Education Law, Strategic Policy and Sustainable Development in Africa

This indispensable handbook provides helpful strategies for dealing with both the everyday challenges of university teaching and those that arise in efforts to maximize learning for every student. The suggested strategies are supported by research and adaptable to specific classroom situations. Rather than suggest a “set of recipes” to be followed mechanically, the book gives instructors the tools they need to deal with the ever-changing dynamics of teaching and learning. Available with InfoTrac Student Collections <http://gocengage.com/infotrac>. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Why Nations Fail

This book is a first-of-its-kind, five-country empirical study of the causes and consequences of social and economic rights litigation. Detailed studies of Brazil, India, Indonesia, Nigeria, and South Africa present systematic and nuanced accounts of court activity on social and economic rights in each country. The book develops new methodologies for analyzing the sources of and variation in social and economic rights litigation, explains why actors are now turning to the courts to

enforce social and economic rights, measures the aggregate impact of litigation in each country, and assesses the relevance of the empirical findings for legal theory. This book argues that courts can advance social and economic rights under the right conditions precisely because they are never fully independent of political pressures.

Learning for a Future

An award-winning professor of economics at MIT and a Harvard University political scientist and economist evaluate the reasons that some nations are poor while others succeed, outlining provocative perspectives that support theories about the importance of institutions.

Courting Social Justice

This book addresses the changes in education practices, especially basic education, necessitated by the global challenges of climate change and sustainable development and in a context characterized by increasing poverty and inequality, migration and refugees. Written by a range of international scholars, scientists and grassroots practitioners from Africa, Latin America, Asia (India, China, Malaysia) and Europe, the individual contributions focus on education policies and child development in various social contexts. Case-based experiences from both developed and developing countries provide inspiration and shed new light on the fundamental changes needed to adapt existing school systems and teacher training to face the challenges of the future. In this regard, the need to empower children themselves is emphasized. All contributions are based on a Workshop hosted in November 2015 by the Pontifical Academy of Sciences at the Vatican entitled “Children and Sustainable Development: A Challenge for Education” and follow three other significant events on sustainable development in 2015, namely the publication of *Laudato Si’*, the Encyclical Letter from Pope Francis, the release of the United Nations Sustainable Development Goals, and the COP21 Conference in Paris.

Teaching about Religion in the Social Studies Classroom

Originally published in 1974, a comprehensive history of Nigerian Education, from early times right through to the time of publication, had long been needed by all concerned with Education in Nigeria, students, teachers and educational administrators. No one was better qualified than Professor Fafunwa to provide such a book, and in doing so he gave due emphasis to the beginnings of Education in its three main stages of indigenous, Muslim and Christian Education. Nigerian Education had been considered all too often as a comparatively recent phenomenon, but this book points out from the start that ‘Education is as old as Man himself in Africa’ and that both Islam and Christianity were comparative newcomers in the field. A historical treatment of these three strands which have combined to make up the modern Educational system was

vital to a clear understanding of what was needed for the future, and most of the first half of the book is concerned with these Educational beginnings. The imposing of a foreign colonial system on this framework did not always lead to a happy fusion of the systems, and the successes and the failures are examined in detail. There was no shortage of documentary evidence in the form of reports and statistics during the decades prior to publication, but this evidence was frequently scattered and inaccessible to the student, so that the author's careful selection of key evidence and reports, often drawn from his own personal experience, will be invaluable for those wishing to trace the development of Education in Nigeria up to the early 1970s. A knowledge of the history and development of the Nigerian Education system, of the numerous and intensely varied personalities and beliefs which have combined and often conflicted to shape it, is indispensable to all students in colleges and universities studying to become teachers. It is this knowledge that Professor Fafunwa set out to provide, drawing on his wide experience as teacher writer and educationalist.

