### Decreta Regni Mediaevalis Hungariae

With a concise, focused review of orthodontic concepts and current clinical

information, including diagnosis, treatment planning, and clinical treatment, MOSBY'S ORTHODONTIC REVIEW is the resource you need to achieve the best results for success on competency examinations as well as excellent clinical outcomes. From foundational concepts to more subjective areas of treatment planning and clinical treatment, this book includes a wealth of information from distinguished educators, recent graduates, and practicing professionals to help you prepare for the NBDE, Part II and the ABO written and clinical examinations. This title includes additional digital media when purchased in print format. For this digital book edition, media content is not included. Content is designed to prepare you for the NBDE, Part II and the ABO written and clinical examinations to help you achieve the best results. Detailed illustrations provide a visual guide to conditions, techniques, diagnoses, key concepts, and more with case study photos that detail treatment from a patient's initial exam to completion. Proven question and answer format covers the key information for each topic and helps prepare you for certification exams.

## **The Economy of Medieval Hungary**

## **Slavery in Árpád-era Hungary in a Comparative Context**

In the near future, anarchists set off a global pulse that shorts out electrical connections—trapping Private Danny Kelso, Corporal Kate Wade and their platoon inside remote-piloted robots called the Tin Men—and as chaos descends, the Tin Men must decide if they want to stay true to their mission or save themselves.

## **Prosecutorial Misconduct**

## **Hobson-Jobson**

For undergraduate public relations, new media, and marketing courses. The first text to teach public relations through the lens of marketing. Marketing Public Relations breaks from the norm by presenting public relations using a marketing, rather than a communications studies or journalism, approach. This text recognizes the similarities between PR, word-of-mouth, and social networking media and creates a framework for constructing marketing strategies that incorporate these highly credible and cost-effective tools. Students will first learn the theory and then how to apply it in order to "do Marketing Public Relations" in the real world

## **The Truth about Seventh-Day Adventism**

Provides brainteasers to solve in a blackboard scene, hundreds of tiny objects to ponder in a classification puzzle, Rube Goldberg-type contraptions to figure out, and a nature spread that encourages learning through observation.

How do judges sentence? In particular, how important is judicial discretion in sentencing? Sentencing guidelines are often said to promote consistency, but is consistency in sentencing achievable or even desirable? Whilst the passing of a sentence is arguably the most public stage of the criminal justice process, there have been few attempts to examine judicial perceptions of, and attitudes towards, the sentencing process. Through interviews with Scottish judges and by presenting a comprehensive review and analysis of recent scholarship on sentencing – including a comparative study of UK, Irish and Commonwealth sentencing jurisprudence – this book explores these issues to present a systematic theory of sentencing. Through an integration of the concept of equity as particularised justice, the Aristotelian concept of phronesis (or 'practical wisdom'), the concept of value pluralism, and the focus of appellate courts throughout the Commonwealth on sentencing by way of 'instinctive synthesis', it is argued that judicial sentencing methodology is best viewed in terms of a phronetic synthesis of the relevant facts and circumstances of the particular case. The author concludes that sentencing is best conceptualised as a form of case-orientated, concrete and intuitive decision

making; one that seeks individualisation through judicial recognition of the profoundly contextualised nature of the process.

Gene Control offers a current description of how gene expression is controlled in eukaryotes, reviewing and summarizing the extensive primary literature into an easily accessible format. Gene Control is a comprehensively restructured and expanded edition of Latchman's Gene Regulation: A Eukaryotic Perspective, Fifth Edition. The first part of the book deals with the fundamental processes of gene control at the levels of chromatin structure, transcription, and post-transcriptional processes. Three pairs of chapters deal with each of these aspects, first describing the basic process itself, followed by the manner in which it is involved in controlling gene expression. The second part of the book deals with the role of gene control in specific biological processes. Certain chapters deal with the importance of gene control in cellular signaling processes and for normal development of the embryo. Another chapter discusses the key roles played by gene-regulatory processes in the specification of differentiated cell types such as muscle cells and neurons. The final chapters discuss the consequences of errors in gene control; the relationship between gene misregulation and human diseases, especially cancer; and potential therapies designed specifically to target particular levels of gene control. Gene Control will be of value to students in biological sciences, as well as to scientists

and clinicians interested in how genes are regulated in health and disease.

