ranging from messaging to plug-in support. Whatever your role in managing, administering, or supporting IBM Lotus technologies, this book will help you respond more quickly, efficiently, and effectively—reducing support costs as you increase customer satisfaction. Coverage includes An overview to key software changes introduced in Release 8.0 Resolutions to dozens of error messages and other obscure issues Using the “Smart Upgrade” toolkit to automate upgrades Implementing policies to manage client settings and reduce administrative overhead Optimizing Lotus Notes performance and avoid user frustration Making the most of technical support tools and plug-ins Finding technical support and patches on the IBM developerWorks website Configuring Lotus Notes and supporting common activities

In this book, Microsoft Program Manager Zac Woodall shows developers and IT pros how to use the new template architecture in Access 2007 to deliver rich data-centric tracking applications. He explains what Access templates are, how they are used, and how to create them. His discussion of template design and customization includes details that every template designer should know, such as design guidelines, best practices, and advice for overcoming technical hurdles. Advanced topics include personalization, designing for SharePoint, template security, enterprise deployment, and a detailed breakdown of the template (.accdt) file format. In only 256 pages, this book helps the reader to: Design Access 2007 Templates Build Enterprise Templates for Access 2007 Implement Secure Access 2007 Templates This book comes with a bonus chapter "Customizing the Field Templates Task Pane" and five bonus sample templates, which readers can use in their own projects (Access Add-In, Access Ribbon XML, Contacts Modified, Table Creator, and Template Maker). These valuable bonus materials are available as a web site download.

The first book to address the underlying premises of systems integration and how to exposit them into a practical and productive manner, this book prepares systems managers and systems engineers to consider their decisions in light of systems integration metrics. The book addresses two questions: Is there a way to express the interplay of human actions and the result of system interactions of a product with its environment, and are there methods that combine to improve the integration of systems? The systems integration theory and integration frameworks proposed in the book tie General Systems Theory with practice.

Welcome to the proceedings of ECOOP 2009! Thanks to the local organizers for working hard on arranging the conference — with the hard work they put in, it was a great success. Thanks to Sophia Drossopoulou for her dedicated work as PC Chair in assembling a fine scientific program including forward-looking keynotes, and for her efforts to reduce the environmental impact of the PC meeting by replacing a physical meeting with a virtual meeting. I would also like to thank James Noble for taking the time and effort to write up last year's banquet speech so that it could be included in this year's proceedings. One of the strong features of ECOOP is the two days of workshops preceding the main conference that allows intense interaction between participants. Thanks to all workshop organizers. Last year's successful summer school tutorials were followed up this year with seven interesting tutorials. Thanks to the organizers and speakers. This year's Dahl-Nygaard award honored yet another pioneer in the field, namely, David Ungar for his contributions including Self. I appreciate his efforts in providing us with an excellent award talk. The world is changing and so is ECOOP. Please contemplate my short note on the following pages entitled On Future Trends for ECOOP.

"The US Environmental Protection Agency (EPA), Environmental Research Laboratory - Corvallis, Oregon (ERL-C), established an Interagency Agreement with the US National Oceanic and Atmospheric Administration (NOAA), National Geophysical Data Center (NGDC) in September 1990. This agreement began a five year cooperative effort to develop a geographic database for modeling terrestrial climate biosphere interactions in support of EPA's Global Climate Research Program. Although performing specific tasks under contract to the US EPA, NGDC independently operates a Global Change Database Program (GCDP) as part of its NOAA mission. Considerable synergism therefore exists between the tasks performed for the JPA under the "Global Ecosystems Database Project," and other activities supporting NOAA Climate and Global Change Program"--Preface.

Just like vinyl LPs, static sites are making a comeback, evidenced by the wide array of static-site generators now available. This practical book shows you hands-on how to build these simple sites for blogs and other use cases, and how to make them more powerful. In the process, you'll work with some of today's more mature and popular static-site generators. Authors Raymond Camden and Brian Rinaldi explain the advantages of using static-site generators for building fast and secure sites. Web and frontend designers and developers will also explore methods for adding dynamic elements and for migrating an existing CMS to a static site. Build a basic four-page static site with the Harp generator Create a simple blog with Jekyll Develop a documentation site with Hugo by generating site files and creating the layout Add dynamic elements, such as forms, comments, and search Integrate a CMS with tools such as CloudCannon and Netlify CMS Use one of several options to deploy your static files Learn methods for moving an existing CMS to a static site
