### AI Superpowers

This women's history classic brilliantly exposed the constraints imposed on women in the name of science and exposes the myths used to control them. Since the the nineteenth century, professionals have been invoking scientific expertise to prescribe what women should do for their own good. Among the experts' diagnoses and remedies: menstruation was an illness requiring seclusion; pregnancy, a disabling condition; and higher education, a threat to long-term health of the uterus. From clitoridectomies to tame women's behavior in the nineteenth century to the censure of a generation of mothers as castrators in the 1950s, doctors have not hesitated to intervene in women's sexual, emotional, and maternal lives. Even domesticity, the most popular prescription for a safe environment for woman, spawned legions of "scientific" experts. Barbara Ehrenreich and Dierdre English has never lost faith in science itself, butinsist that we hold those who interpret it to higher standards. Women are entering the medical and scientific professions in greater numbers but as recent research shows, experts continue to use pseudoscience to tell women how to live. For Her Own Good provides today's readers with an indispensable dose of informed skepticism.

Computers mediate between individuals by providing channels of communication in the form of messaging systems; they act as brokers in matching buyers and sellers, employees and employers, resources and work processes, and so on. The social significance of computers as mediators and brokers has tremendous political and economic consequences. For managers, these consequences manifest themselves most clearly in the virtual organization, which is founded on the separation of requirements, for example, inputs such as components, from the ways in which requirements are met, or satisfiers, for example, suppliers and distribution networks. Separating these elements allows managers to switch easily from one way of meeting a requirement to another. Used systematically, switching brings huge increases in productivity but it also weakens traditional loyalties. Absent a sense of loyalty to persons or places, virtual organizations distance themselves from the regions and countries in which they operate. This process is undermining the nation-state, which cannot continue indefinitely to control virtual organizations. A new feudal system is in the making, in which power and authority are vested in private hands but which is based on globally distributed resources rather than on the possession of land. The evolution of this new political economy will determine how we do business in the future.

This edition has been thoroughly updated for Illustrator CS4 and includes techniques on using the new multiple artboards for quicker Illustrator work across a variety of designs, demonstrations of the new Blob Brush tool and transparency in gradients, overviews of the new cross-product feature support with InDesign, Flash, and Flex (opening up new opportunities for collaborations between developers and designers), and coverage on a whirlwind of other new useful features. Along with tips, sidebars, and expert commentary, there are also numerous 4-color illustrations and screen shots from contributing artists included to offer readers the most complete coverage on this extraordinary application. Designers

from all fields--illustrators, animators, package designers, graphic designers, web designers, and more--will find Real World Adobe Illustrator CS4 their one-stop guide to creating powerful designs in Illustrator.

### **History of Capitalism, 1500-1980**

With the rise of science, we moderns believe, the world changed irrevocably, separating us forever from our primitive, premodern ancestors. But if we were to let go of this fond conviction, Bruno Latour asks, what would the world look like? His book, an anthropology of science, shows us how much of modernity is actually a matter of faith. What does it mean to be modern? What difference does the scientific method make? The difference, Latour explains, is in our careful distinctions between nature and society, between human and thing, distinctions that our benighted ancestors, in their world of alchemy, astrology, and phrenology, never made. But alongside this purifying practice that defines modernity, there exists another seemingly contrary one: the construction of systems that mix politics, science, technology, and nature. The ozone debate is such a hybrid, in Latour's analysis, as are global warming, deforestation, even the idea of black holes. As these hybrids proliferate, the prospect of keeping nature and culture in their separate mental chambers becomes overwhelming—and rather than try, Latour suggests, we should rethink our distinctions, rethink the definition and constitution of modernity itself. His book offers a new explanation of science that finally recognizes the connections between nature and culture—and so, between our culture and others, past and present. Nothing short of a reworking of our mental landscape. *We Have Never Been Modern* blurs the boundaries among science, the humanities, and the social sciences to enhance understanding on all sides. A summation of the work of one of the most influential and provocative interpreters of science, it aims at saving what is good and valuable in modernity and replacing the rest with a broader, fairer, and finer sense of possibility.

### **The God of Small Things**

Thirty-five years after its initial success as a form of technologically assisted human reproduction, and five million miracle babies later, in vitro fertilization (IVF) has become a routine procedure worldwide. In *Biological Relatives*, Sarah Franklin

explores how the normalization of IVF has changed how both technology and biology are understood. Drawing on anthropology, feminist theory, and science studies, Franklin charts the evolution of IVF from an experimental research technique into a global technological platform used for a wide variety of applications, including genetic diagnosis, livestock breeding, cloning, and stem cell research. She contends that despite its ubiquity, IVF remains a highly paradoxical technology that confirms the relative and contingent nature of biology while creating new biological relatives. Using IVF as a lens, Franklin presents a bold and lucid thesis linking technologies of gender and sex to reproductive biomedicine, contemporary bioinnovation, and the future of kinship.