The idea of a NATO Science Committee Institute on "Materials for Advanced Batteries" was suggested to JB and DWM by Dr. A. G. Chynoweth. His idea was to bring together experts in the field over the entire spectrum of pure research to applied research in order to familiarize everyone with potentially interesting new systems and the problems involved in their development. Dr. M. C. B. Hotz and Professor M. N. Ozdas were instrumental in helping organize this meeting as a NATO Advanced Science Institute. An organizing committee consisting of the three of us along with W. A. Adams, U. v Alpen, J. Casey and J. Rouxel organized the program. The program consisted of plenary talks and poster papers which are included in this volume. Nearly half the time of the conference was spent in study groups. The aim of these groups was to assess the status of several key aspects of

batteries and prospects for research opportunities in each. The study groups and their chairmen were: Current status and new systems J. Broadhead High temperature systems W. A. Adams Interface problems B. C. H. Steele Electrolytes U. v Alpen Electrode materials J. Rouxel These discussions are summarized in this volume. We and all the conference participants are most grateful to Professor J. Rouxel for suggesting the Aussois conference site, and to both he and Dr. M. Armand for handling local arrangements.

## **Philosophical Reflections for Educators**

The Illuminated Chronicle was composed in 1358 in the international artistic style at the royal court of Louis I of Hungary. Its text, presented here in a new edition and translation, is the most complete record of Hungary's medieval historical tradition, going back to the eleventh century and including the mythical past of its people. The pictures in this manuscript—formerly known as the Vienna Chronicle—are not merely occasional illustrations added to some exemplars, but text and image are closely connected and mutually related to each other, to qualify it as a proper “illuminated chronicle”. The artistic value of the miniatures is quite high, and the characters are drawn with detail and with a knowledge of anatomy. Forty-two of the miniatures are included in the present volume. A full color facsimile will be accessible online. The 147 pictures are an invaluable source of information on late medieval cultural history, costume, and court life. In a historiographical context, The Illuminated Chronicle is an attempt at the popularization of the national history and a systematic appeal to circles beyond the old monastic-clerical audience. The Illuminated Chronicle (*Chronica de gestis Hungarorum e codice picto saec. xiv.*) is the ninth volume in the Central European Medieval Texts, a Latin-English bilingual series.

This volume brings together a set of key studies on the history of medieval Central Europe (Bohemia, Hungary, Poland), along with others specially commissioned for the book or translated, and a new introduction. This region was both an area of immigration, and one of polities in expansion. Such expansion included the settlement and exploitation of previously empty lands as well as rulers' attempts to

incorporate new territories under their rule, although these attempts did not always succeed. Often, German immigration has been prioritized in scholarship, and the medieval expansion of Central Europe has been equated with the expansion of Germans. Debates then focused on the positive or negative contribution of Germans to local life, and the consequences of their settlement. This perspective, however, distorts our understanding of medieval processes. On the one hand, Central Europe was not a passive recipient of immigrants. Local rulers and eventually nobles benefited from and encouraged immigration; they played an active role. On the other hand, German immigration was not a unified movement, and cannot be equated with a *drang nach osten*. Finally, not just Germans, but also various Romance-speaking and other immigrant groups settled in Central Europe. This volume, therefore, seeks to present a more complex picture of medieval expansion in Central Europe.

