(Includes maps) This volume tells the story of the Supreme Headquarters of that Allied Expeditionary Force which seized a foothold on the German-held shores of Western Europe in 1944 and which, by the following year, had completed the liberation of all Western Europe. Germany is given detailed exposition in other volumes of this series, some of which already have been presented to the public. The present volume deals with the command exercised by the Supreme Allied Commander, the decisions made by the Supreme Commander and his staff, and the operations conducted under the aegis of the Supreme Headquarters. The reader constantly will be reminded that the war in Western Europe was fought by Allies and that the commands and decisions which determined the ultimate conduct of this war came from an Allied headquarters. Every effort has been made to draw on the records of all the Western Allies and the memories of their leaders, as well as the records and memories of the German High Command. But this volume is an integral part of a series dedicated to the United States Army in World War II and inevitably is written from an American point of view.

A path to educational justice for all students - one that encourages teachers, parents, and their communities to adopt the rebellious spirit and bold and creative methods of abolitionists Educator Bettina Love argues that the U.S educational system is maintained by and profits from the suffering of children of color. Reformers offer survival tactics in the forms of test-taking skills, acronyms, grit labs, and character education which she calls the Education Survival Complex. To dismantle the educational survival complex and to achieve educational

freedom--not reform--educators, parents, and community leaders must approach education through the imagination, determination, boldness and urgency of an abolitionist. Drawing on her experiences as a student and teacher, Love highlights young community leaders, artists and activists who are advocating for social change and inclusion. She persuasively argues that educators must teach students about racial violence, oppression, and how to make sustainable change in their communities through radical civic initiatives and movements. She concludes by showing how young leaders are expanding our ideas of civic engagement and intersectional justice by using the playbook of abolitionists like Ella Barker, Bayard Rustin, and Fannie Lou Hamer.

JORDAN AND JAMIE FOXX • A powerful true story about the potential for mercy to redeem us, and a clarion call to fix our broken system of justice—from one of the most brilliant and influential lawyers of our time. “[Bryan Stevenson’s] dedication to fighting for justice and equality has inspired me and many others and made a lasting impact on our country.”—John Legend

Bryan Stevenson was a young lawyer when he founded the Equal Justice Initiative, a legal practice dedicated to defending those most desperate and in need: the poor, the wrongly condemned, and women and children trapped in the farthest reaches of our criminal justice system. One of his first cases was that of Walter McMillian, a young man who was sentenced to die for a notorious murder he insisted he didn’t commit. The case drew Bryan into a tangle of conspiracy, political machination, and legal brinksmanship—and transformed his understanding of mercy and justice forever. Just Mercy is at once an unforgettable account of an idealistic, gifted young lawyer’s coming of age, a moving window into the lives of those he has defended, and an inspiring argument for compassion in the pursuit of true justice. In 2009, the Good News Club came to the public elementary school where journalist Katherine Stewart sent her children. The Club bills itself as an after-school Bible study, but Stewart soon discovered that its real mission is to convert children to fundamentalist Christianity. Astonished to discover that the Supreme Court had deemed this religious activity legal in public schools, Stewart began an investigative journey to dozens of cities across the nation to document the impact. As Stewart makes chillingly clear, the rapidly expanding network of Good News Clubs represents just one of a range of initiatives intended to insert religious values into public schools. Although they often appear to be spontaneous, local events, they are in fact organized and funded at a national level. Taken together, they represent a new strategy of the Religious Right in its long-running aim to "take back America," undermining our public education system and secular democracy itself.

This phenomenal New York Times bestseller tells a riveting story of the collision between ethics, race, and medicine; of scientific discovery and faith healing; and of a daughter consumed with questions about the mother she never knew.

Yakub is a Black Scientist introduced to the public by Elijah Muhammad. Elijah Muhammad told of his history as being the father of mankind or the maker of the white race. This teaching proved to be one of the most explosive within the Nation of Islam's theological and mathematical doctrine. Thought to be a myth, especially among those who gravitated more towards Orthodox Islam, which by the way, don't accept Elijah Muhammad as being authentic, but since the cloning of the sheep Dolly and other organic species, the facts that Elijah Muhammad attributed to this man cannot be discounted unless we all suddenly agree

The FOA the Fighting of Allah. the Nation of Gods and Earths "Defense for Knowing Self" is the first of its kind, a martial arts book mixed with the concepts of the 5% lessons of the 120 (Nation of Islam canon). From a religious point of view, it resembles the Buddhist Shaolin Monks of ancient China (who practiced Kung Fu while being versed in Buddhist principals). Mr. Allah explains the martial arts with the 120 lessons and has broken down each degree into a fighting form. His "Defense for Self" is the "knowledge of self" and thus martial arts becomes more than just physical movements, but the mental strategy's of awareness and how you conduct your-self wisely in combat. The Author believes the reader will enjoy the book and learn valuable teachings whether they trained in any forms of the martial arts or have any religious ways of life or not. Therefore the FOA is the Supreme book on mental and physical development and has been devised effectively for the advanced or novice practitioner.