This book explores the various personal and social narratives within the songs of Brassens and Brel, the auteurs-compositeurs-interpretes who epitomised what is now widely regarded as the golden era of chanson française during the 1950s and 60s. Tinker's discussion reveals the tensions in the narrators' relationship with themselves, other individuals, and society. The book builds upon, and moves beyond, the two dominant critical approaches used to write about French song: the exclusively biographical oriented approach and the purely linguistic analysis. Tinker focuses both on identity, viewed primarily as a relational process, and on representation: linguistic, musical, vocal, and gestural.

Eloquent Spaces adopts the twin analytic of meaning and community to write a fresh history of building in early India. It presents a new perspective on the principles and practices of early Indian architecture. Defining it broadly over a range of space uses, the book argues for architecture as a form of cultural production as well as public consumption. Ten essays by leading archaeologists, architects, historians and philosophers, examining different architectural sites and landscapes, including Sanchi, Moodabidri, Srinagar, Chidambaram, Patan, Konark, Basgo, and Puri, demonstrate the need to look beyond the built form to its spirit, beyond aesthetics to cognition, and thereby to integrating architecture with its myriad living contexts. The volume captures some of the semantic diversity inherent in premodern Indian traditions of civic building, both sacred and secular, which were, however, unified in their insistence on enacting meaning and a transcendent validity over and above utility and beauty of form. The book is a quest for a culturally rooted architecture as an alternative to the growing crisis of disembeddedness that informs modern praxis. This volume will be of interest to scholars and

practitioners of architecture, ancient Indian history, philosophy, art history, and cultural studies.

## **The Stubborn Earth**

The beloved debut novel about an affluent Indian family forever changed by one fateful day in 1969, from the author of *The Ministry of Utmost Happiness* NEW YORK TIMES BESTSELLER • MAN BOOKER PRIZE WINNER Compared favorably to the works of Faulkner and Dickens, Arundhati Roy's modern classic is equal parts powerful family saga, forbidden love story, and piercing political drama. The seven-year-old twins Estha and Rahel see their world shaken irrevocably by the arrival of their beautiful young cousin, Sophie. It is an event that will lead to an illicit liaison and tragedies accidental and intentional, exposing "big things [that] lurk unsaid" in a country drifting dangerously toward unrest. Lush, lyrical, and unnerving, *The God of Small Things* is an award-winning landmark that started for its author an esteemed career of fiction and political commentary that continues unabated.

## **The World of Words: Vocabulary for College Success**

The Recursive Mind challenges the commonly held notion that language is what makes us uniquely human. In this compelling book, Michael Corballis argues that what distinguishes us in the animal kingdom is our capacity for recursion: the ability to embed our thoughts within other thoughts. "I think, therefore I am," is an example of recursive thought, because the thinker has inserted himself into his thought. Recursion enables us to conceive of our own minds and the minds of others. It also gives us the power of mental "time travel"--the ability to insert past experiences, or imagined future ones, into present consciousness. Drawing on neuroscience, psychology, animal behavior, anthropology, and archaeology, Corballis demonstrates how these recursive structures led to the emergence of language and speech, which ultimately enabled us to share our thoughts, plan with others, and reshape our environment to better reflect our creative imaginations. He shows how the recursive mind was critical to survival in the harsh conditions of the Pleistocene epoch, and how it evolved to foster social cohesion. He traces how language itself adapted to recursive thinking, first through manual

gestures, then later, with the emergence of Homo sapiens, vocally. Toolmaking and manufacture arose, and the application of recursive principles to these activities in turn led to the complexities of human civilization, the extinction of fellow large-brained hominins like the Neandertals, and our species' supremacy over the physical world. Marketing attempts to influence the way consumers behave. These attempts have implications for the organizations making the attempt, the consumers they are trying to influence, and the society in which these attempts occur. We are all consumers and we are all members of society, so consumer behavior, and attempts to influence it, are critical to all of us. This text is designed to provide an understanding of consumer behavior. This understanding can make us better consumer, better marketers, and better citizens. A primary purpose of this text is to provide the student with a usable, managerial understanding of consumer behavior.-Pref.

