Figures & Fictions

In the tradition of Randall Kennedy's *Nigger* and Shelby Steele's *The Content of Our Character*, *Acting White* demonstrates how the charge that any African-American who is successful, well mannered, or well educated is "acting white," is a slur that continues to haunt blacks. Ron Christie traces the complex history of the phrase, from Uncle Tom's Cabin to the tensions between Martin Luther King, Jr., and Malcolm X to Bill Cosby's controversial NAACP speech in 2004. The author also writes candidly of being challenged by black students for his "acting white," and also of being labeled a race traitor in Congress by daring to be Republican. This lucid chronicle reveals how this prevalent put-down sets back much of the hard-earned progress for all blacks in American society. Deftly argued and determinedly controversial, this book is certain to spur thoughtful discussion for years to come.

Master storyteller Sonya Hartnett crafts a magical and moving fable about war and redemption . . . and what it means to be free. When the Germans attack their Romany encampment during World War II, Andrej and his younger brother, Tomas, flee through a ravaged countryside under cover of darkness, guarding a secret bundle. Their journey leads to a bombed-out town, where the boys discover a hidden wonder: a zoo filled with creatures in need of hope. Like Andrej and Tomas, the animals--wolf and eagle, monkey and bear, lioness and seal, kangaroo and llama-- have stories to share and a mission to reclaim their lives.

With the advance of science and technology, there have been breakthroughs in the field of classical research and methods of map projection. Among these, computer science and space science have had the greater influence upon the field of research and the formation of a working body of map projection, developing them in breadth and depth. This book reflects several aspects of the development of modern mathematical cartography, especially the theory and methods of map projection transformation. Map projection transformation is an area of research in mathematical cartography newly developed over the last 25 years. It is widely used in surveying and computer-assisted cartography, data processing for information systems, and the transformation of data from space, remote sensing, and other space sciences. The development of map projection transformation not only expands new areas of research on mathematical cartography, but it also further develops the applied area with the creation and application of map projection transformation software and mapping mathematics bases on the computer.

The ultimate insider's guide to Los Angeles Features interesting and unusual places not found in traditional travel guides 'In Los Angeles, everyone is a star.' - Denzel Washington For more than a century, seekers of sun and celebrity from around the world have flocked to this sprawling metropolis on the Pacific, which Dorothy Parker once described as '72 suburbs in search of a city.' But beyond the red-carpet reputation and Tinseltown trappings is a west coast wonderland teeming with unexpected cultural experiences, iconic architecture, gorgeous open spaces, quirky museums, hidden vistas, unconventional art, and obscure stories about the starlets, moguls, personalities, and players who have made Los Angeles their playground. This unusual guidebook explores 111 of the city's most interesting and unknown places and experiences: wander a serpentine path in a spiritual quest of your own making; channel your inner cowboy at a tried and true honky tonk bar; pay homage to the Dude at the bungalow where the big Lebowski lived; turn your car tires into musical instruments on the country's only 'musical' road; sleep with the ghosts of Marilyn Monroe and Charlie Chaplin; view a constellation of stars

more vivid than anything Hollywood Boulevard has to offer. From the San Gabriel Mountains to the Pacific Ocean, Angelenos and visitors will fall in love with the real Los Angeles. Adventures beckon. Surprises await. Just imagine how much more scintillating your dinner-party storytelling will be »In Los Angeles, everyone is a star.« - Denzel Washington Seit mehr als einem Jahrhundert strömen Menschen auf der Suche nach Sonne und Prominenz in die riesige Metropole am Pazifik. Doch findet sich hinter dem ganzen Glamour ein unerwartetes Wunderland, in dem es von beeindruckender Architektur, hinreißenden Parks, schrulligen Museen, versteckten Aussichtspunkten, unkonventioneller Kunst und unbekanntem Geschichten über Starlets, Film Mogule und Playboys nur so wimmelt. Laurel Moglen has worked for NPR stations in Los Angeles and created podcasts for organizations and companies including Travelocity covering what to do, see, and eat in cities around the US. Understanding the nuances of what gives a place its identity is her passion, and nowhere is it more fascinating, complicated, and mercurial than in Los Angeles, her home for 20 years. Laurel Moglen hat für freie Radiosender in Los Angeles gearbeitet und Podcasts für Organisationen und Unternehmen produziert, darunter auch für die Website »Travelocity«, die Tipps für Restaurants, Sehenswertes und Ausflüge in verschiedenen amerikanischen Städten gibt. The Lyrics

Instead of Going Out of Your Mind, Get into His. The only American to study and work with the renowned Barbara Woodhouse, Brian Kilcommons solves all those

"bad dog" problems that drive owners crazy-and shows you how to raise a puppy into a happy, perfectly behaved dog. The trick is to understand how dogs think, read their body language, and, with the secrets Kilcommons shares in this book, be "fun, fair, and firm." A dog-training guide that gives you immediate results even with an adult dog, this manual trains you, as it gives owners everything they need and everything dogs need to become Good Owners, Great Dogs Includes specific tips on how to: * housebreak both puppies and adult dogs * teach your dog to come to you regardless of what he's doing * end annoying habits like jumping, food stealing, and barking * prevent aggression and, in many cases, stop it after it has become a problem * use games to teach your dog to obey and much more.

