The Football Manager Guide to Football Management is for anyone who has ever believed that they could do a better job than their club's manager. It's for anyone who has ever tried to prove that point by taking the hot seat in the management simulation Football Manager. Whilst most Football Manager players feel they possess innate tactical awareness, on point man-management skills and a gift for dealing with the media; even the most hardened fan would have to admit there's much to be learned from those who ply their trade in the real world. If you want to make an immediate impact on your struggling hometown club, you need to refer back to Sir Bobby Robson. If you want to lay down the law with your young players, you need to take tips from Sir Alex Ferguson. Want to avoid a financial catastrophe? Then learn from Leeds United! So if, at any point in your life, you have imagined yourself in a tracksuit, waving your arms in the air on the touchline, with your perfect XI scribbled on the back of a beer mat and thinking ahead to the press conference, then this book is for you. After all, you're already a football manager you just haven't been appointed yet.

Aliens

In this unique blend of self-help and moral philosophy, perfect for fans of Gretchen Rubin's The Happiness Project or Dan Harris' 10% Happier, talk-radio host Dennis Prager shows us that happiness isn't just a value—it's a moral obligation. When you ask people about their most cherished values, "happiness" is always at the top of the list. In this enduring happiness manifesto, Prager examines how happiness not only makes us better people, but has an effect on the lives of everyone around us—providing them with a positive environment in which to thrive and be happy themselves. Achieving that happiness won't be easy, though: to Prager, it requires a continuing process of counting your blessings and giving up any expectations that life is supposed to be wonderful. "Can we decide to be satisfied with what we have?" he asks. "A poor man who can make himself satisfied with his portion will be happier than a wealthy man who does not allow himself to be satisfied." Prager

echoes other political commentators in complaining that too many people today see themselves as victims; he submits that the only way to achieve your desires is to take responsibility for your life rather than blaming others. If you're willing to put some thought into achieving a happier outlook, you will find plenty to mull over in *Happiness Is a Serious Problem*.

Lightning Physics and Lightning Protection presents a comprehensive and up-to-date review of lightning, including its hazards and protection techniques. The authors first discuss the effectiveness of conventional protective measures, supply technical advice and practical recommendations, and explore the prospects for the preventive control of a lightning leader, followed by a discussion of the initiation of a leader and return stroke and subsequent components. After including measurements useful for understanding lightning and its effects, the book describes the mechanism of lightning discharge processes. It then examines the effects of large aircraft, high-voltage lines, and other high-altitude constructions on lightning trajectory and leader attraction. The book concludes by studying the action of lightning's electrical and magnetic fields and the lightning current on industrial premises, power transmission lines, underground communications, aircraft and their electrical circuits, and the induction of a dangerous overvoltage. A clear, straightforward, and systematic presentation of complicated material, Lightning Physics and Lightning Protection provides deep insight into the physics of lightning, simple analytical estimates, and a detailed illustration of effects by computer simulation, making this resource essential for those who investigate lightning phenomena and who have to solve practical protection problems.

The year is 2020: Corporations control everything. In the name of domination, these sprawling organizations have recruited their own military forces to fight clandestine battles against one another---a war fought in the boardrooms and won in the shadows, with the public none the wiser. Ex--bounty hunter Joanna Dark has unwillingly seen the front lines of this war. Her run-in with dataDyne, the world's most powerful hypercorporation, has left her with a wound that only vengeance can heal. Daniel Carrington, the charismatic founder of the Carrington Institute, has been locked in an ongoing war with dataDyne for years and sees Joanna's deadly skills as the key to victory over their mutual enemy. But Joanna is young and lost, unable to accept her abilities as virtues or fully trust Carrington's intentions. But when an explosive secret is unearthed---one that could finally bring down the threat of dataDyne once and for all---Joanna finds herself thrust back into the fight, one that brings her face to face with her past . . . and the forces shaping her future.
