After opening a bag of potato chips, fifteen year old Cyndi was upset when she found that the chips were completely soaked in grease and obviously inedible. She sat in the kitchen with her mother as her mother hand wrote a letter To The potato chip manufacturer. Several weeks after mailing the letter, her family received a huge box in the mail. Upon opening the box, Cyndi was surprised to find that the potato chip manufacturer responded to her mother's letter. Inside the box was a six month supply of potato chips, coupons for future purchases, and an apology letter. A valuable lesson was learned that day. The box of potato chips was nice but the letter of apology was better. Cyndi continued to carry the practice of letter writing and has made this a part of her life. She has used letter writing as a way of reacting in a non-confrontational manner to get resolve and affect change. This book is a compilation of actual letters that were written over the years to strangers, bank managers, car dealership owners, employers, local mayors, local magistrates, local post office workers, and even coworkers. What do these entities have in common? They all inflicted some sort of injustice against Cyndi and received written letters in the mail. Everyone responds to frustration created out of

injustices in the way suited best for him or her. Some people have the unique ability to ignore injustices directed at them and others stand firm on principle. Did the potato chip incident arise To The level of injustice? No. it was an honest mistake. Nevertheless, The letter to them helped Cyndi understand that letters have power. This book expresses one way of releasing frustration and a unique way of dealing with the frustration creators of the world.

Medical ethics, sociology and epidemiology rarely arouse one's passion and can, as minor subjects within a busy curriculum, find themselves ignored by vast swathes of students. However, recent times have seen not only a greater general

understanding of these subjects but also a greater appreciation of their role within modern medical practice. In addition, these subjects are increasingly appearing in exams and, more importantly, they will crop up in every field and at every level of future working lives. In writing this book, the authors hope to provide a springboard from which students can develop a reasoned ethical approach to dilemmas as and when they present, both within their practice of medicine and in the exam situation. The sociology and public health sections aim to provide key information on the theories and studies that have helped to shape the practice of these disciplines - topics that are all too often unacknowledged by medical students and doctors alike. In doing so, the authors hope to provide the essential facts on these subjects without leaving readers to wade through irrelevant material. It is hoped that all students might begin to enjoy evidence (as well as experience)-based medicine and appreciate its importance regardless of the medical or surgical careers that they pursue. More than 80 line artworks, tables and boxes present clinical, diagnostic and practical information in an easy-to-follow manner Friendly and accessible approach to the subject makes learning especially easy Written by junior doctors for students - authors who understand exam pressures Contains 'Hints and Tips' boxes, and other useful aide-mémoires Succinct coverage of the subject enables 'sharp focus' and efficient use of time during exam preparation Contains a fully updated self-assessment section - ideal for honing exam skills and self-testing Self-assessment section fully updated to reflect current exam requirements Contains 'common exam pitfalls' as advised by faculty Crash Courses also available electronically!