This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. AN AMAZING NEW VERSION OF THE PHOTOSHOP BOOK THAT BREAKS ALL THE RULES! Scott Kelby, Editor and Publisher of Photoshop User magazine—and the best-selling photography techniques author in the world today—once again takes this book to a whole new level as he uncovers more of the latest, most important, and most useful Adobe Photoshop techniques for photographers. This update to his award-winning, record-breaking book does something for digital photographers that's never been done before—it cuts through the bull and shows you exactly

“how to do it.” It’s not a bunch of theory; it doesn’t challenge you to come up with your own settings or figure it out on your own. Instead, Scott shows you step by step the exact techniques used by today’s cutting-edge digital photographers, and best of all, he shows you flat-out exactly which settings to use, when to use them, and why. LEARN HOW THE PROS DO IT The photographer’s workflow in Photoshop has evolved greatly over time, and in this current version of book you’ll wind up doing a lot of your processing and editing in Photoshop’s Adobe Camera Raw feature (whether you shoot in RAW, JPEG or TIFF—it works for all three). That’s because for years now, Adobe has been adding most of Photoshop’s new features for photography directly into Camera Raw itself. Since today’s photography workflow in Photoshop is based around Camera Raw, about one third of this book is about mastering Camera Raw like a pro. Plus, you’ll learn:

- The sharpening techniques the pros really use.
- The pros’ tricks for fixing the most common digital photo problems fast!
- The most useful retouching techniques for photographers, and how to make “impossible” selections like wind-blown hair (it’s easy, once you know the secrets), and how to use Layers like a pro.
- How to seamlessly remove distracting junk from your images.
- How to stitch panoramas, how to process HDR for a realistic look, and tricks for pulling way more out of your images than you ever dreamed possible.
- The latest Photoshop special effects for photographers (there’s a whole chapter just on these!).
- A host of shortcuts, workarounds, and slick “insider” tricks to send your productivity through the roof!

Scott includes a special chapter with his own workflow, from start to finish, plus,

each chapter ends with a Photoshop Killer Tips section, packed with time-saving, job-saving tips that make all the difference. He also provides four bonus chapters, along with the images used in the book for download so you can follow right along. If you're ready to learn all the "tricks of the trade"—the same ones that today's leading pros use to correct, edit, retouch, and sharpen their work—then you're holding the book that will do just that.

Excursion of the Putnam Phalanx to Boston, Charlestown, and Providence (Oct 4-7, 1859)

Introduction by Michael Werner (2013), Editor in Chief of Two Way Lens: Oliver Weber's new and evolving series Social Life at Beach is a wonderful documentary about the touristic life on the Canary Islands of Spain. Every year hundreds of thousands of tourists, mostly from Germany, England and meanwhile also from Russia, take over the Canary Islands and turn them into the perfect object for observation on Social Life at Beach. La Gomera based photographer Oliver Weber made this subject the theme for his newest series. The result are captivating photographs that show this bizarre, surreal, sometimes melancholic and always fascinating world of tourism with all its side effects and cliches. The series was created on the Canary Island of Tenerife. This is an area whose economy is mainly funded by all-inclusive tourism. And is also particularly frequented by long-term

vacationers, who want to escape the long, cold and grey European winter. Arrive at the airport, then a guided bus ride of up to one hour to the hotel complex. There, unpack the suitcases, put the swimwear on and head to the beach. In the evenings, dress-up for the buffet, then afterwards perhaps, a drink at the bar and then off to bed to be ready to follow the same procedure the next day. Day by day by day. The freedom of the all-inclusive holiday lies precisely in the lack of freedom that you have outside the limitations provided by what the hotel has chosen to include. The various little hassles of daily life and work are taken away and so there is a lot of time to be spent lavishly on having a very organized time with nothing to do. This is one way to spend a holiday! Review by Grzegorz K. Kosmala (2013), Editor in Chief of doc! Photo Magazine: Social Life at Beach by Oliver Weber (doc! #11) is coming back as a book! Beach and its surroundings - these are the places which serve Oliver as fields of surveillance. What one can observe there? Human behaviour. Oliver is a patient observer. From hundreds or sometimes thousands of observed objects he is able to pick out those which carry a good deal of humour or make you think. By his photos, Oliver shows us a picture of a today's beach-tourist. The beach reveals uncommon human instincts. After getting rid of clothes, people get rid of barriers regulating their norms of behaviour in their everyday life at home, work etc. The pictures Oliver gives us intrigue. But simultaneously - they are like a warning: mind your behaviour in case Oliver is nearby with his camera ready to shot. Quotes by: Bill Gates, Linda Gerber, Ernest Hemingway, Gilbert K. Chesterton, Winston Churchill, Dean Martin, Gustave

Flaubert, Rachel Carson, Justin Timberlake, Klaus Kinski, Marilyn Monroe, Elvis Presley, Woody Allen, Mark Batterson, Isaac Newton, Ron White, Woody Allen, Madeleine Albright, Frank Sinatra, Russell Baker. 500 Poses for Photographing Women

The unemployment rate is 10 percent. Taxes consume a huge portion of the working people's paychecks. Corruption dominates every level of the Government. The highest levels seek to turn control of the country over to the United Nations through the creation of a National Police force of the power-hungry Homeland Security, and it strips basic rights from the populace. David, an automotive technician, is a family man whose life seems to get worse by the day when he is placed in prison for a crime he did not commit. James is a Petty Officer on the aircraft carrier USS Jefferson. He longs for his childhood home in Alaska when times were more laidback and peaceful. His life becomes complicated when he discovers a spy aboard the ship. Benjamin, a divorced man with grown children, has been stockpiling supplies in an underground bunker in his home in Alaska. He senses something momentous is on the horizon but knows not what. The situation in the United States worsens beyond imagination, chaos ensues, and the three men race against time to find safety for themselves and their families in a world gone mad.