ABC of Learning and Teaching in Medicine

This book outlines the findings and suggestions of the Law and Society Association's International Research Collaborations, which focused on the African Union's Agenda 2063. This outlined the ideal Africa aspired to by the year 2063: 'the Africa we want'. The authors examine socio-economic rights issues and their impact on developing a strong educational agenda that can drive Africa to realize Agenda 2063. As Africa's development has remained slow in the face of many challenges, the need to embrace good governance, rule of law and human rights obligations are major tools to realize the continent's potential. The project focuses in particular on the central place of education law and policy in achieving the goals of Agenda 2063.

Building Better Armies: An Insider's Account of Liberia

This text explores the multidisciplinary context of African Indigenous Knowledge Systems from scholars and scholar activists committed to the interrogation, production, articulation, dissemination and general development of endogenous and indigenous modes of intellectual activity and praxis. The work reinforces the demand for the decolonization of the academy and makes the case for a paradigmatic shift in content, subject matter and curriculum in institutions in Africa and elsewhere - with a view to challenging and rejecting disinformation and intellectual servitude. Indigenous intellectual discourses related to diverse disciplines take center stage in this volume with a focus on education, mathematics, medicine, chemistry and engineering in their historical and contemporary context.

Educational Assessment in a Time of Reform

From the middle of the eighth century to the tenth century, almost all non-literary and non-historical secular Greek books, including such diverse topics as astrology, alchemy, physics, botany and medicine, that were not available throughout the eastern Byzantine Empire and the Near East, were translated into Arabic. Greek Thought, Arabic Culture explores the major social, political and ideological factors that occasioned the unprecedented translation movement from Greek into Arabic in Baghdad, the newly founded capital of the Arab dynasty of the 'Abbasids', during the first two centuries of their rule. Dimitri Gutas draws upon the preceding historical and philological scholarship in Greco-Arabic studies and the study of medieval translations of secular Greek works into Arabic and analyses the social and historical reasons for this phenomenon. Dimitri Gutas provides a stimulating, erudite and well-documented survey of this key movement in the transmission of ancient Greek culture to the Middle Ages.

From Cliché to Archetype

Master's Thesis from the year 2017 in the subject Orientalism / Sinology - Islamic Studies, grade: Junior secondary school, language: English, abstract: This study essentially examined the Impact of Colleges of Arabic and Islamic Studies on the Integration of the Products of Islamiyyah/Qur'anic schools into the UBE programme in Katsina state. One set of questionnaire was used for collecting the required data titled "Students' Questionnaire on CAIS Impact which was designed in five point Likert scale and the responses were considered using the marking scheme and each correct response was scored 1-5 marks for 31 items in the instrument. 202 respondents were randomly selected using stratified random sampling out of 2022 students from the different strata in the six schools within Katsina Zonal Education Quality Assurance Office. The pilot testing showed the reliability coefficient of 0.720 which means that the instruments is reliable The findings revealed that there is a specific mode of admitting the products of Islamiyyah/Qur'anic schools into Colleges of Arabic and Islamic Studies, and that there is no significant relationship between the courses offered in the Islamiyyah/Qur'anic schools and the Colleges of Arabic and Islamic Studies. The findings also showed that the Colleges of Arabic and Islamic Studies played important role in the formalization of the products of Islamiyyah/Qur'anic schools into the UBE programme, it was also revealed that the Colleges of Arabic and Islamic Studies are ensuring the acquisition of appropriate levels of literacy, numeracy, manipulative, communicative and life skills, as well as ethical, moral and civic values needed for laying a solid foundation for life-long learning. The conclusion contains the summary, suggestions and recommendations as well as contributions of the study to knowledge and suggestions for further studies.

A New Religious America

This two-volume encyclopedia looks at the lives of teenagers around the world, examining topics from a typical school day to major issues that teens face today, including bullying, violence, sexuality, and social and financial pressures. • Gives

readers a glimpse into a typical day in the life of a teen in countries around the world, from wake up time to classes to after school activities • Focuses on interesting facts and anecdotal information • Allows students to make cross-national comparisons of topics such as literacy, education, rights, internet use, and other key issues • Shows a complex picture of new family forms, new gender roles, and declining religious belief with the strong persistence of conservative values