In *The Chasm Companion*, The Chasm Group's Paul Wiefels presents readers with a new analysis of the ideas introduced in bestselling author Geoffrey Moore's classic books, *Crossing the Chasm* and *Inside the Tornado*, and focuses on how to translate these ideas into actionable strategy and implementation programs. This step-by-step fieldbook is organized around three major concepts: how high-tech markets develop, creating market development strategy, and executing go-to-

market programs based on the strategy.

## **Last Hope for Survival**

By studying the work of hundreds of the most original and effective business minds, the authors present a common architecture that illuminates exceptional analysis and creative performance. 2 x 2 Thinking is characterized by a fundamental appreciation for the dynamic and complex nature of business. The best strategists go out of their way to tackle dilemmas rather than merely solve problems. They use opposition, creative tension, iteration and transcendence to get to the heart of issues and involve critical others in finding the best solutions. The authors demonstrate how to apply the 2 x 2 approach to a wide range of important business challenges.

For young Fortnite players, this might be the ultimate reading experience—a graphic novel adventure with hundreds of full-color images that takes them into the world they love best! The mission is simple: Four kids must save what's left of humanity by crossing a Husk-infested landscape to a secret government installation packed with volatile rocket fuel and state of the art security systems. Then, they must launch a satellite into space before a gigantic maelstrom smashes them to bloody splinters. If it were easy, it wouldn't be Fortnite. When 98% of the

world's population disappears in the blink of an eye, the isolated survivors, four teenagers named Cody, Sarah, Idris, and Kiki each cower in the ruins of their homeland, pounded by strange storms and hunted by ravenous monsters. One by one they discover a hopeful sign of life from afar, a Beacon, that calls on to them to keep moving in search of answers. In their pursuit of the source of this signal, they find each other and struggle to get past their differences. It won't be safe or easy, but their survival, and that of humanity, relies on them learning to work together in search of answers. They are, after all, humanity's last hope. Will they find a way to survive and start again in the aftermath of the deadly storm, or die trying?

CHILI HOT GMAT MATH REVIEW will help readers develop the skills and mindset needed to score high on the quantitative section of the GMAT exam. Each hand-selected problem comes with a Classification, Snapshot, and Chili Rating. Classification serves to identify each problem according to category or sub-category. Snapshot highlights why that particular problem was chosen, including the underlying problem-solving principle or strategic approach. Chili Rating helps candidates gauge the estimated difficulty level of a given problem. A single chili indicates that the estimated difficulty level of a given problem is "mild" (500 to 590 difficulty level), two chilies spell "hot" (600 to 690 difficulty level), and three chilies signal "very hot" (700 or above difficulty level). By studying problems of varying difficulty, candidates will learn to maintain discipline on easy but tricky math problems and also to exercise flexibility when deciding on multiple approaches and time-saving shortcuts for use in tackling harder, more involved problems. Note to readers: This book contains the excerpted math sections from the parent title "Chili Hot GMAT: 200 All-Star Problems to Get You a High Score on Your GMAT Exam."

### **Criminal Sentencing as Practical Wisdom**

"This is the essential text for Crown counsel who need to operate within the rules of law and for defence counsel who need to identify when prosecutorial misconduct occurs and the remedies that are available. This comprehensive and thought-provoking treatise covers prosecutorial misconduct at every stage of the criminal process and impartially and objectively identifies its elements with specific reference to case law. In addition, Prosecutorial Misconduct provides expert commentary on the tort of malicious prosecution and related civil actions against prosecutors. The second edition updates, expands, re-writes and re-organizes the text to deal with some very substantial developments in the law since the first edition. The Supreme Court of Canada has been very active in addressing a number of areas of prosecutorial misconduct, including malicious prosecution (*Miazga v. Kvello Estate*; Charter torts (*Henry v. B.C.*); plea bargaining (*R. v. Nixon*); and abuse of process (*R. v. Anderson*). Those cases and others have led to

a significant volume of new litigation in Canada. Like the previous edition, this one also covers significant developments abroad, particularly Australia, the United Kingdom, and the United States"--Provided by publisher.