### **The Englishman in China During the Victorian Era**

When Betty MacDonald married a marine and moved to a small chicken farm on the Olympic Peninsula in Washington State, she was largely unprepared for the rigors of life in the wild. With no running water, no electricity, a house in need of constant repair, and days that ran from four in the morning to nine at night, the MacDonalds had barely a moment to put their feet up and relax. And then came the children. Yet through every trial and pitfall—through chaos and catastrophe—this indomitable family somehow, mercifully, never lost its sense of humor. A beloved literary treasure for more than half a century, Betty MacDonald's *The Egg and I* is a heartwarming and uproarious account of adventure and survival on an American frontier.

## **For Her Own Good**

How to design a world in which we rely less on stuff, and more on people. We're filling up the world with technology and devices, but we've lost sight of an important question: What is this stuff for? What value does it add to our lives? So asks author John Thackara in his new book, *In the Bubble: Designing for a Complex World*. These are tough questions for the pushers of technology to answer. Our economic system is centered on technology, so it would be no small matter if "tech" ceased to be an end-in-itself in our daily lives. Technology is not going to go away, but the time to discuss the end it will serve is before we deploy it, not after. We need to ask what purpose will be served by the broadband communications, smart materials, wearable computing, and connected appliances that we're unleashing upon the world. We need to ask what impact all this stuff will have on our daily lives. Who will look after it, and how? *In the Bubble* is about a world based less on stuff and more on people. Thackara describes a transformation that is taking place now—not in a remote science fiction future; it's not about, as he puts it, "the schlock of the new" but about radical innovation already emerging in daily life. We are regaining respect for what people can do that technology can't. *In the Bubble* describes services designed to help people carry out daily activities in new ways. Many of these services involve technology—ranging from body implants to wide-bodied jets. But objects and systems play a supporting role in a people-centered world. The design focus is on services, not things. And new principles—above all, lightness—inform the way these services are designed and used. At the heart of *In the Bubble* is a belief, informed by a wealth of real-world examples, that ethics and responsibility can inform

design decisions without impeding social and technical innovation.

### **Putnam's Word Book**

One of Time's 100 best English-language novels • A mind-altering romp through a future America so bizarre, so outrageous, you'll recognize it immediately Only once in a great while does a writer come along who defies comparison—a writer so original he redefines the way we look at the world. Neal Stephenson is such a writer and Snow Crash is such a novel, weaving virtual reality, Sumerian myth, and just about everything in between with a cool, hip cybersensibility to bring us the gigathriller of the information age. In reality, Hiro Protagonist delivers pizza for Uncle Enzo's CosoNostra Pizza Inc., but in the Metaverse he's a warrior prince. Plunging headlong into the enigma of a new computer virus that's striking down hackers everywhere, he races along the neon-lit streets on a search-and-destroy mission for the shadowy virtual villain threatening to bring about infocalypse. Praise for Snow Crash "[Snow Crash is] a cross between Neuromancer and Thomas Pynchon's Vineland. This is no mere hyperbole."—The San Francisco Bay Guardian "Fast-forward free-style mall mythology for the twenty-first century."—William Gibson "Brilliantly realized . . . Stephenson turns out to be an engaging guide to an onrushing tomorrow."—The New York Times Book Review

### **Out Of Control**

### **Consumer Behavior**

The human race created money and finance: then, our inventions recreated us. In Extreme Money, best-selling author and global finance expert Satyajit Das tells how this happened and what it means. Das reveals the spectacular, dangerous money games that are generating increasingly massive bubbles of fake growth, prosperity, and wealth--while endangering the jobs, possessions, and futures of virtually everyone outside finance. "virtually in a category of its own — part history, part book of financial quotations, part cautionary tale, part textbook. It contains some of the clearest charts about risk transfer you will find anywhere. Others have laid out the dire consequences of financialisation ("the conversion of everything into monetary form", in Das's phrase), but few have done it with a wider or more entertaining range of references[Extreme Money] does reach an important, if worrying, conclusion: financialisation may be too deep-rooted to be torn out. As Das puts it — characteristically borrowing a line from a movie, Inception — "the hardest virus to kill is an idea". -Andrew Hill "Eclectic Guide to the Excesses of the Crisis" Financial Times (August 17, 2011) Extreme Money named to the longlist for the 2011 FT and Goldman Sachs Business Book of the Year award.