Authentication of Hadith

ABC of Learning and Teaching in Medicine is an invaluable resource for both novice and experienced medical teachers. It emphasises the teacher's role as a facilitator of learning rather than a transmitter of knowledge, and is designed to be practical and accessible not only to those new to the profession, but also to those who wish to keep abreast of developments in medical education. Fully updated and revised, this new edition continues to provide an accessible account of the most important domains of medical education including educational design, assessment, feedback and evaluation. The succinct chapters contained in this ABC are designed to help new teachers learn to teach and for experienced teachers to become even better than they are. Four new chapters have been added covering topics such as social media; quality assurance of assessments; mindfulness and learner supervision. Written by an expert editorial team with an international selection of authoritative contributors, this edition of ABC of Learning and Teaching in Medicine is an excellent introductory text for doctors and other health professionals starting out in their careers, as well as being an important reference for experienced educators.

Teaching about Religions

McKeachie's Teaching Tips

Homesick in Paradise is a wonderfully written novel that you can't read once and drop but read it time and time again. The lead story has a personal emotional touch that draws you so close to empathizing with an eleven year old character, Enemona, who couldn't bear the heat of his mother's death, decides to break barrier in order to have a spiritual verbal communion with the dead mother. Would the dead mother respond in a mysterious way? The author similarly weaved the childhood memories of a child in a boarding secondary school with its fun and fabulous fury. It espouses the split personality of a nearly indoctrinated child in Christendom, with the conflict of participating in the rich culture of his African traditional festivals. It is an impressive narration laced with tragic stories but also harmonized with great hilarious stories that are didactic and perhaps ribs cracking.

History of Education in Nigeria

In today's complex and volatile world the consequences of relying on fraudulent and counterfeit Hadith to legitimize extremist behavior, issue violent fatwas, and justify blatant abuse, particularly of women, is not only far too easy but in fact dangerous. Israr Khan addresses the sensitive topic of Hadith authentication, focusing on the criteria adopted by classical scholars to maintain that concentration on the continuity and accuracy of the chain of narrators, rather than the textual content of Hadith, has led to particular Hadith being included which either contradict other Hadith directly, project the Prophet (SAAS) in an uncharacteristic light, or do not reflect and/or conflict with the teachings of the Qur'an. The study traces in careful detail the historical development of the oral and written traditions, as well as the many targeted attempts at fabrication that took place, critiquing in methodical detail certain Hadith which have come to be widely accepted as "authentic." The prominent collections we have today, were made possible by the development of the science of Hadith criticism, and Muslim scholars deserve deep appreciation for their painstaking work, as well as their invaluable contribution towards preserving the Hadith literature to the best of their ability. However, insists the author, the process is ongoing, and the closed door policy which currently surrounds Hadith authentication needs to be carefully reexamined.

Culture Is Our Business

In recent years, the concern of society about how food influences the health status of people has increased. Consumers are increasingly aware that food can prevent the development of certain diseases, so in recent years, the food industry is developing new, healthier products taking into account aspects such as trans fats, lower caloric intake, less salt, etc. However, there are bioactive compounds that can improve the beneficial effect of these foods and go beyond the nutritional value. This book provides information on impact of bioactive ingredients (vitamins, antioxidants, compounds of the pulses, etc.) on nutrition through food, how functional foods can prevent disease, and tools to evaluate the effects of bioactive ingredients, functional foods, and diet.

Public Examinations Examined

We live in an over-sexualised culture where sex and sexuality have become part of the public domain. This sexual revolution challenges Judeo-Christian and Islamic norms and boundaries. As such, sexuality education is a sensitive and extremely important issue, and its current implementation in schools has raised public concerns. This book explores the subject, contextualising it within the matrix of Islamic beliefs and practices. Islam binds sexuality and sexual education to a moral grid with rights and obligations, justice and equity. There is a dominant discourse and stereotype around 'Islamic sexuality', which presents sex and sexuality as the biggest taboo, fraught with fear and seldom discussed. This book dispels

such myths and misconceptions, providing an overview of sexuality education in the modern world and the need for such education.

