The untold story of Britain's oldest car maker Many previously unpublished images from the vaults of Vauxhall A view from the inside that has been untold until now Of interest to the motorcar historian and modellers Vauxhall has been making cars in Britain for longer than anyone else. The first Vauxhall car left a cramped Thames-side works in 1903. Moving to

Luton in 1905, Vauxhall became famous as a maker of sporting and luxury cars. Bought by the American giant General Motors, the company entered the era of mass production and, with the addition of Bedford trucks and vans, became one of the top five UK producers. After the Second World War, Vauxhall became the household name it is today with models such as Viva, Astra, Cresta, Victor, Nova, Cavalier and Vivaro. The journey from the Thames to today's plants at Ellesmere Port and Luton is full of twists, turns, dramas and triumphs, and continues with the announcement of the sale of General Motors European operations to the PSA Groupe. The author worked at Vauxhall for 38 years, from apprentice to boardroom. He has told the Vauxhall story with the benefit of years of experience and a lifelong passion for the marque.

A blended learning approach to automotive engineering at levels one to three. Produced alongside the ATT online learning resources, this textbook covers all the theory and technology sections that students need to learn in order to pass levels 1, 2 and 3 automotive courses. It is recommended by the Institute of the Motor Industry and is also ideal for exams run by other awarding bodies. Unlike the current textbooks on the market though, this title takes a blended learning approach, using interactive features that make learning more enjoyable as well as more effective. When linked with the ATT online resources it provides a comprehensive

package that includes activities, video footage, assessments and further reading. Information and activities are set out in sequence so as to meet teacher and learner needs as well as qualification requirements. Tom Denton is the leading UK automotive author with a teaching career spanning lecturer to head of automotive engineering in a large college. His nine automotive textbooks published since 1995 are bestsellers and led to his authoring of the Automotive Technician Training multimedia system that is in common use in the UK, USA and several other countries.
