The rule is deceptively simple: when faced with a decision, consider what the consequences and outcomes of your various options would be in 10 minutes, 10 months, and 10 years. But the results are extraordinary. Using the framework of 10-10-10 will allow you to think through your decisions and to match them with the expectations and values you hold dearest. Most importantly, it allows you to chart a path in the direction you want, and to head confidently towards it with focus, balance, and joy.

show us what makes an ordinary person an extreme overachiever. Why do some people achieve so much more than others? Can they lie so far out of the ordinary? In this provocative and inspiring book, Malcolm Gladwell looks at everyone from rock stars to professional athletes, software billionaires to scientific geniuses, to show that the story of success is far more surprising, and far more fascinating, than we could ever have imagined. He reveals that it's as much about where we're from and what we do, as who we are - and that no one, not even a genius, ever makes it alone. Outliers will change the way you think about your own life story, and about what makes us all unique. there's clearly something missing from your life. This book will help you discover what it is, and how to win it back. Written by Mel Robbins, one of America's top relationship experts and radio/tv personalities, this hands-on guide not only shows you how to put your finger on the problem, it reveals what to do about it. Mel Robbins has spent her career teaching people how to push past their self-imposed limits to get what they truly desire. She has an in-depth understanding of the psychological and social factors that repeatedly hold you back, and more important, a unique set of tools for getting you where you want to be. In *Stop Saying You're Fine*, she draws on the latest neuroscientific research, interviews with countless everyday people, and ideas she's tested in her own life to show what works and what doesn't. The key, she explains, is understanding how your own brain works against you. Because evolution has biased your mental gears against taking action, what you need are techniques to outsmart yourself. That may sound impossible, but Mel has created a remarkably effective method to help you do just that -- and some of her discoveries will astonish you. By ignoring how you feel and seizing small moments of rich possibility -- a process she calls "leaning in" -- you can make tiny course directions add up to huge change. Among this book's other topics: how everything can depend on not hitting the "snooze" button; the science of connecting with other people, what children can teach us about getting things done; and why five seconds is the maximum time you should wait before acting on a great idea. Blending warmth, humor and unflinching honesty with up-to-the-minute science and hard-earned wisdom, *Stop Saying*

police administrator, former partner, and best friend. But then an uninvited guest from Bill's past upends the Bohannons' Fourth of July barbecue, revealing in levelheaded Bill the most unexpected behavior—behavior that awkwardly drops Ten in the middle of a crumbling marriage. Ten makes an unexpected move of his own when he agrees to pro bono work for a convicted felon. But it was dope slinger Godfrey Chambers Ten had repeatedly busted during his days on the force, not the reformed and rechristened G-Force who is now asking for Ten's help in claiming money left to him by a kind-hearted benefactor—and contested by the benefactor's self-serving family. Soon Ten's investigations lead him down the darkest corridors of the Internet and halfway around the globe to Sarajevo as he navigates the seedy worlds of human trafficking and personal regret. As his cases intertwine, Ten will rely on the wisdom of the Buddha and his own network of relationships—with super hacker Mike, outrageously idiosyncratic assistant Kim, old monastery friends Yeshe and Lopsang, Serbian cabbie and former policija Petar, and, of course, feline rock Tank—to solve the puzzle and keep free of his own tangled past. Especially when an old flame returns. The Fourth Rule of Ten, the thrilling fourth book in the Dharma Detective series, proves the only thing better than exceeding expectations is having none at all.

bestseller is the definitive manual for anyone interested in gaining, observing, or defending against ultimate control – from the author of *The Laws of Human Nature*. In the book that *People* magazine proclaimed “beguiling” and “fascinating,” Robert Greene and Joost Elffers have distilled three thousand years of the history of power into 48 essential laws by drawing from the philosophies of Machiavelli, Sun Tzu, and Carl Von Clausewitz and also from the lives of figures ranging from Henry Kissinger to P.T. Barnum. Some laws teach the need for prudence (“Law 1: Never Outshine the Master”), others teach the value of confidence (“Law 28: Enter Action with Boldness”), and many recommend absolute self-preservation (“Law 15: Crush Your Enemy Totally”). Every law, though, has one thing in common: an interest in total domination. In a bold and arresting two-color package, *The 48 Laws of Power* is ideal whether your aim is conquest, self-defense, or simply to understand the rules of the game.

First published in 1971, *Rules for Radicals* is Saul Alinsky's impassioned counsel to young radicals on how to effect constructive social change and know “the difference between being a realistic radical and being a rhetorical one.” Written in the midst of radical political developments whose direction Alinsky was one of the first to question, this volume exhibits his style at its best. From the Trade Paperback edition.
