NY Times best-selling author Dr. Michael Roizen reveals how the food choices you make each day--and when you make them--can affect your health, your energy, your sex life, your waistline, your attitude, and the way you age. What if eating two cups of blueberries a day could prevent cancer? If drinking a kale-infused smoothie could counteract missing an hour's worth of sleep? When is the right time of day to eat that chocolate chip cookie? And would you actually drink that glass of water if it meant skipping the gym? This revolutionary guide reveals how to use food to enhance our personal and professional lives--and increase longevity to boot. What to Eat When is not a diet book. Instead, acclaimed internist Michael Roizen and preventive medicine specialist Michael Crupain offer readers choices that benefit them the most--whether it's meals to help them look and feel younger or snacks that prevent diseases--based on the science that governs them.

The Harvard-educated physician and New York Times bestselling author of The Hormone Cure shows you how to grow new receptors for your seven metabolic hormones, making you lose weight and feel great fast! When it comes to weight loss, most people don't think about hormones. But when you develop resistance to your seven major metabolic hormones—cortisol, thyroid, testosterone, growth hormone, leptin, insulin, and estrogen—your body adjusts by increasingly raising your hormone levels and ultimately slowing down your metabolism. And a slower metabolism leads to weight gain and difficulty losing weight. The solution, Dr. Sara Gottfried contends, is to reset the efficiency of your hormones by repairing and

Many of us experience signs and symptoms of hormonal imbalance every day. Do you have trouble dragging yourself out of bed in the morning? Ever have an uncontrollable sugar craving at 3 p.m.? Chronic headaches? Lack of energy? Do you get stressed just sitting in your office? Our bodies are wired to send us signals when something isn't right, but often we're too busy to hear them. Compounding the problem is a lack of understanding about the consequences if these symptoms are left unaddressed. Without hormonal balances, we are more likely to succumb to many diseases and illnesses. The Hormone Diet lays out a foolproof plan to balance your life, one hormone at a time. But it is more than just a diet book. Along with advice for weight loss, Dr. Natasha Turner provided recommendations for anti-inflammatory detox, nutritional supplements, exercise, sleep, stress management, toxin-free skin care, and natural hormone replacement combined with a diet plan—all incorporated into a 3-step wellness program focused on the essentials of hormone balance for lasting health.

Here are the Top 9 Reasons why you should read this book: -You want to build lean and proportionate muscles but don't want to look like a bodybuilder. I have gone from 140 pounds to 178 pounds (current) and I don't look like one; neither will you. The idea is to have enough muscles to keep people interested but not so much to scare them off. -You want to drop your body fat and bring it into the optimal range (for men, 9 to 14 percent; for women, 19 to 24 percent). -You want to build a pleasant looking body that is also functional and optimally healthy. The Fabulous Body training system (FBX) is a multifaceted system that ensures you develop a well-rounded physique. -You are serious about your health and fitness goals but have limited time. FBX optimizes your gene expression in only 3 - 6 hours per week. You don't need to do more. -You have limited funds to allocate to your health and fitness goals. FBX can be pursued with very basic equipment, including home gyms. Further, the Reality Diet (a term I used for a no-fad diet-notice it's not FAT but FAD) focuses on home-made meals with very little use of supplements. -You want to cut through the pseudo and bro science, which is rather overwhelming and confusing for most of us. This book provides you the "truth" that the conventional sources (supplement companies, muscle and fitness magazines) are hiding from you. -You are not looking for mere opinions but rather hard scientific facts. This book is linked with more than 100 scientific studies to support any concept or theory discussed. All these concepts have been part of my lifestyle long enough for me to know whether they work or not. I will never discuss something just because it is popular or trending. Furthermore you don't need to

imbibe (or even believe) everything I say. I would be delighted if you internalize even a single idea from this book that pays you handsomely in long run. -You don't just need a book but a system, a workbook where you simply plug in and start your workouts immediately. There are 16 FBX printable workout routines in the added FREE BONUS REPORT that will get you started right off the bat. These workouts are divided into beginner, intermediate and advanced levels. They are further subdivided into FBX-Cut and FBX-Gain to help you build muscles and lose fat efficiently and effectively. -You are open-minded. You have the courage to try something new or even radical and not simply follow what other people are doing in the gym.