The Ghadir Declaration (Spiritual sovereignty of caliphate Ali RA)

Bachelor Thesis from the year 2018 in the subject Pedagogy - School System, Educational and School Politics, grade: 5 (GHA-System), University of Education (Distance Learning), course: Post Graduate Diploma in Education, language: English, abstract: Students' academic performance is a key feature in education. This study was therefore conducted primarily to assess the factors contributing to improvement in academic performance of Junior High Students (JHS) in a Basic School which is in the Gomo-East District in the Central Region of Ghana. The mixed and descriptive research design was used and a sample size of 87 respondents (79 students and 8 teachers) were selected through random sampling technique. The findings revealed that the average academic performance (47.0%) of the JHS students in the Basic School is weak and their performance in Mathematics (average score of 31.48%) and English Language (average score of 39.99%) is a fail. It was noticed that student factors that contribute to an improvement in academic performance include; regular studying, self-motivation, punctuality and regular class attendance, hard-work and interest in a subject. The teacher factors were completion of syllabus, use of TLM's, frequent feedback to students and given students special attention. Per the findings, parent factors which was very key was parent showing concern in their children's academics and providing them their academic needs. School factors that were significant included availability of text books and TLM's. The study also found that parent level of education and gender has a positive relationship with academic performance but it's insignificant. However, age has a positive significant (5% significance level) relationship with academic performance. Based on findings, the study recommends that there should be strict monitoring on teachers to vary their teaching methods to suit their needs of the students and also to provide the students with constant feedback on their academic performance. Again, the students should be motivated and orientated to take ownership of their studies by having regular studies and attending school during school days.

Educational Research and Innovation The Nature of Learning Using Research to Inspire Practice

Factors contributing to academic performance of students in a Junior High School

Why Understanding America's Religious Landscape Is the Most Important Challenge Facing Us Today The 1990s saw the U.S. Navy commission its first Muslim chaplain and open its first mosque. There are presently more than three hundred

temples in Los Angeles, home to the greatest variety of Buddhists in the world. There are more American Muslims than there are American Episcopalians, Jews, or Presbyterians.

Greek Thought, Arabic Culture

This book examines the state of print and electronic media in the United States of America, Europe, and China. The latest mass communication advances demonstrate that we live in an increasingly media-centric world. The chapters include theoretical and empirical studies that shed light on the meaning of this development. The trajectory of people's move to electronic communication is a global phenomenon affecting their daily life. Does this trend aid or impede democracy? Is there an emerging digital divide contributing to an increasing gap between the rich and poor people and nations? The four parts of this book explore various aspects of political socialization and its relationship with different media, including print, broadcasting, and the Internet.

Impact of Colleges of Arabic and Islamic Studies on the Integration of Islamiyyah/Qur'anic Schools Into UBE Programme in Katsina State

Goat science covers quite a wide range and varieties of topics, from genetics and breeding, via nutrition, production systems, reproduction, milk and meat production, animal health and parasitism, etc., up to the effects of goat products on human health. In this book, several parts of them are presented within 18 different chapters. Molecular genetics and genetic improvement of goats are the new approaches of goat development. Several factors affect the passage rate of digesta in goats, but for diet properties, goats are similar to other ruminants. Iodine deficiency in goats could be dangerous. Assisted reproduction techniques have similar importance in goats like in other ruminants. Milk and meat production traits of goats are almost equally important and have significant positive impacts on human health. Many factors affect the health of goats, heat stress being of increasing importance. Production systems could modify all of the abovementioned characteristics of goats.

