Science Made Stupid

Whether it's software, a cell phone, or a refrigerator, your customer wants - no, expects - your product to be easy to use. This fully revised handbook provides clear, step-by-step guidelines to help you test your product for usability. Completely updated with current industry best practices, it can give you that all-important marketplace advantage: products that perform the way users expect. You'll learn to recognize factors that limit usability, decide where testing should occur, set up a test plan to assess goals for your product's usability, and more.

A wake-up call to the lies and crimes of Bush and the neo-cons - in war, voting, media, taxes, morals, health, schools, laws, liberties "Brutally honest, well-researched strongly recommended." - Midwest Book Review. This Brief on the Bush Presidency highlights the yawning gap between Bush rhetoric and reality, marshalling the key facts on issues in the news, plus the background played down by mainstream media. Bush's favorite for Iraqi head of state, Ahmed Chalabi, a convicted felony embezzler and a CIA asset, will turn over Iraq's oil industry to campaign contributors like Cheney's Halliburton. Saddam Hussein got his start as a CIA asset too. By now everyone knows about the Iraq WMD hoax- but not the evidence of an even scarier 9/11 cover-up. "We have to look the truth in the face, take a deep breath, and draw the line to defend our values as a nation," says author Cox. If information is power, he delivers the information that is a source of empowerment.

You're Not Stupid! Get the Truth

This textbook provides a wide-ranging introduction to the use and theory of linear models for analyzing data. The author's emphasis is on providing a unified treatment of linear models, including analysis of variance models and regression models, based on projections, orthogonality, and other vector space ideas. Every chapter comes with numerous exercises and examples that make it ideal for a graduate-level course. All of the standard topics are covered in depth: ANOVA, estimation including Bayesian estimation, hypothesis testing, multiple comparisons, regression analysis, and experimental design models. In addition, the book covers topics that are not usually treated at this level, but which are important in their own right: balanced incomplete block designs, testing for lack of fit, testing for independence, models with singular covariance matrices, variance component estimation, best linear and best linear unbiased prediction, collinearity, and variable selection. This new edition includes discussion of identifiability and its relationship to estimability, different approaches to the theories of testing parametric hypotheses and analysis of covariance, additional discussion of the geometry of least squares estimation and testing, new discussion of models for experiments with factorial treatment structures, and a new appendix on possible causes for getting test statistics that are so small as to be suspicious. Ronald Christensen is a Professor of Statistics at the University of New Mexico. He is a Fellow of the American Statistical Association and the Institute of Mathematical Statistics.

Frank Chin is perhaps the most instantly recognizable voice in Chinese American writing today. A self-proclaimed "transcendent Chinaman pagan heathen barbarian," Chin searches out (or stumbles on) the right people and situations, vividly recording the outcome in distinctively American terms. Here are six of his best essays, spanning the past forty years. Making his way across the U.S. to Cuba, Chin is arrested as an American spy some time between Castro's revolution and the missile crisis. He meets Ben Fee, the man who integrated San Francisco, and is introduced to Southeast Asian gangs and culture in San Diego. He discovers Chinese bachelor society along the California-Mexico border and travels to Singapore, where he speculates on the fear and suppression of Chinese culture among Chinese Singaporeans. Back at the home front, he encounters the new white racism along Interstate 5 during the Gulf War.

The School Journal

This book will help you to pass the Pharmacy licensing exam. The unique format

differs from all other review and test preparation texts. The primary intent is to serve as a rapid review of Pharmacy principles and serve as a study aid to improve performance on the Pharmacy licensing examination. With this goal in mind, the text is written in rapid-fire, question/answer format. The student receives immediate gratification with a correct answer. Questions themselves often contain a 'pearl' reinforced in association with the question/answer. Emphasis has been placed on evoking both trivia and key facts that are easily overlooked, are quickly forgotten, and yet somehow always seem to appear on Pharmacy exams.

