A Fascinating Classic True Story From The "Golden New Age" Of Flying Saucers!
THE AUTHOR BEFRIENDED THE BEAUTIFUL LIFEFORM FROM ANOTHER WORLD BUT

WAS SHE A SPIRIT OR A SPACE BEING? Dana Howard had been a sensitive since childhood. As a child, she had strange nocturnal out-of-body experiences and travels to serene and beautiful worlds. She claims she made "friends" in the fantasy realm, one of whom was a lovely woman named Diane. Dana visited with Diane in the Mojave Desert, a location she soon realized was a portal between worlds. The desert was alive with spirit energy, drawing Diane from the ether to Earth. On these visits, Diane would offer hope that humanity could unite to meet the challenges of the future: the climate changes, geographic changes, geopolitical turmoil, wars and more we are now experiencing all foretold in the 1950s! As odd as Dana's experiences may seem, something happened that added weight to the encounters. Diane appeared before a group of 27 people who had gathered in a Los Angeles church on April 29th, 1955, forming quickly from a single thread of ectoplasm. This book contains a continuation of Dana's original work with an Introduction by noted contemporary researcher, Regan Lee.

Fraud on the Internet

The charismatic forger immortalized in *Catch Me If You Can* exposes the astonishing tactics of today's identity theft criminals and offers powerful strategies to thwart them based on his second career as an acclaimed fraud-fighting consultant. When Frank Abagnale trains law enforcement officers around the country about identity theft, he asks officers for their names and addresses and nothing more. In a matter of hours he can obtain everything he would need to steal their lives: Social Security numbers, dates of birth, current salaries, checking account numbers, the names of everyone in their families, and more. This illustrates how easy it is for anyone from anywhere in the world to assume our

identities and in a matter of hours devastate our lives in ways that can take years to recover from. Considering that a fresh victim is hit every four seconds, *Stealing Your Life* is the reference everyone needs by an unsurpassed authority on the latest identity theft schemes. Consider these sobering facts:

- Six out of ten American companies and government agencies have already been hacked.
- An estimated 80 percent of birth certificate requests are fulfilled through the mail for people using only a name and a return address.
- Americans write 39 billion checks a year, and half of them never reconcile their bank statements.
- A Social Security number costs \$49 on the black market. A driver's license goes for \$90. A birth certificate will set you back \$79.

Abagnale offers dozens of concrete steps to transform anyone from an easy mark into a hard case that criminals are likely to bypass:

- Don't allow your kids to use the computer on which you do online banking and store financial records (children are apt to download games and attachments that host damaging viruses or attract spyware).
- Beware of offers that appeal to greed or fear in exchange for personal data.
- Monitor your credit report regularly and know if anyone's been "knocking on your door."
- Read privacy statements carefully and choose to opt out of sharing information whenever possible.

Brimming with anecdotes of creative criminality that are as entertaining as they are enlightening, *Stealing Your Life* is the practical way to shield yourself from one of today's most nefarious and common crimes.

The New York Times bestselling, groundbreaking investigation of how the global elite's efforts to "change the world" preserve the status quo and obscure their role in causing the problems they later seek to solve. An essential read for understanding some of the egregious abuses of power that dominate today's news. Former New York Times columnist Anand Giridharadas takes us into the inner sanctums of a new gilded age, where the rich and powerful fight for equality and justice any way they can--except ways that threaten the social order and their position atop it. We see how they rebrand themselves as saviors of the poor; how they lavishly reward "thought leaders" who redefine "change" in winner-friendly

ways; and how they constantly seek to do more good, but never less harm. We hear the limousine confessions of a celebrated foundation boss; witness an American president hem and haw about his plutocratic benefactors; and attend a cruise-ship conference where entrepreneurs celebrate their own self-interested magnanimity. Giridharadas asks hard questions: Why, for example, should our gravest problems be solved by the unelected upper crust instead of the public institutions it erodes by lobbying and dodging taxes? He also points toward an answer: Rather than rely on scraps from the winners, we must take on the grueling democratic work of building more robust, egalitarian institutions and truly changing the world. A call to action for elites and everyday citizens alike.

THE NEW JUNGLE is about scientific fraud and how medical and police corruption came about in the USA. Undue influence in the universities by capitalist interests is to blame. The author believes that the US economy was intentionally ruined by German economic interests (as much of the medical research done in the US was by German -influenced corporations). The author also compares the current state of the US to an Orwellian totalitarian NAZI nightmare and warns the reader against allowing such a takeover to occur. We would lose all of our American rights and set back civilization over 200 years.

US Marine Risks Life in Prison to Expose a Cybercrime that Consumers Know Nothing About. In Cyber Fraud: The Web of Lies, cybersecurity expert Bryan Seely exposes a criminal underworld that has taken root and spread all over the globe. These criminals have set up shop in every city in the United States, and most major cities on 6 continents and hide behind consumer ignorance. Bryan Seely began his quest to expose this system of fraud in late 2013 and in February of 2014, demonstrated a flaw on Google Maps that these criminals use to commit these crimes. To prove his point, he Wiretapped the Secret Service in Washington, D.C. and the FBI in San Francisco. Yes, he actually intercepted calls to the Secret Service and FBI. In Cyber Fraud, Bryan details everything about the scam and recounts his experience fighting to expose these criminals. Learn what you can do

to protect yourself so you don't become one of the millions of victims worldwide.

Illustrated with 30 maps, portraits and diagrams of the Waterloo Campaign Philip Guedalla was a British barrister, but he was better known as a popular historical and biographical writer. His subjects were many and varied, but he had a noted inclination toward European subjects and particularly the history of France. For this volume he chose as his subject the “Hundred Days” — the return of the Emperor Napoleon from exile on Elba to his defeat at Waterloo and his final banishment to St. Helena. Eschewing national bias, the author sums up the dramatic events with

U.S. District Court Federal Filings Alert

Can an election be stolen? You bet it can. The intrepid reporter Eric Eggers has uncovered just how easy it is to cast a fraudulent ballot—canceling out your vote and in some cases deciding elections. We know—despite official denials—that voter fraud is happening. In fact, Eggers shows, it's rampant, and it's all over the country. Worse, many famous civil rights organizations encourage voter fraud and frustrate its prosecution. Every proposed voting security measure and every attempt to enforce existing laws is treated as an attack on the right to vote. But of course, the real threat to civil rights, free and fair elections, and the rule of law is voter fraud. And in case after shocking case, Eggers shows how voter fraud is subverting American democracy. In his frightening and thought-provoking book, Eggers highlights:

- How so-called “progressive” organizations promote and explain away voter fraud
- Why voter fraud is a growing threat—and tied to illegal