African Indigenous Knowledge and the Disciplines

Volume 1 (A and B) of the Yearbook of International Organizations covers international organizations throughout the world, comprising their aims, activities and events

Islamic Counselling

The United States is one of the most religious places on earth, but it is also a nation of shocking religious illiteracy. Only 10 percent of American teenagers can name all five major world religions and 15 percent cannot name any. Nearly two-thirds of Americans believe that the Bible holds the answers to all or most of life's basic questions, yet only half of American adults can name even one of the four gospels and most Americans cannot name the first book of the Bible. Despite this lack of basic knowledge, politicians and pundits continue to root public policy arguments in religious rhetoric whose meanings are missed—or misinterpreted—by the vast majority of Americans. "We have a major civic problem on our hands," says religion scholar Stephen Prothero. He makes the provocative case that to remedy this problem, we should return to teaching religion in the public schools. Alongside "reading, writing, and arithmetic," religion ought to become the "Fourth R" of American education. Many believe that America's descent into religious illiteracy was the doing of activist judges and secularists hell-bent on banishing religion from the public square. Prothero reveals that this is a profound misunderstanding. "In one of the great ironies of American religious history," Prothero writes, "it was the nation's most fervent people of faith who steered us down the road to religious illiteracy. Just how that happened is one of the stories this book has to tell." Prothero avoids the trap of religious relativism by addressing both the core tenets of the world's major religions and the real differences among them. Complete with a dictionary of the key beliefs, characters, and stories of Christianity, Islam, and other religions, *Religious Literacy* reveals what every American needs to know in order to confront the domestic and foreign challenges facing this country today.

Milestones

On Islam and Islamic civilization.

Homesick in Paradise

Islamic counselling is a form of counselling which incorporates spirituality into the therapeutic process. Until now there has been little material available on the subject with no one agreed definition of Islamic counselling and what it involves. There has also been a rapidly growing population of Muslims in Western societies with a corresponding rise in need of psychological and counselling services. *Islamic Counselling: An Introduction to theory and practice* presents a basic understanding of Islamic counselling for counsellors and Islamic counsellors, and provides an understanding of counselling approaches congruent with Islamic beliefs and practices from a faith-based perspective. The book is designed as an introduction for counsellors, its goal is to inform the reader about how the diverse roles of the Islamic counsellor fit together in a comprehensive way and to provide the guidelines that can be potentially integrated into a theoretical framework for use. The book is divided into two parts. Section one: Context and Background, and Section two: Assessment, Models and Intervention Strategies. *Islamic Counselling* encompasses both current theory, research and an awareness of the practice

implications in delivering appropriate and effective counselling interventions with Muslim clients. It will be essential reading for both professionals and students alike.

Overcoming Religious Illiteracy

In *Overcoming Religious Illiteracy*, Harvard professor and Phillips Academy teacher Diane L. Moore argues that though the United States is one of the most religiously diverse nations in the world, the vast majority of citizens are woefully ignorant about religion itself and the basic tenets of the world's major religious traditions. The consequences of this religious illiteracy are profound and include fueling the culture wars, curtailing historical understanding and promoting religious and racial bigotry. In this volume, Moore combines theory with practice to articulate how to incorporate the study of religion into the schools in ways that will invigorate classrooms and enhance democratic discourse in the public sphere.

Evil Eye, Jinn Possession, and Mental Health Issues

This book brings together the lessons of research on both the nature of learning and different educational applications, and it summarises these as seven key concluding principles.

Sexuality Education from an Islamic Perspective

This book outlines the unique challenges and opportunities of doing business in Africa, analysing how varying degrees of development across its countries affects entrepreneurship. Taking into account historical and cultural contexts, the authors approach the topic by evaluating the different possibilities of business opportunity in Africa. Insightful contributions explore an extensive range of African countries, discussing both formal and informal entrepreneurship, as well as the different factors that influence the growing economy of Africa. *African Entrepreneurship* will be of interest to anyone researching the potential of doing business in Africa, as well as entrepreneurs and policy-makers looking to expand their knowledge on how businesses are managed in this region.

Teen Lives around the World: A Global Encyclopedia [2 volumes]

Access to education is a fundamental human right under the Convention on the Rights of the Child, and represents a key tool to protect refugee children from recruitment into forced labour, military activity, prostitution and crime. The papers presented in this book were commissioned by the UNHCR and presented at a workshop on refugee education held in March 2001 in the United States. Issues discussed include: educational response in emergency situations; quality of refugee school

programmes; youth education for peace and conflict resolution; and a case study of vocational training programmes in Tanzania.

