### **Toyota Prius Repair and Maintenance Manual: 2004-2008**

This groundbreaking text provides both theory and strategy for operating in a semiglobal economy in which international businesses must compete in highly globalized and highly localized markets at the same time. Unlike the traditional transnational and matrix corporate models, a semiglobal corporation organizes its operations according to the global/local content of its value propositions rather than according to geographical regions, products, or contribution to the parent company's performance. As an example of a semiglobal corporation, the Honda Motor Company has a global vision when it comes to highly global bundles like car engines, and a local vision when it comes to highly localized car financing and servicing. Designed as a supplementary text for courses in international business, development economics,