Based on interviews with pastors of growing churches, as well as personal experience, this book identifies the most common mistakes pastors make that keep otherwise healthy churches from reaping the harvest God has prepared. Each chapter spotlights a common mistake, gives real-life examples, uses a generous dose of humor, and provides a practical course of action to recover from the error. The book draws from the experience of Seacoast Church as well as pastors such as Craig Groeschel, Chris Hodges, Perry Nobel, Mark Batterson, Dave Ferguson, Scott Chapman, Dino Rizzo, Ron Hamilton, and Dave Browning, Church leaders will be encouraged to realize that they are not the only ones who struggle, and that turning their situation around may not be as daunting a task as they think. This is a field guide for the common pastor based on actual churches of all sizes.

Why Smart People Do Stupid Things addresses a question that's frequently on our minds. When Bill Clinton's affair with Monica Lewinsky was exposed many people were utterly astounded. How could he? Most of us were asking. Answers aren't easy to come by because we have spent considerable time building on our strengths to the neglect of our dark side. We aren't only puzzled when we see friends, co-workers, or public leaders engage in stupid, unseemly, unexplainable acts, we are personally threatened by it. If them, why not still others or perhaps ourselves. This book looks at numerous examples of apparently unexplainable stupidities with particular focus upon Richard Nixon and Bill Clinton. Every mindless act doesn't turn out wrong. There are occasions when the outcome greatly benefits us. On the other hand, there are many times when the result goes against us to our disadvantage if not to the point of tragedy. Why? This book addresses the complex issues involved in making rational decisions, including excusable error. Analyses are offered in a readily understandable style. Potential solutions are described. The topic is of vital interest to us individually as well as to the nation.

Why Smart People Do Stupid Things

Secrets are threatening to ruin everything—can Stevie, Carole, and Alex's friendship survive? Lisa Atwood and her boyfriend, Alex Lake, are finally back on track—even if she's still keeping some secrets. Carole Hanson's slipping grades could take her away from her beloved Pine Hollow Stables unless she does something drastic. Callie Forester, the congressman's daughter who recently moved to Willow Creek with her brother, Scott, has things she doesn't want folks back home in Washington to know. When someone close to her betrays her confidence, Callie doesn't know how she'll ever be able to trust anyone again. And now a terrible fight could end Lisa and Carole's relationship for good. Stevie Lake refuses to take sides . . . until she's caught up in a tangled web of lies and deception and has to choose between Lisa and her twin brother, Alex. Can their bonds survive the fallout?

Why Smart People Do Stupid Things: Revised and Updated

The unique format of this book differs from all other review and test preparation

texts. The primary intent of the book is to serve as a study aid to improve performance on paramedic certification and refresher examinations. With this goal in mind, the text is written in rapid-fire, question/answer format. The student receives immediate gratification with a correct answer. Misleading or confusing multiple-choice 'foils' are not provided, thereby eliminating the risk of assimilating erroneous information that made an impression. Questions themselves often contain a pearl reinforced in association with the question/answer. Additional hooks are often attached to the answer in various forms, including mnemonics, evoked visual imagery, repetition and humour. Additional information not requested in the question may be included in the answer.

"Why Smart People Do Stupid Things: Revised and Updated" follows the original publication by more than seven years. We worried and fretted then particularly about the stupidity exhibited by two of our recent presidents. Of course, we worried about ourselves and the host of other intelligent people who behaved out of character at one time or another. Today, rather than seeing improvement, we see a worsening of the condition in which obviously intelligent people do tragically stupid things. Not only that. The increased stupidity is operating at an institutional level. Note the functioning of major financial corporations, regulatory agencies of the federal government, and the United States congress. It is mind bogling. Answers aren't easy to come by because there are complex political and sociological factors that have bearing on the problem. But at the core--and where it most matters--are psychological and spiritual forces. We need to take a look at individuals and individuals need to take a look at themselves. This book explores why and it offers possible solutions. The analyses are presented in a readily understandable style with numerous illustrations.