Children and Sustainable Development

High-stakes public examinations exert a dominant influence in most education systems. They affect both teacher and student behavior, especially at the middle and upper levels of secondary education. The content of past examinations tends to dictate what is taught and how it is taught and, more important, what is learned and how it is learned. By changing aspects of these examinations, especially their content and format, education systems can have a strong positive impact on teacher behavior and student learning, help raise student achievement levels, and better prepare students for tertiary-level education and for employment. Examination agencies, many of which have followed the same procedures over decades, can learn from the successes and failures of other systems. This book addresses current issues related to the development, administration, scoring, and usage of these high-stakes public examinations, identifying key issues and problems related to examinations in many emerging market economies as well as in advanced economies. The book's primary audience consists of public examination officials on national, regional, and state examination boards, but the book should also be of interest to senior education policy makers concerned with certification and learning achievement standards, to academics and researchers interested in educational assessment, to governmental and education agencies responsible for student selection, and to professionals at development organizations. "This extremely well-written and comprehensive book offers a timely review of the diversity of public examination practices worldwide; of the tensions between examinations and learning; and of the technical expertise involved in the creation of valid, reliable, and fair assessments. It reminds us that as "the diploma disease" takes hold with an ever-greater intensity at every stage of education worldwide, and the commercial business of testing flourishes, those concerned with educational quality and meaningful learning must be on guard to prevent the assessment tail wagging the educational dog." Angela W. Little, Professor Emerita, Institute of Education, University College London "This book is very well structured and written and draws on the authors' remarkable global knowledge across countries and histories. It will be a great asset both to administrators responsible for examinations and to academics and other professionals who seek to understand the nature and impact of examinations of different types and in different settings." Mark Bray, UNESCO Chair Professor of Comparative Education, University of Hong Kong; and former Director, UNESCO International Institute for Educational Planning "I am sure that Public Examinations Examined, which thoroughly analyzes the practice of public examinations in different countries and makes profound and well-grounded conclusions, will arouse very great interest and will serve to further improve public examinations." Victor Bolotov, Distinguished Professor, Higher School of Economics, National Research University, Moscow; member, Russian Academy of Education; and former Deputy Minister of Education, Russian Federation

E-Political Socialization, the Press and Politics

Educational Assessment in a Time of Reform provides background information on large-scale examination systems more generally and the South African examination specifically. It traces the reforms in the education system of South Africa since 1994 and provides a description of the advances in modern test theory that could be considered for future standard setting endeavours. At the heart of the book is the debate on whether the current standard of education in Africa is good enough . If not, then how can it be improved? The aim of this book is to provide a point of departure for discussions on standard-setting, quality assurance, equating of examinations and assessment approaches. From this point of departure recommendations for practices in general and the exit-level (Grade 12) examination results in particular can be made. This book is ideal reading for principals, teachers, academics and researchers in the fields of educational assessment, measurement, and evaluation.

Goat Science

Public schools can play a role in promoting respect for religious differences

Civility, Religious Pluralism and Education

Culture Is Our Business is Marshall McLuhan's sequel to The Mechanical Bride: Folklore of Industrial Man. Returning to the subject of advertising newly armed with the electric sensibility that informed The Gutenberg Galaxy, Understanding Media, and The Medium Is the Massage, McLuhan takes on the mad men (a play on the ad men of Madison Avenue) of the sixties. Approaching commercial messages as unacknowledged art forms and cultural artifacts, McLuhan delivers a series of probes that pick apart their meanings and underlying values, their paradoxes and paralogsms, and their overt function as persuasion and propaganda. Through humor, satire, and a poetic sensibility, he provides us with a serious exploration of the consumer culture that emerged out of the electronic media environment. In keeping with the participatory ethos of the Internet that McLuhan so clearly anticipated, this is a book that is meant to open the door to further study, reflection, and discussion, and to encourage the development of critical reception on the part of the reader.