## **Creating Alternative Futures**

There are no more reespected voices in the environmental movement than these authors, true counselors on the direction of twenty-first-century business. With hundreds of thousands of books sold worldwide, they have set the agenda for rational, ecologically sound industrial development. In this inspiring book they define a superior & sustainable form of capitalism based on a system that radically raises the productivity of nature's dwindling resources. Natural Capitalism shows how cutting-edge businesses are increasing their earnings, boosting growth, reducing costs, enhancing competitiveness, & restoring the earth by harnessing a new design mentality. The authors offer dozens of examples of businesses that are making fourfold or even tenfold gains in efficiency, from self-heating & self-cooling buildings to 200-miles-per-gallon cars, while ensuring that workers aren't downsized out of their jobs. This practical blueprint shows how making resources more productive will create the next industrial revolution

## **Speculator**

“The novel that foreshadowed Donald Trump’s authoritarian appeal.”—Salon It Can’t Happen Here is the only one of Sinclair Lewis’s later novels to match the power of *Main Street*, *Babbitt*, and *Arrowsmith*. A cautionary tale about the fragility of democracy, it is an alarming, eerily timeless look at how fascism could take hold in America. Written during the Great Depression, when the country was largely oblivious to Hitler’s aggression, it juxtaposes sharp political satire with the chillingly realistic rise of a president who becomes a dictator to save the nation from welfare cheats, sex, crime, and a liberal press. Called “a message to thinking Americans” by the *Springfield Republican* when it was published in 1935, *It Can’t Happen Here* is a shockingly prescient novel that remains as fresh and contemporary as today’s news. Includes an Introduction by Michael Meyer and an Afterword by Gary Scharnhorst

### **Virtual Organization**

"Halfway between Frederick Forsyth's Dogs of War and Ayn Rand's Fountainhead. The gold mine in the jungle, the mercenaries, and the child soldiers keep you turning the pages. A morality tale with modern twists." -John Mackey (Founder, Whole Foods Market and author of Conscious Capitalism) The greatest gold discovery in history draws a young Charles Knight to West Africa, where he unearths deception, violence, and romance. Xander Winn-a Dutchman on his own mission-mentors Charles on his voyage into the world of speculation and African politics. But a psychopathic rebel leader, the purveyors of a six-billion-dollar fraud, a team of mercenaries bent on early retirement, and the US government all get in his way. Everyone wants him dead. But Charles plans to strike it rich. ADVANCE PRAISE FOR SPECULATOR "Speculator uses the cover of a thrilling tale of international intrigue to provide an economic and moral defense of the much-maligned speculator and an economic and moral condemnation of those who profit via force and fraud. Doug Casey and John Hunt have provided an invaluable service to those looking for unique ways to spread the ideas of liberty." -Dr. Ron Paul "Speculator may prove to be the first in a new genre of fiction. Give this book to all your friends and enemies." -John Hart (Author of Redemption Road) "Adventure intrigue philosophy politics you'll find it all in this fast-paced novel from Doug Casey and John Hunt. Most important, you'll find thoughts - the kind of thoughts that will make you think too." -Bill Bonner (Author of Empire of Debt and Mobs, Messiahs, and Markets) "Speculator will keep you thinking long past the conclusion and for years to come."-Robert Ringer (Author of Looking Out for #1 and Winning Through Intimidation) "Speculator is a roller-coaster lesson on the arcane world of gold-mine investing. An African revolution, massive fraud with massive profits and losses-the novel is such fun you don't notice how much you are learning. But, mostly, it is a good read with a unique protagonist." -Wendy McElroy (Author of Liberty for Women) "Move over John Galt and Humphrey Bogart, Speculator has created an old-fashioned hero with contemporary style and sex appeal. Expert cicerones lead us through the dark world of African mining and international finance. It is a riveting tale, perfect for a day at the beach or a long-winter's-night read. Pure gold." -Richard Harteis (Author of Marathon and Publishing Director of Poets-Choice.com) "Passionately pointed and provocative."-David Brin (Author of Earth and The Postman) "Speculator combines the fast-paced action of a Dirk Pitt adventure story with the cerebral message of an Ayn Rand novel. The authors' knowledge of how markets, mining, and governments work is impressive, yet the book reads like a day at the beach. Crisp, intelligent, and witty, this new adventure series might even out-Rand Rand." -Jo Ann Skousen (Professor of English Literature, Chapman University)

Critical Pedagogy addresses the shortcomings of mainstream educational theory and practice and promotes the humanization of teacher and student. Where Critical Pedagogy is often treated as a discourse of academics in universities, this book explores the applications of Critical Pedagogy to actual classroom situations. Written in a straight-forward, concise, and lucid form by an American high school teacher, drawing examples from literature, film, and, above all, the everyday classroom, this book is meant to provoke thought in teachers, students and education activists as we transform our classrooms into democratic sites. From grading to testing, from content area disciplines to curriculum planning and instruction, from the social construction of knowledge to embodied cognition, this book takes the theories behind Critical Pedagogy and illustrates them at work in common classroom environments.
