This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. *Victimology: Legal, Psychological, and Social Perspectives, 4e* is a student-friendly, easy-to-read text that covers the field of victimology. Fully updated with the latest trends, it reflects the field's growing focus on the entire victim-offender relationship, while taking a global perspective on the study of victimology. The text is divided into four major areas. The authors first introduce traditional victimology theories, the measurement of crime, and both civil and criminal processes. (Civil process is included because it is an important aspect of the victim—offender interaction.) Second, they discuss responses to victimization, including techniques for empowering victims. They next turn to special types of victims, including the elderly, the disabled, and gay and lesbian victims. Finally, they thoroughly review the civil remedies available to crime victims. A brief discussion of the juvenile system is also included because more attention is being focused on youth

violence. Throughout the text, key concepts are supported with a comprehensive package of pedagogical material and teaching/learning aids.

What the financial diaries of working-class families reveal about economic stresses, why they happen, and what policies might reduce them Deep within the American Dream lies the belief that hard work and steady saving will ensure a comfortable retirement

and a better life for one's children. But in a nation experiencing unprecedented prosperity, even for many families who seem to be doing everything right, this ideal is still out of reach. In *The Financial Diaries*, Jonathan Morduch and Rachel Schneider draw on the groundbreaking U.S. *Financial Diaries*, which follow the lives of 235 low- and middle-income families as they navigate through a year. Through the *Diaries*, Morduch and Schneider challenge popular assumptions about how Americans earn, spend, borrow, and save—and they identify the true causes of distress and inequality for many working Americans. We meet real people, ranging from a casino dealer to a street vendor to a tax preparer, who open up their lives and illustrate a world of financial uncertainty in which even limited financial success requires imaginative—and often costly—coping strategies. Morduch and Schneider detail what families are doing to help themselves and describe new policies and technologies that will improve stability for those who need it most. Combining hard facts with personal stories, *The Financial Diaries* presents an unparalleled inside look at the economic stresses of today's families and offers powerful, fresh ideas for solving them.