Sustainable Development and Social Responsibility—Volume 2

African Entrepreneurship

Evil Eye, Jinn Possession, and Mental Health Issues raises awareness of the cultural considerations, religion and spirituality involved in the assessment of Muslim patients with mental health problems. The belief that jinn spirits can cause mental illness in humans through affliction or possession is widely accepted among Muslims, meaning this belief is a crucial, but frequently overlooked, aspect of mental health problems with Muslim patients in psychiatric care. This book explores the nature of such beliefs, their relationship to mental health and the reasons for their importance in clinical practice. The book argues that it is vital to consider mental disorders as a multifactorial affair, in which spiritual, social, psychological and physical factors may all play a role. It suggests differential diagnostic skills may have an important part to play in offering help to those who believe their problems are caused by possession, and provides accessible literature on clinical issues and practice, interventions, management and evidence-based practice to help health workers achieve a better understanding of Muslim beliefs about possession and how to work with patients that hold such beliefs. Evil Eye, Jinn Possession, and Mental Health Issues is an essential manual for mental health professionals, social workers and psychologists. It should also be of interest to academics and students in the healthcare sciences.

Changing Customs: Challenges and Strategies for the Reform of Customs Administration

McLuhan mines the greats of modern literature, such as Yeats, Eliot and Pound, and points the way to richer understanding of their work. Discussion ranges over conventional topics of literary analysis, though never in conventional fashion, because McLuhan deliberately stakes his turf in a manner that draws technology and culture together. As a result, the key terms cliché and archetype are not confined to language but are shown to have counterparts in the non-linguistic world.

Yearbook of International Organizations 2013-2014

Boko Haram is one of the deadliest extremist armed groups in the world, killing an estimated 10,000 civilians in Nigeria since the group began its attacks in 2009. -- Back cover

"They Set the Classrooms on Fire"

This book focuses on the problem of religious diversity, civil dialogue, and religion education in public schools, exploring the ways in which atheists, secularists, fundamentalists, and mainstream religionists come together in the public sphere, examining how civil discourse about religion fit within the ideals of the American political and pedagogical systems and how religious studies education can help to foster civility and toleration.

Functional Food

This book gathers high-quality research papers presented at the 2nd AUE international research conference, AUEIRC 2018, which was organized by the American University in the Emirates, Dubai, and held on November 13th-15th, 2018. The book is broadly divided into two main sections: Sustainability and Smart Business, and Sustainability and Creative Industries. The broad range of topics covered under these sections includes: risk assessment in agriculture, corporate social responsibility and the role of intermediaries, the impact of privatizing health insurance, political events and their effect on foreign currency exchange, the effect of sustainable HR practices on financial performance, sustainability integration in the supply chain and logistics, gender inequality in the MENA economies, the panel data model, the model of sustainable marketing in the era of Industry 4.0, micro-enterprises as a tool for combating unemployment, the impact of financial education and control on financial behavior, measuring financial and asset performance in agricultural firms, a comprehensive strategic approach to sustainability in the UAE, sustainability and project finance, HR analytics, FaD or fashion for organizational sustainability, a conceptual framework of sustainable competitive advantages, psychology of organizational sustainability, Blockchain technology and sustainability, veganism and sustainability, institution building from an emotional intelligence perspective, sustainable concrete production using CWP, occupants' behavior and energy usage in Emirati houses, the effect of shop lighting on consumer behavior, multimedia applications in digital transformation art, integrating biomimicry principles in sustainable architecture, experimental sustainable practices in fashion education, technology-assisted student-centered learning for civil engineering, and a 10-step design process for architectural design studios. All contributions present high-quality original research work, findings and lessons learned in practical development.

Religious Literacy

This paper, based on the considerable practical experience of the IMF's Fiscal Affairs Department, sets out a successful strategy for modernizing customs administration. The essence is to establish transparent and simple rules and procedures, and to foster voluntary compliance by building a system of self-assessment supported by well-designed audit policies. Having set out this strategy--and its benefits--the paper discusses in depth what is required in terms of trade policy, valuation procedures, dealing with duty reliefs and exemptions, controlling transit movements, organizational reform, use of new technologies, private sector involvement, and designing incentive systems for an effective customs administration.
