Students who do well in law school tend to write their exams in a particular way. The purpose of this book is to introduce students to this method. Chapters teach the law student the purpose of an essay exam, the process of getting started, the basic steps in writing the essay, principles for explaining your answer, as well as basic organizational, signposting, and writing rules. An appendix contains two actual exam questions, including a "model" answer.

Custom Guide to Writing

How to Write Law Essays and Exams provides law students with a practical and proven method of analysing and answering essay and exam questions. The book focuses on those questions that give students the most trouble, namely problem questions, but its techniques are equally applicable to other types of essays. In addition to providing a framework for analysing and writing law essays, the book teaches students how to identify relevant legal authorities, distinguish and harmonise conflicting legal precedents and evaluate the applicability of the law to the facts of the question at hand. The book also contains specific law-related revision techniques and general writing tips. Designed for law students of all levels, including those on A-level, university, conversion, and vocational courses, the text helps students understand their substantive courses while at the same time teaching vital writing and analytical skills. Online Resources The book is accompanied by online resources, including: a case breakdown to help students with reading cases, frequently asked questions, and some tips on citation styles and conventions.
