The Eternal Tomb

Oliver's life is no different from those of most middle school kids—except he sleeps in a coffin and drinks blood for breakfast. Oliver Nocturne lives a pretty normal life—he deals with bullies, has an obnoxious older brother, and generally feels misunderstood. But being a vampire presents another host of problems, especially when he feels—he knows—he's not quite like everyone else. When Emalie, a human girl with a troubled past, takes a picture of him, Oliver ignores the rules that forbid him from interacting with humans and agrees to show her the darkest secrets of the Seattle underworld. But their quest will uncover more than vampire mythology—they will learn the terrible truth about Oliver's past and his purpose. And for Emalie, this knowledge could come at a fatal price.

Castillo needs a new life. His teachers are clueless autocrats except for Mr. Darren, who's in charge of the rock band program. The girls at school are either shallow cutebots or out of his league. And his parents mean well, but they just make things worse. It's as if Anthony is stuck on the bottom level of his favorite video game, Liberation Force 4.5. Except there is no secret escape tunnel and definitely no cheat code. Fed up, pissed off, and feeling trapped, Anthony writes his first song for his rock band, the Rusty Soles. His only problem: Arts Night. If he exercises his right to free speech and sings his original lyrics—where his own bombs will drop—he and his band will be through. The clock is ticking. The Refrigerator Monologues

The conclusion to Kevin Emerson's epic, which Tui Sutherland, New York Times bestselling author of the *Wings of Fire* series, has called "perfect science fiction." It is Earth year 2256—but the fate of the few who even remember Earth is perilously in doubt. Mina Saunders-Chang and many of the surviving humans are stranded in the Centauri system, having barely survived their confrontation with the Telphon refugees. Now everyone—human and Telphon alike—is caught in the blast zone of the Centauri supernova. And yet there's only one question Mina is asking: Where are Liam and Phoebe? Having barely made it through the battle at the Centauri system with their lives, Liam and Phoebe awake on a mysterious ship in the middle of a dead universe. The ship bears the markings of a human starliner that disappeared decades ago—but even more disturbing than that is the massive alien machine floating in the starless space before them. A machine long abandoned but now showing signs of life. A machine that has begun speaking to Liam in a voice only he can hear. . . .

features of Homeric science were just poetic concepts (which on many occasions does not explain the astonishing details of design and manufacture, like the ones included in the present volume), they seem to prove that these achievements were well within human capability. In addition, the substantial development of machine theory during the early post-Homeric age shows that the Homeric descriptions were a kind of prophetic conception of these machines, and scientific research must be a quest for the fundamental principles of knowledge available during the Late Bronze Age and the dawn of the Iron Age. Such investigations must of necessity be strongly interdisciplinary and also proceed continuously in time, since, as science progresses, new elements of knowledge are discovered in the Homeric Epics, amenable to scientific analysis. This book brings together papers presented at the international symposium Science and Technology in Homeric Epics, which took place at Ancient Olympia in 2006. It includes a total of 41 contributions, mostly original research papers, covering diverse fields of science and technology, in the modern sense of these words.

planets and moons, even the creations of humankind, are all shown to reflect their origins in this beautiful and divine image. Through an intricate and detailed geometrical mapping, Drunvalo Melchizedek shows how the seemingly simple design of the Flower of Life contains the genesis of our entire third-dimensional existence. From the pyramids and mysteries of Egypt to the new race of Indigo children, Drunvalo presents the sacred geometries of the Reality and the subtle energies that shape our world. We are led through a divinely inspired labyrinth of science and stories, logic and coincidence, on a path of remembering where we come from and the wonder and magic of who we are. Finally, for the first time in print, Drunvalo shares the instructions for the Mer-Ka-Ba meditation, step-by-step techniques for the re-creation of the energy field of the evolved human, which is the key to ascension and the next dimensional world. if done from love, this ancient process of breathing prana opens up for us a world of tantalizing possibility in this dimension, from protective powers to the healing of oneself, of others and even of the planet. Embrace the expanded vision and understanding that Drunvalo offers to the world. From the New York Times bestselling author Catherynne Valente comes a ferocious riff on the women in superhero comics. *The Refrigerator Monologues* is a collection of linked stories from the points of view of the wives and girlfriends of superheroes, female heroes, and anyone who's ever been "refrigerated": comic book women who are killed, raped, brainwashed, driven mad, disabled, or had their powers taken so that a male superhero's storyline will progress. In an entirely new and original superhero universe, Valente subversively explores these ideas and themes in the superhero genre, treating them with the same love, gravity, and humor as her fairy tales. After all, superheroes are our new fairy tales and these six women have their own stories to share.
