Visit the website for A Better India; A Better World; here. With one of the highest GDP growth rates in the world and an array of recent achievements in technology; industry and entrepreneurship; India strides confidently towards the future. But; in the world's largest democracy; not everyone is equally fortunate. More than 300 million Indians are still prey to hunger; illiteracy and disease; and 51 per cent of India's children are still undernourished. What will it take for India to bridge this great divide? When will the fruits of development reach the poorest of the poor; and wipe the tears from the eyes of every man; woman and child; as Mahatma Gandhi had dreamt? And how should this; our greatest challenge ever; be negotiated? In this extraordinarily inspiring and visionary book; N.R. Narayana Murthy; who pioneered; designed and executed the Global Delivery Model that has become the cornerstone of India's success in information technology services outsourcing; shows us that a society working for the greatest welfare of the greatest number—samasta jananam sukhino bhavantu—must focus on two simple things: values and good leadership. Drawing on the remarkable Infosys story and the lessons learnt from the two decades of post-reform India; Narayana Murthy lays down the ground rules that must be followed if future generations are to inherit a truly progressive nation. Built on Narayana Murthy's lectures delivered around the world; A Better India: A Better World is a manifesto for the youth; the architects of the future; and a compelling argument for why a better India holds the key to a better world.

Politicians and public managers utilize branding to communicate with the public as well as to position themselves within the ever-present media now so central to political and administrative life. They must further contend with stakeholders holding contradictory opinions about the nature of a problem, the desirable solutions, and the values at stake. Branding is used as a strategy to manage perceptions, motivate stakeholders, communicate clear messages in the media, and position policies and projects. Brands have a unique ability to simplify such messages and motivate different actors to invest their energy in governance processes. Public administration scholars so far have however paid little attention to branding. This book provides a systematic analysis of branding as phenomenon in governance. It deals with the nature of public branding, its relation to existing theories in public administration, the way branding is used as a managerial strategy in governance processes, and the risks and limitations of branding. Branding in Public Governance and Management highlights the growing importance of public branding as a public management strategy to influence political events, decision-making processes and outcomes in governance processes.

This new and expanded edition is intended to help candidates prepare for entrance examinations in mathematics and scientific subjects, including STEP (Sixth Term Examination Paper). STEP is an examination used by Cambridge Colleges for conditional offers in mathematics. They are also used by some other UK universities and many mathematics departments recommend that their applicants practice on the past papers even if they do not take the examination. Advanced Problems in Mathematics bridges the gap between school and university mathematics, and prepares students for an undergraduate mathematics course. The questions analysed in this book are all based on past STEP questions and each question is followed by a comment and a full solution. The comments direct the reader's attention to key points and put the question in its true mathematical context. The solutions point students to the methodology required to address advanced mathematical problems critically and independently. This book is a must read for any student wishing to apply to scientific subjects at university level and for anyone interested in advanced mathematics.