look. The body has a limited number of fat cells, and there is only so much fat these cells can store. Once the threshold is reached, fat begins to accumulate in the muscle lining of your arms and thighs, creating unsightly, flabby limbs. All foods can cause fat creation, but certain foods actually help burn fat. Some foods have minerals or vitamins that raise metabolism and act as virtual fat burners. There are negative calorie foods with low calories that burn extra calories during digestion. Other foods, even eaten in small quantities, deliver a feeling of fullness with very little calories. Sticking to the right whole foods will drastically reduce the fat profile of your body. By eating these fat burning foods at the right time, in the correct amount, the body fat profile starts to reduce. Add in foods that lower the likelihood of fat depositing in your body for an extra boost. Here is a list of everyday foods that double as secret fat burners. Poultry Poultry such as chicken has special assets that increase the body's metabolic rate, helping you melt extra fat away. Chicken is low in fat and carbohydrates with a good protein profile. Proteins require a lot of energy to digest, and more energy for proteins to be stored as fat. It is also a great source of iron, zinc, and niacin. For best results, remove the skin from poultry before eating to avoid excess fat. Salmon & Tuna Salmon and tuna are good sources of protein that provides the body with healthy fats from omega-3 and omega-6 fatty acids. Both meaty fish, while satisfying, are also low in calories and unhealthy saturated fat. Eating salmon positively affects leptin, the hormone responsible for burning and storing calories. ## **The Pritikin Weight Loss Breakthrough**

From a Pulitzer Prize-winning investigative reporter at The New York Times comes the troubling story of the rise of the processed food industry -- and how it used salt, sugar, and fat to addict us. Salt Sugar Fat is a journey into the highly secretive world of the processed food giants, and the story of how they have deployed these three essential ingredients, over the past five decades, to dominate the North American diet. This is an eye-opening book that demonstrates how the makers of these foods have chosen, time and again, to double down on their efforts to increase consumption and profits, gambling that consumers and regulators would never figure them out. With meticulous original reporting, access to confidential files and memos, and numerous sources from deep inside the industry, it shows how these companies have pushed ahead, despite their own misgivings (never aired publicly). Salt Sugar Fat is the story of how we got here, and it will hold the food giants accountable for the social costs that keep climbing even as some of the industry's own say, "Enough already."

The innovative guide that reveals how eating more fat—the smart kind—is the key to health, longevity, and permanent weight loss. For years experts have told us that eating fat is bad. But by banning fat from our diets, we’ve deprived ourselves of considerable health benefits—and have actually sabotaged our own efforts to lose weight. Though they originally came from vastly different schools of thought about diet and weight loss, renowned nutritionist Jonny Bowden and well-respected physician Steven Masley independently came to the same conclusion about why so many people continually fail to shed pounds and get healthy. It all comes back to a distinction far more important than calories vs. carbs or paleo vs. plant-based: smart fat vs. dumb fat. In *Smart Fat*, they explain the amazing properties of healthy fat, including its ability to balance hormones for increased energy and appetite control, and its incredible anti-inflammatory benefits. The solution for slimming down—and keeping the pounds off for life—is to “smart-fat” your meals, incorporating smart fats with fiber, protein, and most importantly, flavor. Bowden and Masley identify smart fats, explain what not to eat, and provide a thirty-day meal plan and fifty recipes based on the magic formula of fat, fiber, protein, and flavor. It’s time to unlearn what we think we know about food. Getting smart about fat—and everything you eat—and learning to smart-fat your meals is the only solution you'll ever need.
