Test Methods for Rating Motor, Diesel, and Aviation Fuels; Catalysts; Manufactured Carbon and Graphite Products

This book describes approximately 50 engineering accomplishments -- a number of which were subsequently designated historic mechanical engineering landmarks. This book can serve as an entry guide into the remarkable engineering achievements that occurred in the greater Milwaukee area from the late 1800s until the early 1900s, much of which centered around Milwaukee's Menomonee River Valley.

ASTM Standards on Petroleum Products and Lubricants

This volume contains test methods for rating motor, diesel, and aviation fuels. It also covers test methods that are used to determine the knocking or detonation characteristics for motor and aviation fuels and the ignition characteristics of diesel fuels. Some tests evaluate catalytic materials, while others feature standard tests and practices for performing chemical and physical tests on manufactured carbon and

graphite products.