The History of the Standard Oil Company

In this "thought-provoking study "(Library Journal), historian Kyle Ward-the widely acclaimed co-author of History Lessons-gives us another fascinating look at the biases inherent in the way we learn about our history. Juxtaposing passages from U.S. history textbooks from different eras, History in the Making provides us with intriguing new perspectives on familiar historical events and the ways in which they have been represented over time. The hardcover edition of History in the Making struck a chord among readers of popular history, and Ward was featured on NPRs popular series "How the Understanding of U.S. History Changes. "Interesting and useful, "according to Booklist, the book "convincingly illustrates how texts change as social and political attitudes evolve. With excerpts that span two hundred years, from Columbuss arrival to the Boston Massacre, from womens suffrage to Japanese internment, History in the Making exposes the stark contrasts between the lessons different generations have been taught about our past. "A good starting point for anyone interested in history and subjectivity "(Kirkus), this immensely readable book is proof positive that your history is not your grandparents history and wont be your childrens history.

The Law of Nations

Likened to a 48 Laws of Power for young Black men, this book presents Black biographies, history, and current events in a language that the Hip-Hop generation will understand and relate to. Each story or essay is framed within the context of a life lesson, each one being of vital importance to the survival, redemption, and ultimate success of our dying Black generation. Both the positive and negative sides of the Black experience are explored in detail, from the lives of infamous drug dealers and pimps to the exploits of Black revolutionaries and activists. In addition, several How To sections outline simple strategies for self-development. Packed with useful information, from the best way to handle confrontations with police, to the continuing relevance of the 1919 race riots, this book has been compared to an urban Encyclopedia Africana. Others have called it a Blueprint for Black Power for a generation struggling with materialism and short attention spans. This book is guaranteed to change the world by changing the way millions of people think and live. In How to Hustle and Win, author Supreme Understanding tells, in often graphic detail, stories like that of the infamous Philadelphia Black Mafia, Harlem's heroin kingpin Frank Lucas, and former gang leader Stanley "Tookie" Williams. In between and throughout these tales, he weaves life lessons and guidance, turning sordid stories of crime and urban despair into an educational experience. Whereas Robert Greene's bestselling 48 Laws of Power used iconic figures from classical history to illustrate the guidelines for personal success, How to Hustle and Win is filled with the exploits of rappers,

gangsters, radicals, and revolutionaries. This is a new kind of Black history book, and its intent is the motivation and achievement of a new kind of reader. Although today's literary market has seen an influx of self-help books attending to a variety of issues, few books have attempted to address the concerns of young Black men, struggling to find direction. It is this group that author Supreme Understanding names as one of most troubled demographics in American society today. On the book's website, the author comments: "Unfortunately, few authors actively target this audience, and those who do are either not speaking their language, or not interested in pushing for change. This is why How to Hustle and Win was written. This book will change the minds of millions of young men of color, and by doing this, it will ultimately change the world." Revolutionary aspirations aside, How to Hustle and Win's groundbreaking concept results in a truly appealing work. Its essays are delivered in short bursts, none of them over four pages long, making it ideal for struggling readers and those with shorter attention spans. At the same time, the book is filled with a wealth of information that would enlighten educated readers equally. In fact, the author juxtaposes his own personal tales of early delinquency and misdirection with his later years of professional success, including obtaining a doctorate in education at the age of 26.

during their younger years with Allah "the Father" from the early 1960s up until the time of his assassination on June 13, 1969. This was a time of struggle for the Black Man, Woman, and Child (the Universal Family). This was the time of "the Big Five", who were: Allah "the Father", who brought about the Nation of Gods and Earths known as the Five Percenters; the Honorable Elijah Muhammad, who was the last and greatest messenger of Allah, also the leader and teacher of the Black Muslims; Malcolm X of the new arrival; Dr. Martin Luther King, Jr., the civil rights leader; and the Black Panther Party on the East and West coasts. These five groups were called the Big Five, because they had the attention of every Black Man, Woman, and Child in the wilderness of North America and other parts of our planet. There was a host of other Black groups as well. This was a time when the Five Percenter's teachings were being taught/spoken so plain and simple that even a child could understand. Black people were on the rise, and it was a time for a change—for Black Man, Woman, and Child to take their place on earth. Peace!

The Five Percenterers

Do you know who - and what - you are? Do you know who you're meant to be? Do you know how to find the answers to questions like these? Knowledge of Self is the result of a process of self-discovery, but few of us know where to begin when we're ready to start looking deeper. Although self-actualization is the highest of all human needs, it is said that only 5% of people ever attain this goal. In the culture of the Nation of Gods and Earths, commonly known as the Five Percent, students are instructed that they must first learn themselves, then their worlds, and then what they must do in order to transform their world for the better. This often intense process has produced thousands of revolutionary thinkers in otherwise desperate environments, where poverty and hopelessness dominate. Until now, few mainstream publications have captured the brilliant

Knowledge of Self: A Collection of Writings on the Science of Everything in Life presents the thoughts of Five Percenters, both young and old, male and female, from all over the globe, in their own words. Through essays, poems, and even how-to articles, this anthology presents readers with an accurate portrait of what the Five Percent study and teach, as well as sound direction on how to answer timeless questions like: Who am I, and why am I here? Why is there so much injustice in the world, and what can be done about it? Who is God and where on Earth is he? How do I improve myself without losing myself? Why are people of color in the situations they're in? What can we do about the global problems of racism and poverty?
